WHO Classification of Tumours

**“A unique series of books
acclaimed by pathologists the
world over”**

The new series *WHO Classification of Tumours*, published by the International Agency for Research on Cancer (IARC), provides standardized guidelines on the histological and genetic typing of human tumours. Each title of the new Blue Book series is the outcome of a collaborative effort by a multidisciplinary, international working group of experts.

Diagnostic criteria, pathological features and associated genetic alterations are described in a strictly disease-oriented manner. Profiles of most recognized neoplasms and their variants include new ICD-O codes, incidence, age and sex distribution, location, clinical signs and symptoms, pathology, genetics and predictive factors. Each book contains more than 600 colour photographs, MRIs, CT scans, charts and an up-to-date reference list.

Authoritative and concise, the series provides an international standard for pathologists, oncologists and geneticists. It serves as an indispensable guide for the design of trials monitoring response to therapy and clinical outcome.

NEW!

Fourth edition

- **Central Nervous System***
- **Haematopoietic and Lymphoid Tissues**
- **Digestive**
- **Breast***
- **Soft tissue and bone (2013)**

* *“highly commended” in the British Medical Association Book Competition*
