Essential health technologies

CORRIGENDUM

Paragraph 8, third sentence, should read:

Each year more than 5 million people die as a result of injuries – almost one out of every ten deaths – and many more use emergency services. Each year, around 500 000 women die from pregnancy-related complications.

Paragraph 12, second sentence, should read:

In many of the developing countries, at least half of medical equipment is unusable for lack not only of financial resources but also of a maintenance policy and of trained personnel.
