## COMMITTEE ON PROGRAMME &amp; BUDGET

ORIGINAL: FRENCH

## EXPERT COMMITTEE ON HEALTH ASPECTS OF POPULATION PROBLEMS

Draft resolution presented by the delegations of  
Belgium, Italy and Lebanon

The Fifth World Health Assembly

Considering that the problems resulting from over-population  
in certain regions are dominated by preponderant economic and social  
factors;

Considering that the United Nations is preparing a World  
Population Conference which will examine population problems in general;

Being of the opinion that it would obviously be useful to know  
the results of the work of this conference, which will provide a  
comprehensive view and bring out the particular aspects of the problem;

RESOLVES that from the purely medical standpoint, population  
problems do not require any particular action on the part of WHO at  
the present time.
