This publication was developed by Management Sciences for Health's Center for Pharmaceutical Management, Arlington, Virginia. The *Guide* is updated annually. The explanatory notes are in English, French, and Spanish and the products and prices are in English. Comments and questions should be e-mailed to cpm@msh.org.

Note: All rights reserved. Published by Management Sciences for Health (MSH) on its own behalf and for the World Health Organization (WHO). MSH and WHO have made every effort to ensure the accuracy of price, supplier, procurement agency and other information presented in this publication. However, the reader's attention is drawn to the introduction, which describes the specific sources and limitations of information provided in this publication.

The reader's attention is also drawn to the importance of quality assurance for pharmaceutical products. Licensing authorities in the respective countries of manufacture are responsible for the review and approval of the detailed composition and formulation when authorizing a pharmaceutical product to be marketed, including the specifications of its ingredients, as submitted by the manufacturer of the dosage form, and to oversee compliance with Good Manufacturing Practice requirements as recommended by WHO.

MSH and WHO do not warrant that the products mentioned are in accordance with the national laws and regulations of any country, including but not limited to patent laws. It is recommended that readers intending to use this publication familiarize themselves with issues such as quality, safety and efficacy as well as quantification, patents, financial stability and standing of the supplier, ability to supply the required quantities, delivery time, and other related aspects.

This publication does not constitute an endorsement or warranty of the fitness of any product for a particular purpose. This publication is not based on an active assessment of, and does not therefore constitute an acceptance or recommendation in regard to, any product's quality, safety, or efficacy.

This list may not be used by manufacturers and suppliers for commercial or promotional purposes. The mention of specific companies and certain of their products does not imply that they are recommended by MSH and WHO in preference to others of a similar nature that are not mentioned. Errors or omissions excepted, the names of proprietary products are distinguished by initial capital letters.

Bearing in mind that the data and information provided for a product depend largely on the supplier or procurement agency, these data and information are being provided as is, and MSH and WHO make no representations or warranties, either express or implied, as to their accuracy, completeness, or fitness for a particular purpose. MSH and WHO accept no responsibility or liability for the reliance on, or use of, such data and information.

Nota: Todos los derechos reservados. Publicado por Management Sciences for Health (MSH) por cuenta propia y para la Organización Mundial de la Salud (OMS). MSH y la OMS han realizado todos los esfuerzos necesarios para asegurar la exactitud de los precios, proveedores, agencias de adquisiciones y otra información presentada en esta publicación. Sin embargo, se llama la atención del lector a la introducción que describe las fuentes específicas y las limitaciones de la información proporcionada en esta publicación.

También se llama la atención del lector a la importancia del aseguramiento de la calidad para los productos farmacéuticos. Las autoridades responsables de otorgar licencias en los respectivos países de fabricación son responsables de la revisión y aprobación de la composición y formulación detallada al autorizar un producto farmacéutico para su comercialización, incluyendo las especificaciones de los ingredientes, de acuerdo con la información suministrada por el fabricante, así como de supervisar el cumplimiento con los requisitos de las Buenas Prácticas de Fabricación recomendadas por la OMS.

MSH y la OMS no garantizan que los productos mencionados están de acuerdo con las leyes y regulaciones nacionales de ningún país, incluyendo pero no limitándose a las leyes de patentes. Se recomienda que los lectores que tengan la intención de utilizar esta publicación se familiaricen con los aspectos relativos a la calidad, seguridad y eficacia así como la cuantificación, los patentes, la estabilidad financiera y la situación del proveedor, su habilidad para suministrar las cantidades requeridas, el tiempo de entrega y otros aspectos relacionados.

Esta publicación no constituye un respaldo o garantía con respecto a la idoneidad de cualquier producto para un fin en particular. Esta publicación no está basada en una evaluación activa y por lo tanto no constituye una aceptación o recomendación con respecto a la calidad, seguridad o eficacia de cualquier producto.

Esta lista no puede ser utilizada por los fabricantes y proveedores para fines comerciales o promocionales. La mención de empresas específicas así como ciertos de sus productos no implica que estos están recomendados por MSH y la OMS con preferencia sobre otros productos de naturaleza similar que no hubieran sido mencionados. Salvo por errores u omisiones, los nombres de los productos comerciales se distinguen con una letra mayúscula inicial.

