September 1995

EXPANDED
PROGRAMME
ON IMMUNIZATION

Information System
Summary for the WHO Western Pacific Region

WORLD
HEALTH
ORGANIZATION

The EPI gratefully acknowledges the contribution from the Government of the Netherlands for the financial support for this document, and to the Ministries of Health, who provided the data.

© World Health Organization 1995

This document is not a formal publication of the World Health Organization (WHO), and all rights are reserved by the Organization. The document may, however, be freely reviewed, abstracted, reproduced and translated, in part or in whole, but not for sale nor for use in conjunction with commercial purposes.

The views expressed in documents by named authors are solely the responsibility of those authors.

Expanded Programme on Immunization Information System

This document contains information on:

- Immunization coverage
- Incidence of diseases
- National immunization days
- Acute flaccid paralysis rates

As before, this information is compiled from many sources, but principally from the Ministry of Health from each country and is published every six months.

FOR YOUR ACTION, PLEASE:

1. Check the data for your country:

- are they correct?
- are they up to date?

2. Please send the latest, correct data to your Regional Office by:

- 1 February 1996

3. Please let us know of any other suggestions for improving this information system.

Thank you for your help

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This not only helps in tracking expenses but also ensures compliance with tax regulations.

In the second section, the author provides a detailed breakdown of the company's revenue streams. This includes sales from various product lines and services. The data shows a steady increase in revenue over the past year, which is attributed to strategic marketing efforts and improved operational efficiency.

The third section focuses on the company's financial health and liquidity. It highlights the company's strong cash flow and low debt-to-equity ratio. These factors are crucial for long-term sustainability and growth. The author also mentions the company's commitment to investing in research and development to stay ahead in the market.

Finally, the document concludes with a summary of the company's overall performance and future outlook. The author expresses confidence in the company's ability to continue its upward trajectory and meet its financial goals for the coming year.

12-Sep-95

Table 1.1.1: Estimated percentage of children immunized in the first year of life and percentage of pregnant women immunized against tetanus, by WHO Region, based on information available, September 1995

Region	Percentage of children immunized by 12 months of age				HBV 3	Percentage of pregnant women immunized
	BCG	DPT 3	POLIO 3	Measles*		
African	69	53	54	54	0.11	38
American	91	81	84	82	0	40
Eastern Mediterranean	82	74	75	76	31	48
European	85	79	88	82	9	23
South East Asian	95	91	91	85	3	77
Western Pacific	93	91	92	88	2	22
Global	87	80	82	78	6	48

* Coverage data for children up to 2 years are included for countries recommending immunization at, or later than, 12 months. Boosters included.

+ Global TT2+ and Regional TT2+ coverage are estimated for developing countries only.

12-Sep-95

Table 1.1.2: Global and regional estimates of immunization coverage by developing and industrialized countries.

DEVELOPING COUNTRIES	1994 POPULATION (millions)	1994 NEWBORNS (millions)	1994 SURVIVING INFANTS (millions)	Denominator for BCG coverage	PERCENT IMMUNIZED

(1) All countries except Canada and USA

(2) Bosnia, Croatia, Israel, The Former Yugoslav Republic of Macedonia, Malta, Slovenia, Turkey and Yugoslavia

(3) All countries except Australia, New Zealand and Japan.

Global TT2+ and Regional IT2+ coverage are estimated for developing countries only.

Regional and global BCG coverage is included for countries which recommend BCG immunization ROUTINELY for infants under once year of age.

Estimated immunization coverage with BCG, DPT, poliomyelitis, measles, Hepatitis B and tetanus vaccines
based on data available as of September 1995

Country	Surviving infants (millions)	Cumulative percentage of surviving infants in developing countries	Immunization coverage (%)							Pregnant women TT 2+

^a 2 doses only

Measles immunization given at, or later than, 12 months and up to 2 years of age.

** DT only

Regional BCG coverage estimated only for countries which recommend BCG immunization ROUTINELY for infants under one year of age.

Blank indicates no information available. Coverage is regarded as zero when no data are available.

(b) 2 doses only.

China's data have been based on cluster sampling surveys of infants 12-23 months in 30 provinces and Municipalities. Results of the surveys have been weighted in proportion to the size of the surveyed population and represent the best data currently available for the estimation of national coverage levels. Hence, exceptionally, these data are presented here.

(c) Nationwide surveys included in regional coverage estimates, based on table 1.2.6
