III. Technical briefings

The following technical briefings will take place during the Sixty-seventh World Health Assembly.

Thursday, 22 May 2014

12:30–14:15

Room XII

Goals and targets for health in the post-2015 development agenda

There will be interpretation in Arabic, Chinese, English, French, Russian and Spanish

The debate on the goals and targets for the post-2015 development agenda is in full swing. Health as a goal appears in a dozen or more multiple processes, such as the Open Working Group of the General Assembly (OWG) and the High-Level Panel of Eminent Persons on the Post-2015 Development Agenda. The United Nations General Assembly will discuss the OWG report in September 2014.

This technical briefing will provide an overview of the current processes and the role of health in them, and gather views from Member States about the possible health goals, sub-goals and targets.

Friday, 23 May 2014

12:30–14:15

Room XII

The role of priority setting in universal health coverage: the value of international support for Health Intervention and Technology Assessment

There will be interpretation in Arabic, Chinese, English, French, Russian and Spanish

In most low- and middle-income countries (LMICs), achieving universal health coverage (UHC) requires priority setting of the many alternative ways to address health problems, as finance, human resources, medicines/health technologies and facilities are always limited. To support the rational use of resources, health intervention and technology assessment (HITA), including cost-effectiveness analysis, has been widely recognized as offering a useful set of tools to assist the process of establishing priorities.

In this technical briefing, we will share the experiences of Member States, international organizations and development partners in the use of explicit frameworks for priority setting – in order to inform transparent decision-making and facilitate progress towards universal health coverage – as well as discuss the role of WHO and partners in building HITA capacity.
