

Reporting instrument – Revised format for Group 1 questions (decision FCTC/COP2(9))

1. In accordance with decision FCTC/COP2(9) of the second session of the Conference of the Parties, the Convention Secretariat revised the Group 1 questions of the reporting instrument, while maintaining the content. The format was revised in order to resolve technical problems in completing the questionnaire, to create additional data-entry boxes where appropriate and to standardize the reporting format throughout the questionnaire. WHO's Tobacco Free Initiative and other experts provided valuable input.
2. The Bureau of the Conference of the Parties at its meeting on 28 January 2008 agreed in principle with the proposed version and recommended pilot testing by interested Parties. Comments on the revised Group 1 questions were received from 12 Parties, representing all the WHO regions. In general, the Parties agreed that the revised questionnaire is better organized and formatted, simpler, clearer and more user-friendly. They found that previous technical problems in its use had been resolved.
3. Further changes were made to the questionnaire on the basis of the recommendations received from the Parties that participated in the pilot testing. Suggestions for changes in the content that would have been gone beyond the mandate given to the Secretariat by the Conference of the Parties for the revision were analysed and maintained for reflection during the development of the Group 2 questions (second phase) of the reporting instrument. The Convention Secretariat also updated and made available, in the six official languages of the United Nations, a web-based version of the revised questionnaire and a set of instructions to assist Parties in completing the questionnaire.
4. The Bureau of the Conference of the Parties, during a meeting on 23 and 24 April 2008, accepted the revised questionnaire for provisional use by Parties, pending a decision of the Conference of the Parties at its third session. The revised instrument was announced to Parties on 16 May 2008 and made available for provisional use.
5. The attached document provides a short overview of the changes made to the Group 1 questions of the reporting instrument during the various stages of revision and pilot testing. It also includes the revised reporting instrument, provisionally approved by the Bureau for consideration by the Conference of the Parties.

**REPORTING INSTRUMENT: GROUP 1 QUESTIONS
REVISIONS BY THE SECRETARIAT AND COMMENTS BY PARTIES
REFLECTED IN THE QUESTIONNAIRE**

Question no.	Rationale for change and comments by Parties	Revision made
1. General		
	The questionnaire was difficult to follow because of unclear and inconsistent numbering and problems with formatting.	The numbering of the questions has been made consistent throughout the questionnaire, and its format has been standardized.
	Data-entry boxes were missing.	Additional data-entry boxes have been created where appropriate.
	Parties were required to use an electronic button to create new tables when there were insufficient fields to enter the data. This made the document unnecessarily long.	Extra data-entry fields or rows are provided in the tables where appropriate. More electronic buttons are provided for creating new data-entry fields within the same table, instead of reproducing tables.
2. Demographics		
2.1, 2.2	Questions 2.1 and 2.2 were formatted differently from other questions in the Word-based reporting instrument.	The questions have been reformatted to facilitate data-entry and for consistency.
2.1(a), 2.2(a)	Parties were not requested to provide the source of the data they provided in answer to questions 2.1 and 2.2 or the year of the data for question 2.2.	New data-entry fields are provided to enter this information.
2.1	No standard age groups were proposed to Parties for providing demographic data in answer to question 2.1, whereas this was the case for the questions on prevalence.	Use of the same standard age groups (preferably by 10-year categories, e.g. 25–34, 35–44) is now suggested for entering demographic data, as for prevalence (questions 3.1(b) and 3.1(d)).
3. Tobacco use		
3.1(a)–(f), 3.2(a), 3.2(c)	The same data had to be entered a number of times.	The questions have been reformatted so that information about “tobacco products included” and the “year of the data” need be provided only once, at the end of each answer.
3.1(a)	The second question required Parties to repeat information already entered in answer to the first question.	The questions have been combined so that information need be provided only once.

