# Information Session on COVID-19

2021-10-21

# Go.Data Project goal

Design, develop and deploy comprehensive Go.Data software to be used globally by Member states, Partners and WHO to:

***Support and facilitate outbreak investigation including field data collection, contact tracing and visualization of chains of transmission.***

# Objectives of Go.Data implementation

## Timeliness

Improved **timeliness** and **completeness** of the outbreak investigation data.

## Quality

Improved data **quality**.

## Access

Improved **access** to case and **contact data**, including related data.

## Visualisation

**Automated** and **improved** data visualisation, analysis and reporting.

## Integration

**Reduced** number of **disconnected** data sets.

# Go.Data implementation activities

## Installation / IT

Installation and configuration on an appropriate infrastructure.

## Epidemiology

Implementation in specific epidemiological contexts.

## Training

On-line, virtual and in-person trainings.

## Interoperability

Data exchange, additional analysis and dashboards.

## Enhancements

Additional features and functionalities.

# Thank you
