CDC Site Visit Report

Date: 05/07/2003
Locations: Al Razy Health Centre

Summary of findings:

I. Collection of the daily morbidity forms and cholera cases sheets were collected
II. 4 more cholera cases were reported from Basrah.
III. Onsite training on forms filling and surveillance to improve the data collection was given to the local health co-ordinators (n=8).

II. Basrah Teaching Hospital

1. A visit was conducted to the Basrah Teaching Hospital, where 6 cholera cultures were collected and prepared to be shipped for further confirmation with Dr. Kajta.

II. Al Zubir Health District:

Due to the generalized strike, we were not to meet any health staff and another visit will be arranged next week.