3.1(a), 3.1(b)	The questions solicited the prevalence of tobacco consumption for a number of age ranges; however, a number of Parties currently have access only to data for the entire adult population.	The question has been divided. For the first, Parties are asked to provide data for the total adult population; for the second, they are asked to provide data by each age range, if available.
3.1(e), 3.1(f)	No data-entry fields were provided for giving prevalence data separately for smoking and smokeless tobacco.	New data-entry fields have been provided in questions 3.1(e) and 3.1(f) for entering these data.
3.2(a), 3.2(c)	There was insufficient direction about the types of tobacco products to be included in the answers to questions.	Tobacco products are now in three categories: smoking tobacco, smokeless tobacco and other tobacco products. Further explanation of these categories is provided in the accompanying explanatory note.
3.2(d)	The question was too general.	The question has been retained, but four sub-questions have been added to guide Parties' responses.
3.1(a)–(f) 3.2(a), 3.2(c), 3.2(d)	Parties were not asked to provide the source or, in some cases, the year of the data they entered.	New data-entry fields are provided for entering this information.
4. Taxation		
4.1	There was only one text field for providing information on taxation, making analysis of the data difficult.	Parties are requested to provide information in tabular format.
4.2	There was only one field for providing information about retail price.	Parties are requested to provide information in tabular format.
4.2	There were no separate data-entry fields for the retail prices of smoking and of smokeless tobacco products.	New data-entry fields have been added for the provision of these data.
4.2	The weight of smokeless tobacco products can be the unit of a package, which is not reflected in the table.	Additional wording has been added.
4.2	There was no data-entry field for the currency used in the data on retail price.	A new data-entry field is provided for entering this information.
5. Legislative, executive, administrative and other measures		
5	Parties were required to state whether measures had been adopted in "full"; the meaning of the term "full" is ambiguous.	The word "full" has been replaced by "complete".

5.1(c), 5.1(d)(v), 5.1(d)(vi), 5.1(e)(vi), 5.2(b)(i), 5.2(c)(iii)	Important treaty language was omitted.	Treaty language that clarifies the question has been included, and the phrasing of the questions made more consistent with the language used in the text of the WHO Framework Convention.
5.1(b)(iv)	Parties were not asked for information about the types of public transport covered, inconsistent with the Article 8 guidelines.	Various types of public transport are now included, such as airplanes, trains, ground public transport and motor vehicles used as places of work.
5.1(b)(vii)	Parties were asked to provide only a brief summary of “partial” measures.	Parties are now requested to provide a summary of measures that have been both completely and partially implemented in the data-entry fields provided.
5.1(d)(ii)	The phrasing of the question was inconsistent with that of other questions.	The phrasing of the question has been made consistent with the rest of the questionnaire.
5.1(e)(ii)	The field for the legal age at which sales to minors are prohibited was in the “Yes” tick box.	A separate field has been created for Parties to specify the legal age.
5.1(c), 5.1(e)(ii)	The questions were too broad for Parties to answer accurately.	The question has been divided into dot points that can be addressed separately with “Yes/No” answers.
5.2(c)	There was no reference in the questionnaire to what a “comprehensive” ban on advertising, promotion and sponsorship means.	An explanation is given in the instructions.
5.2(c)(ii)– 5.2(c)(x)	The relevance of some questions was contingent on the response given to other questions.	Parties are told when it is unnecessary to answer a question and instructed to proceed to the next relevant question.
6. Programmes and plans		
6.1(a)(i), 6.1(a)(ii), 6.1(a)(iii), 6.1(b)(ii)	The relevance of some questions was contingent on the responses given to others.	Parties are told when it is unnecessary to answer a question and instructed to proceed to the next relevant question.
6.1(a)(i), 6.1(e)(ii), 6.2(a)(i),	Important treaty language was omitted.	Treaty language that clarifies the question has been included and the phrasing of questions made more consistent with the language used in the text of the WHO Framework Convention.

