Epilepsy

The Executive Board, having considered the report on epilepsy,¹ and noting the highly treatable nature of epilepsy, for which urgent action is needed; the many outstanding gaps in the prevention and treatment of the condition; its frequent occurrence as a comorbidity of neurological disorders; and the potential for scaling up implementation of synergistic, proven cost-effective measures to reduce the burden of epilepsy and other neurological disorders, decided:

(1) to note the global report, *Epilepsy: a public health imperative*,² published in 2019;

(2) to encourage Member States to discuss a possible draft resolution on further action on epilepsy and other neurological disorders for consideration by the Seventy-third World Health Assembly;

(3) to request the Director-General:

(a) to expand the scope of the report to be submitted for consideration by the Seventy-third World Health Assembly, by adding a new section entitled “Synergies in addressing the burden of epilepsy and other neurological disorders;”

(b) to develop technical guidance on strengthening country actions against epilepsy and its comorbidities, and make this available on WHO’s website.

Ninth meeting, 6 February 2020