Teniendo en mente que los datos y la información dados para un producto dependen en gran medida del proveedor o de la agencia de adquisiciones, estos datos e información se suministran tal cuál están, y MSH y la OMS no realizan ninguna declaración o garantía, ya sea expresa o implícita con respecto a la exactitud, integridad o idoneidad para un propósito en particular. MSH y la OMS no aceptan responsabilidad alguna por la confianza depositada o el uso de dichos datos e información.

Note: Tous droits réservés. Publié par Management Sciences for Health (MSH) pour son propre compte et pour l'Organisation mondiale de la Santé (OMS). MSH et l'OMS ont cherché dans la mesure du possible à vérifier l'exactitude des données sur les prix, les fournisseurs, les organismes d'achat et des autres informations présentées dans cette publication. Le lecteur n'en est pas moins prié de se rapporter à l'introduction qui décrit les sources spécifiques et les limitations de l'information donnée dans cette publication.

Le lecteur doit également prêter attention à l'importance de l'assurance de qualité pour les produits pharmaceutiques. Les organismes chargés de la délivrance des autorisations dans les pays respectifs des fabricants sont responsables de l'examen et de l'approbation de la composition et formulation détaillées avant d'autoriser la mise sur le marché d'un produit donnée, notamment des spécifications des composants, tel qu'indiqué par le fabricant dans la présentation et doivent par ailleurs s'assurer que sont observées les Bonnes pratiques de fabrication recommandées par l'OMS.

MSH et l'OMS ne garantissent pas que les produits mentionnés soient conformes aux lois et réglementations nationales d'un pays donné, notamment les lois relatives aux brevets. On recommande au lecteur qui souhaite utiliser cette publication de se mettre au courant des divers aspects tels que la qualité, l'innocuité et l'efficacité ainsi que la quantifications, brevets, situation financière et réputation du fournisseur ainsi que sa capacité à fournir les quantités demandées dans les bons délais.

La présente publication ne constitue pas une approbation ou recommandation de l'efficacité d'un produit dans un but précis. Cette publication ne se fonde pas sur une évaluation active et ne constitue donc pas une acceptation ou recommandation de la qualité, innocuité ou efficacité d'un produit.

Cette liste ne peut pas être utilisée par des fabricants ou fournisseurs à des fins commerciales ou promotionnelles. Si certaines sociétés ou certains produits sont mentionnés, cela ne veut nullement dire qu'ils sont recommandés par MSH et l'OMS de préférence à d'autres de nature analogue qui ne sont pas recommandés. Sauf erreur ou omission, les marques déposées sont indiquées par des initiales en majuscule.

Sachant que les données et informations fournies sur un produit dépendent largement du fournisseur ou de l'organisme chargé des achats, lesdites informations sont donc données telles quelles, sans que MSH et l'OMS ne fassent aucune recommandation ou garantie, explicite ou implicite, quant à leur exactitude, intégralité ou adéquation dans tel but donné. MSH et l'OMS n'acceptent aucune responsabilité concernant la fiabilité ou l'utilisation des dites données et informations.

INTERNATIONAL DRUG PRICE INDICATOR GUIDE

Preface

The *International Drug Price Indicator Guide* provides what the name implies—an indication of drug prices on the international market. This *Guide* has been published by MSH since 1986, and in collaboration with WHO since 2000. It provides a spectrum of prices from nonprofit drug suppliers and commercial procurement agencies, based on their current catalogs or price lists. It also contains prices obtained from international development agencies and from government agencies.

MSH, in collaboration with WHO, is working with partners to make existing drug price information more widely available in order to improve procurement of medicines of assured quality for the lowest possible price. This will contribute to equitable access to health services and commodities, including essential medicines, that are necessary for the prevention and treatment of prevalent diseases.

Because the potential cost of providing a full range of treatments for common diseases is high, prices and financing are inescapable factors in determining access to essential medicines. Lower prices can be obtained through bulk purchasing, competition, skillful negotiation, and sound supply management. Comparative price information is important for getting the best price. Such information helps in price negotiations, in locating new supply sources, and in assessing the efficiency of local procurement systems.

