24 January 2000

HIV/AIDS: confronting the epidemic

Report by the Director-General

CORRIGENDUM

The following paragraphs should read as follows:

5. HIV is increasing rapidly in Asia, particularly in south Asia, with 6.5 million people infected. In the Americas, although there has been a decline in mortality due to AIDS, HIV infection continues to increase among minorities and disadvantaged populations.

Draft resolution

1. ...

(7) to implement key strategies for HIV/AIDS prevention, in particular management of sexually transmitted infections and promotion of safer sex, including use of male and female condoms;

(8) to strengthen health systems that are based on the three main goals of improving the health of the population; meeting their legitimate expectations by ensuring access, choice of care providers, prompt attention to health needs and respect for the dignity of the individual; and providing fair financing and financial risk protection;
