PREAMBLE

Essential medicines are those that satisfy the priority healthcare needs of majority of the population. The essential medicines list needs to be country specific addressing the disease burden of the nation and the commonly used medicines at primary, secondary and tertiary healthcare levels. The medicines in National List of Essential Medicines (NLEM) should be available at affordable costs and with assured quality. The medicines used in the various national health programmes, emerging and reemerging infections should be addressed in the list. The Government of India, Ministry of Health & Family Welfare (MOHFW) is mandated to ensure the quality healthcare system by assuring availability of safe and efficacious medicines for its population.

The primary purpose of NLEM is to promote rational use of medicines considering the three important aspects i.e. cost, safety and efficacy. Furthermore it promotes prescription by generic names. Healthcare delivery institutions, health insurance bodies, standards setting institutions for medicines, medicine price control bodies, health economists and other healthcare stakeholders will be immensely benefitted in framing their policies.

The NLEM 2011 has been prepared after several rounds of wide consultations with experts of different disciplines from different parts of the country and from various organizations.

The NLEM is a dynamic document and feedback from all stakeholders is welcome which will help in its revision at regular basis.

The core committee of NLEM 2011 would like to place on record its appreciation for the subject experts who made a significant contribution in revision and updating the list of essential medicines of India.

EXECUTIVE SUMMARY

The National list of essential medicines is one of the key instruments in balanced healthcare delivery system of a country which *inter alia* includes accessible, affordable quality medicine at all the primary, secondary, tertiary levels of healthcare. Realizing this GOI, MOHFW decided to have its own essential medicines list. The first National List of Essential Medicines of India was prepared and released in 1996. This list was subsequently revised in 2003.

To address the issues of changing disease prevalence, treatment modalities, introduction of newer medicines and identification of unacceptable risk-benefit profile as well as therapeutic profile of some medicines, the GOI, MOHFW considered the need for updating the NLEM.

Revision of NLEM was also based on the two important national reference documents i.e., Indian Pharmacopeia 2010 and National Formulary of India, 4th Edition, 2010. While the former deals with the standards of identity, purity and strength of medicines the later provides the information on rational use of medicines particularly for healthcare professionals.

In order to revise the NLEM 2003, a core committee was constituted vide order no: 12-01/ Essential Medicines/ 08-DC dated 6th July 2010 GOI, MOHFW with following members.

- Prof. Y. K. Gupta, Head, Department of Pharmacology, All India Institute of Medical Sciences, New Delhi
- Prof. S.K. Sharma, Head, Department of Medicine, All India Institute of Medical Sciences, New Delhi
- Dr. T.S. Sidhu, Medical Superintendent, Dr. Ram Manohar Lohia Hospital, New Delhi
- Dr. A. K. Harit (Chief Medical Officer) representing DDG (M), Dte. GHS, Ministry of Health & Family Welfare, New Delhi
- Dr. D. Kanungo, Addl. DG (Stores) Dte. GHS, Ministry of Health & Family Welfare, New Delhi
- Dr. Chander Shekhar, Scientist F, Indian Council of Medical Research, New Delhi
- Dr. Sukarma S. Tanwar, National AIDS Control Organization, New Delhi
- Mr. V. K. Tyagi, Deputy Industrial Advisor, Department of Pharmaceuticals, Ministry of Chemicals and Fertilizers, New Delhi

- Dr. G. N. Singh, Secretary-cum-Scientific Director, Indian Pharmacopoeia Commission, Ghaziabad
- Dr. Surinder Singh, Drugs Controller General (India), Dte.GHS, Ministry of Health & Family Welfare, New Delhi

The first meeting of the core committee of NLEM was held at CDSCO on July 22, 2010. The meeting was initiated by DCGI, Dr. Surinder Singh, Dr. Y. K. Gupta, Professor & Head, Department of Pharmacology, AIIMS, New Delhi was unanimously nominated as chairman of the Committee.

During this meeting the core committee was informed that the CDSCO had already taken an initiative in this direction and organized a workshop entitled “Expert Group Meeting on Revision and Updating of the National List of Essential Medicines” on September 16, 2009 in collaboration with Department of Pharmacology, AIIMS and WHO India Office. The workshop was attended by representatives from the following: CDSCO, Ministry of Health; WHO; All India Institute of Medical Sciences, New Delhi; Indian Pharmacopoeia Commission; Indian Council of Medical Research and experts of different disciplines from leading medical and pharmacy institutions of the country.

The issue of updating NLEM was also deliberated in a dedicated session during the Annual Conference of Indian Pharmacological Society, December 2009 at

Kolkata and the session was chaired by Prof. Y K Gupta, AIIMS and Dr. K Weerasuriya, WHO-SEARO. The core committee took note of the proceedings of these two meetings while revising the NLEM.