The *International Drug Price Indicator Guide* helps supply officers determine the probable cost of pharmaceutical products for their programs. It can be used as a reference list to compare current prices paid to prices for products available on the international market; it can also be used to assess the potential financial impact of changes to a drug list.

The database of prices is maintained by the Center for Pharmaceutical Management of Management Sciences for Health, a nonprofit organization, as a contribution towards making essential medicines available to all the world's citizens. The *Guide* may be copied for in-service education or other nonprofit use.

Additional information on international drug prices can be found on the Web at:

- “Medicines Price Information” (<http://www.who.int/medicines/areas/access/ecofin/en/index.html>), a page maintained by WHO. It includes prices of international price information services on starting materials, finished products, and selected HIV-related medicines. In addition, it reports on disease-specific price information and individual country price information services.

Please note that an electronic version of the *International Drug Price Indicator Guide* can be found on MSH's Electronic Resource Center at <http://erc.msh.org/priceguide>.

How to Use the *Guide*

The *Guide* begins with “Information You Should Know” to better understand the data presented here. A list of the suppliers and buyers in this edition follows that section and includes details on shipping terms and restrictions. Supplier and buyer addresses appear next. After that, the *Guide* explains the format of the comparative price information reports, as well as the terms used on the price listings and the codes and abbreviations used.

The price data are provided in three formats in this *Guide*. Each format includes supplier prices and buyer prices. The buyer prices are usually government agency international competitive bidding (or tender) prices.

- List I: The products are in alphabetical order by generic name, and the list includes the price details for each supplier and buyer. This format is intended for procurement reference and allows a quick search for a particular medicine.
- List II: The products are in alphabetical order within the WHO Essential Medicines List (EML) classification system. This format assists with, for example, formulary development and allows a convenient comparison of medicines within classes. Items in a class cannot necessarily directly substitute for each other.
- List III: The products are in alphabetical order with only the median price for an item displayed. This format is meant to facilitate comparison of a user’s prices with *Guide* prices. The supplier and buyer prices appear on separate lists.

If you need information on how to use these prices for comparison purposes, please see the section called “How to Analyze and Compare Your Prices.” A list of synonyms and the WHO therapeutic class categories are included in the Annexes for reference.

This *Guide* is intended as a comparative reference only; it is not suitable for actually ordering products. To place orders, the vendor must be contacted directly. No guarantees are implied as to availability of prices listed, quality of products, or specific sales conditions. The vendors included are not intended to be a comprehensive list of potential suppliers. Prices from buyers are listed for comparison purposes only.

Information You Should Know

Products Included

The *International Drug Price Indicator Guide* primarily focuses on essential medicines, but includes other products as well. Medicines from the WHO Essential Medicines Lists are always included, as are medicines and products important for the treatment or prevention of tuberculosis, malaria, and HIV / AIDS. Vaccines, immunologic agents, disinfectants, fluids and electrolytes, and diagnostic tests and agents are also typically covered. Increasingly, medicines required for cancer treatment and chronic disease care, and strengths and dosage forms required for pediatric care are being added to the database. New products are added to the *Guide* each year, as the information reported to us changes.

Price Conversion

Prices in the *International Drug Price Indicator Guide* are listed in ascending order according to unit price. All prices for the organizations listed below have been converted to U.S. dollars (USD). The exchange rates used are for 1 July 2013 (<http://www.oanda.com>). Other catalogue prices were listed originally in U.S. dollars and were not converted.

Currency (Organization Code)	Exchange Rate (to USD)
Barbados dollar (BDS)	0.4922
Bolivian boliviano (BOLIVIA)	0.1437
Botswana pula (BOTSWANA)	0.1160
British pound (DURBIN)	1.5208
Dominican Republic pesos (DOMREPUB)	0.0239
Euro (IDA, MEDEOR/EU)	1.3007
Kenya shilling (MEDS)	0.0114
Namibian dollar (NAMIBIA)	0.1011
Peruvian nuevo sol (PERU)	0.3506
South African rand (SAFRICA)	0.1233
Sudanese pound (SUDANNHIF)	0.2265
Tanzanian shilling (MEDEOR/TZ, MEMS)	0.0006
Ugandan shilling (JMS)	0.0004

Changes in exchange rates can cause costs to vary widely. The most current rate at the time of your analysis should always be used when calculating drug costs.

