PHYSICAL TRAINING
(Provisional Agenda item 8.11.4)

The first World Health Assembly having emphasized the importance of physical training, the Secretariat has been investigating the means whereby the organization of physical training can be established on a reliable scientific basis. It has made every effort to collect information from appropriate sources, especially from governments and the competent Non Governmental Organizations. But the documentation collected to date is not such as to enable a programme of action sufficiently thorough to be proposed to the Assembly.

Accordingly the following resolution is proposed to the Assembly:

The Health Assembly:

DECIDES that the Secretariat shall proceed with its work in this field with a view to submitting the anticipated programme to the third World Health Assembly.

PHYSICAL TRAINING
(Provisional Agenda item 8.11.4)

The First World Health Assembly emphasized the importance of physical training and the Director-General has been investigating the means whereby this factor in the improvement of public health may be assisted on a basis of reliable information. Every effort has been made to collect such information from appropriate sources, especially from governments and competent non-governmental organizations. However, the documentation collected to date would not make possible the preparation of a programme of action of such as could be suggested to the Assembly.

Therefore, the Assembly may wish to adopt the following resolution:

The Second World Health Assembly:

REQUESTS the Director-General to proceed with the collection of information on physical training with a view to submitting a programme to the Third World Health Assembly.
