This list of references on rural hygiene was compiled to assist participants in the Technical Discussions on "Public Health Problems in Rural Areas" to be held during the Seventh World Health Assembly, 1954. It is based upon the material available in the WHO Library, Geneva, especially that published during the last ten years, supplemented by reference to the relevant bibliographical sources including the principal indexing and abstracting periodicals. Although every effort has been made to make the list as representative as possible of geographical areas, it is recognized that it can make no claim to be regarded as comprehensive. Additions and corrections will therefore be welcomed and should be addressed to:

Library and Reference Section
World Health Organization
Palais des Nations
Geneva, Switzerland

Cette liste de références sur l'hygiène rurale a été préparée à l'intention des personnes participant aux Discussions Techniques sur les "Problèmes de santé publique dans les régions rurales" qui auront lieu pendant la Septième Assemblée Mondiale de la Santé, 1954. Elle est fondée sur les publications qui se trouvent à la Bibliothèque de l'OMS, à Genève, en particulier celles qui ont paru pendant les dix dernières années, et a été complétée par des références dans les sources bibliographiques essentielles, notamment les principaux index et périodiques analytiques. Bien qu'on se soit efforcé de rendre la liste aussi représentative que possible de toutes les régions géographiques, elle ne prétend aucunement à être exhaustive. Les additions et corrections éventuelles seront les bienvenues et peuvent être adressées à

Section de la Bibliothèque et de la Documentation