Price Terms

The supplier prices and buyer prices in this *Guide* are based on different price terms, and so must not be directly compared. The following incoterms are used to define the price types:

- CIF (cost, insurance, and freight): includes insurance and transport charges up to the port of destination (sea shipments only)

- DDP (delivered duty paid): includes delivery and import duties and unloading costs
- DDU (delivered duty unpaid): includes delivery, but not import duties or unloading costs
- EXW (ex works): does not include loading, insurance, or freight
- FCA (free carrier): includes transport and insurance until the goods are delivered to the carrier
- FOB (free on board): the price of goods at the point of shipment, but does not include the cost of insurance and freight (transportation)

Some suppliers and agencies charge a standard handling fee. The handling fees shown in the List of Price Sources have been added to the prices listed in this *Guide*.

Calculating Prices

When calculating and projecting real costs, it is important to consider factors such as financing, delivery times, modes of transportation (air/sea/inland), and handling charges. An analysis of these factors is beyond the scope and intent of this *Guide*. However, it is reasonable, for estimation purposes, to add 10% for shipping costs to the listed price for suppliers in this *Guide*. The buyer (government agency tender) prices listed generally do not require adjustment for shipping charges.

Quality Assurance

We require all suppliers included in the *International Drug Price Indicator Guide* to complete a quality assurance questionnaire. The purpose of the mandatory questionnaire is to help ensure that the prices listed in this *Guide* are from reputable suppliers with established quality assurance processes in place. The 28 questions address issues including inspection, testing, quality assurance, licensing, recalls, quality control procedures, standards, and documentation. Although this requirement provides some assurance of quality control processes, it does not necessarily guarantee the quality of the products listed. Copies of the questionnaire can be obtained from MSH on request.

The price sources included in the *Guide* have been screened only through the completeness of the documents they have provided. This screening in no way constitutes an in-depth review of product quality. Inclusion in the *Guide* does not constitute pre-qualification or approval of any sort by MSH and WHO.

Product Quality

The suppliers and agencies selected for this *Guide* are not manufacturers, but they offer products that are stated to be in compliance with international quality standards specified by organizations such as the United States Pharmacopeia (USP), the British Pharmacopoeia (BP), and the European Pharmacopoeia (EP). All suppliers in this guide state that the manufacturing plants with which they work maintain high quality standards by having in place on-site quality assurance systems in order to ensure that all products are complying with WHO Good Manufacturing Practices (GMP) and with government regulations. Quality certificates in line with the

WHO Certification Scheme on the Quality of Pharmaceutical Products Moving in International Commerce should be available from all of these suppliers on request. Suppliers and agencies listed in the *Guide* maintain their own independent quality assurance programs. Contact them directly for these details.

ATC/DDD System¹

Drug utilization data have a central role in the quality of care cycle and are essential to the management of policy related to drug supply, pricing, cost, and use. The anatomical therapeutic chemical (ATC) and defined daily dose (DDD) methodologies for classification and measurement can be helpful in following and comparing cost trends, but need to be used with caution. Basing detailed reimbursement, therapeutic group reference pricing, and other specific pricing decisions on the ATC and DDD assignments is a misuse of the system.

The purpose of the ATC/DDD system is to serve as a tool for drug utilization research in order to improve drug use practices. One component of this is the presentation and comparison of drug consumption statistics at international and other levels.

A major aim of the WHO Collaborating Centre for Drug Statistics Methodology and Working Group is to maintain stable ATC codes and DDDs over time to allow trends in drug consumption to be studied without the complication of frequent changes to the system. There is a strong reluctance to make changes to classifications or DDDs when such changes are requested for reasons not directly related to drug consumption studies. For this reason the ATC/DDD system by itself is not suitable for guiding decisions about reimbursement, pricing, and therapeutic substitution.

The classification of a substance in the ATC/DDD system is not a recommendation for use, nor does it imply any judgments about efficacy or relative efficacy of drugs and groups of drugs.