6.1(a)	The heading “General obligations” did not appear at the beginning of the questions, which is inconsistent with the approach in the remainder of the document.	The heading “General obligations” has been moved so that it appears at the start of question 6.1(a).
6.1(a)(ii)	The meaning of “partial strategies, plans and programmes” was ambiguous.	The question has been rephrased to ask whether Parties have partially developed and implemented tobacco control strategies by including tobacco control in other programmes.
6.1(a)(iii)	The answer that a Party had no comprehensive or partial strategy did not make it clear whether some aspects of the Convention had been included in any policy.	Parties are now asked whether any aspect of tobacco control referred to in the Convention is included in any national strategy, plan or programme.
6.1(a)(iv)	There was no heading for the questions that followed, which was inconsistent with the rest of the document.	A heading has been included, consistent with other sections of the document.
6.1(a)(iv), 6.1(a)(vi)	The questions were too broad for Parties to answer accurately.	The question has been divided into two. Parties are first asked whether they have a national coordinating mechanism and, secondly, whether they have a focal point for tobacco control.
6.1(a)(v)	The question did not request information about the nature of the national coordinating mechanism for tobacco control.	Options have been provided so that Parties can be more specific about the nature of the national coordination mechanism.
6.1(a)(vii)	The question did not request information about the organization or institution that hosts the focal point for tobacco control.	Options have been provided so that Parties can be more specific about the organization or institution hosting the focal point for tobacco control.
6.1(b)(iv), 6.1(c)(i)	There was no reference in the questionnaire to the meaning of the terms “wide range” and “guidelines” in the respective contexts.	An explanation is given in the instructions.
6.1(c)(i)	Important treaty language was omitted from the initial question, and when included, the question was too broad to be answered accurately.	The previous question has been divided into two, which follow the language of the WHO Framework Convention.

6.1(b)(iii), 6.1(d), 6.1(e)(i), 6.2(a)(i) 6.2(b)(i), 6.2(d)(iii), 6.2(d)(iv), 6.2(d)(v)	The questions asked for too much information for accurate answers to be given.	The questions have been divided into dot points that can be addressed separately with “Yes/No” answers.
6.2(e)	There was no data-entry field for Parties to provide a brief summary of the measures reported in section 6.2 of the questionnaire.	A new data-entry field is provided for entering additional information on the measures taken.
7. Technical and financial assistance		
7.1, 7.2	The order of the questions was confusing.	The order of the questions has been changed.
8. Priorities for implementation of the WHO Framework Convention on Tobacco Control		
8.2	The data-entry box for this question was missing.	A data-entry field has been added.
10. Questionnaire feedback		
	The question asking for feedback in order to improve the Group 1 questionnaire has become obsolete.	This question has been removed. The question asking Parties to provide feedback for future development of the Group 2 questionnaire is retained.

4. Taxation

4.1 Please state the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)
(Please refer to Article 6.3.)

		Product	Type of tax	Rate or amount	Base of tax¹
	Smoking tobacco products				
	Smokeless tobacco products				
Other tobacco products					
Please attach the relevant documentation in one of the six official languages, if available. <i>(Please refer to Article 6.3.)</i>					

¹ The “base of the tax” should clearly indicate on what the tax rate or amount is based. If the tax is expressed as a percentage, the base of the tax is the actual value of the good that is taxed. For example, a sales tax that is applied at the final stage of distribution will be calculated on top of those taxes that have previously been levied. If the tax is expressed as an amount, the base of the tax is the volume of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

4.2 Please provide retail prices for the three most widely sold brands of domestic and imported tobacco products at the most widely used point of sale in your capital city. <i>(Please refer to Article 6.2(a).)</i>				
	Most widely sold brands		Number of units or amount (e.g. weight) per package	Retail price
	Smoking tobacco products	Smokeless tobacco products, including snuff and chewing tobacco (optional)		
Domestic				
Imported				
4.2(a)(i)	Please indicate the year and source of the data used to answer questions 4.1 and 4.2 : <i>(Please ensure that you have used the latest available data.)</i>			
4.2(a)(ii)	Please provide the currency used to complete the “Rate or amount” section of question 4.1 and the “Retail price” section of question 4.2 . Please provide the exchange rate of this currency to US dollars, if known.
