## **Governance reform: follow-up to decision WHA69(8) (2016)**

### **Draft forward-looking planning schedule of expected agenda items for the Executive Board and Health Assembly**

#### **Report by the Secretariat**

1. In May 2016, the Health Assembly adopted decision WHA69(8) in which the Director-General was requested, inter alia, to develop a six-year, forward-looking planning schedule of expected agenda items for the Executive Board, including its standing committees, and the Health Assembly, based on standing items, requirements established by decisions and resolutions of the governing bodies, as well as those items required by the Constitution, regulations and rules of the Organization. In response to this request, the Secretariat prepared the following draft schedule.

2. The schedule is divided into three sections, setting out, respectively, the items for sessions of the Executive Board, the Health Assembly, and the Programme, Budget and Administration Committee. A list is provided at the beginning of each section that contains the items appearing on all the provisional agendas of the relevant governing body, such as procedural items, reports provided by the Director-General and the governing bodies and reports that are provided, as needed.<sup>1</sup> These items are not repeated in the schedule of agenda items for each session, in the interest of having as concise a document as possible.

3. Agenda items are listed under the relevant headings, such as “Technical and health matters”<sup>2</sup> and “Administrative and financial matters”, in the case of the schedules for the Executive Board and Health Assembly, and “Matters for information or action by the Committee”, in the case of the schedules for the Programme, Budget and Administration Committee. The standing agenda items under each of these headings appear in **grey shading**.

4. A box at the top of each schedule of agenda items for sessions of the governing bodies indicates the duration of the session and the total number of agenda items. With respect to the schedules of items for the Executive Board, the Secretariat has suggested that an optimal number of agenda items is six items per day, where a day is defined as (2) three-hour sessions, one in the morning and one in the

<sup>1</sup> Reports that are provided “if needed”, appear on every agenda; reference to them is subsequently deleted if they are not needed.

<sup>2</sup> The technical and health matters are listed under the six categories used for priority-setting in the Twelfth General Programme of Work, 2014–2019.

afternoon.<sup>1</sup> This optimal number translates into 36 items in non-budget years when the Board meets for approximately six days, and 48 items in budget years when the Board meets for approximately eight days.<sup>2</sup> Where the number of agenda items exceeds the optimal number, evening sessions are usually required for the Board to complete its work.

<sup>1</sup> See document EB134/6 paragraph 29.

<sup>2</sup> In odd numbered years, the programme budget is considered by the Executive Board in January and the Health Assembly in May.
