### Report on financial and administrative implications for the Secretariat of decisions proposed for adoption by the Executive Board or Health Assembly

1. **Decision:** Global strategy and plan of action on public health, innovation and intellectual property

   - Category: 4. Health systems
   - Programme area(s): Access to medicines and health technologies and strengthening regulatory capacity
   - Outcome: 4.3. Improved access to and rational use of safe, efficacious and quality medicines and health technologies
   - Output: 4.3.2. Implementation of the global strategy and plan of action on public health, innovation and intellectual property

   **How would this decision contribute to the achievement of the outcome(s) of the above programme area(s)?**

   The global strategy and plan of action on public health, innovation and intellectual property aims to increase research and development needed for products for diseases that disproportionally affect developing countries, where access to needed medical technologies is hindered by market failures. By extending the time frame of the global strategy and plan of action, WHO will be able to keep its momentum and continue to advocate the implementation of policies and activities that increase availability of the most needed products. The results of the evaluation exercise will help the Health Assembly to determine new policies to improve the current strategy and ensure the effectiveness of WHO’s actions.

   **Does the Programme budget already include the outputs and deliverables requested in this decision? (Yes/no)**

   Yes.