In this core committee meeting it was deliberated that although WHO has prepared an updated list of “Essential Medicines”, it cannot be adopted as such. The NLEM of India should be country specific considering the disease prevalence, cost effectiveness of Medicines etc in the country.

In the meeting the criteria for inclusion/ deletion of medicines were developed and a road map for the revision and updating of NLEM, 2003 was drawn.

Sh. V. K. Tyagi from Department of Pharmaceuticals (DoP), Ministry of Chemicals & Fertilizers emphasized the importance of NLEM in view of the directions of the Hon’ble Supreme Court of India. He also mentioned that DoP may rely on the NLEM prepared by MOH &FW for price fixation.

During the meeting it was felt that opinion/views may be taken from across the country by organizing brainstorming regional workshops. However, considering the logistics and time constraints it was decided that a National consultation meet should be organized in Delhi inviting experts from various specialties and from different parts of the country.

Accordingly “National Consultation Meet for Revision of National List of Essential Medicines” was organized by Department of Pharmacology, AIIMS & Central Drugs Standard Control Organization (CDSCO), Ministry of Health and Family Welfare on December 3-4, 2010. The meet was supported by WHO India office. Experts from different disciplines from medical and pharmaceutical institutes, hospitals from across the country and concerned government agencies participated. After initial briefing, four groups were formed according to therapeutic areas. The groups were asked to specifically give the reasons/evidence which guided their decision regarding addition/deletion/alteration. Subsequently the recommendations of the individual groups were discussed in the open house. Thereafter the draft recommendations of the Workshop were prepared with general consensus.

The recommendations of the Workshop were further deliberated upon by the Expert Core Committee on 4th Jan 2011 and 31st Jan 2011 at CDSCO. The revised NLEM 2011 has thus been prepared.

The Expert Core Committee recommended that all the medicines which are being provided under various National Health Programmes are considered as essential medicines.

Salient features of NLEM 2011:

The medicines have been categorized according to therapeutic area. Therefore it is possible that a medicine with more than one indication appears in more than one category.

The issue of mentioning the strength of the medicine dose was deliberated. The committee took the considered view that the strength should be mentioned in the NLEM.

For essentiality of requirement the medicines have been categorized as follows:

- P, S and T denote essentiality at Primary, Secondary and Tertiary levels respectively while P, S, T (U in NLEM 2003) indicates essentiality at all the levels.

A total of 348 medicines (excluding repetitions) are present in NLEM 2011. In the NLEM 2011, 181 medicines fall under the category of P, S and T, 106 medicines fall under the category of S, T while 61 medicines are categorized as T only. In comparison to NLEM 2003, number of medicines deleted is 47 and 43 medicines have been added.

The meetings/deliberations of core committee/ National consultation meetings held for preparing the National List of Essential Medicines 2011

Core Committee Meetings

1. The first meeting was held at CDSCO, FDA Bhawan on July 22, 2010
2. The second meeting was held at CDSCO, FDA Bhawan on January 4, 2011
3. The third meeting was held at CDSCO , FDA Bhawan on 31st Jan,2011

National Consultation Meetings

1. The first consultation meet was held on September 16, 2009 at Department of Pharmacology, AIIMS, New Delhi
2. The second National consultation meet was held on December 3-4, 2010 at Department of Pharmacology, AIIMS, New Delhi

Other Deliberations:

1. A dedicated session on National Essential Medicine List was organized during 42nd Annual conference of Indian Pharmacological Society, on 11th December, 2009 at Swabhumi, Kolkata

POTENTIAL USES OF NLEM

The concept of essential medicines, first introduced by WHO in 1977, has now been adopted by many countries, non-governmental organizations and international non-profit supply agencies. The list is considered to include the most cost-effective medicines for a particular indication. It is developed in concordance with the standard treatment guidelines keeping in mind the healthcare needs of the majority of the population. Careful selection of a limited range of essential medicines results in a higher quality of care, better management of medicines and more cost-effective use of health resources.

The list of essential medicines guides the hospital drug policies, procurement and supply of medicines in public sector, medicine cost reimbursement and medicine donations. It helps in monitoring the pricing of medicines. The list serves as a reference document for correct dosage form and strength for prescribing. Preference is given to single drug formulations as opposed to fixed dose combinations where appropriate. Hence use of NLEM is expected to improve prescribing practices as well as the health outcomes. The appropriate use of medicines selected in the NLEM promotes rational use of medicines. Such rational use of medicines, especially antimicrobial drugs, reduces development of drug resistance. The list also serves as a reference for assessing the healthcare access of the populace. Lastly, NEML serves as a tool for public education and training of healthcare providers.