¹Text in this section is adapted from the WHO Collaborating Centre for Drug Statistics Methodology website (<http://www.whocc.no/atcddd/>).

List of Price Sources

Three primary types of suppliers and buyers are included in the *Guide*.

1. **Suppliers** who maintain a warehouse and supply items directly to customers. All of these suppliers provide a wider range of products than shown in this *Guide*. For a complete list of products, contact the vendor directly. The following suppliers are included in the *Guide*:

Supplier	Code	Date of List	Handling Fee	Price Type	Details
Action Medeor	MEDEOR/ EU	2013	1%	EXW Tönisvorst	Prices are effective until publication of revised price list. Transport costs are charged individually according to expenses. Special packaging in cases costs Euro 26 per case. Minimum handling fee is Euro 50. Only serves non-profit organizations.
Action Medeor International Healthcare	MEDEOR/ TZ	March 2013	0%	EXW	Action Medeor International Healthcare is a not-for profit procurement agency founded in 2004 and owned by Action Medeor. It supplies the not-for-profit market (primarily in Tanzania) and does not supply to individuals or commercial pharmacies. A 3.5% service charge applies for all non-Tanzanian customers to cover bank charges and currency loss. No minimum quantities are required.
Amstelfarma	AMSTEL-FARM	September 2013	0%	EXW Lelystad, The Netherlands	Amstelfarma prices are given as an indication only. There are no minimum orders required or service charges.
Durbin PLC	DURBIN	2013-2014	0%	EXW United Kingdom	Durbin supplies pharmaceuticals and medical supplies to doctors, pharmacies, hospitals, pharmaceutical wholesalers and traders, military and government agencies, charities and other relief organisations worldwide. Minimum order UK £100.

Supplier	Code	Date of List	Handling Fee	Price Type	Details
IDA Foundation	IDA	September 2013	1.5%	FCA Amsterdam	Since 1972, the IDA Foundation has been committed to improving access to and delivering high-quality essential medicines and medical supplies to low- and medium-income countries. As an independent and self-supporting foundation, IDA distributes more than 3,000 products to over 100 countries worldwide. Minimum order of US\$5000. Orders under Euro 5,000 are charged a handling fee of 3%. Orders over Euro 5,000 are charged a handling fee of 1.5%. Prices are indicative and may change.
IMRES	IMRES	July 2013	0%	FCA Lelystad, The Netherlands	Minimum order quantity is US\$1250.
Joint Medical Stores	JMS	July 2013	0%	EXW Kampala	JMS supplies pharmaceuticals and medical supplies to mission health units and other NGOs in Uganda and does not export products. JMS operates on a not-for-profit basis, and price terms are cash-and-carry only. Prices are indicative.
Medical Export Group	MEG	September 2013	0%	FCA Gorinchem, The Netherlands	Prices are given as an indication only. There are no minimum orders required or service charges.
Medical Stores Department, Tanzania	MSD/TANZ	2012-2013	0%	EXW	MSD sales prices are valid for all governmental health facilities, approved NGOs, mission hospitals, charitable hospitals and other health care providers in Tanzania, with approval from Ministry of Health & Social Welfare. Parastatal companies/organizations will pay 10% on top of these sales prices.
Mission for Essential Drugs and Supplies	MEDS	July 2013	0%	FOB Nairobi	MEDS supplies drugs and medical supplies to nonprofit health care providers. Freight charges are added for deliveries outside of Kenya.
Missionpharma	MISSION	December 2013	0%	EXW Lyngø	Prices are given as an indication only. There are no minimum orders required or service charges.

2. **International development organizations** that provide commodities to country programs they and others support. The organizations listed in the *Guide* are:

International Development Organization	Code	Date of List	Handling Fee	Price Type	Details
Global TB Drug Facility	GDF	October 2013	0%	EXW Supplier Factory	<p>The Global Drug Facility (GDF) is a mechanism to expand access to, and availability of, high-quality anti-TB drugs to facilitate global expansion and maintenance of DOTS, the internationally recommended strategy to control tuberculosis. Drugs are supplied through free grants, but are also available for purchase by governments and organizations wishing to take advantage of the quality, prices, and technical support offered through the GDF Direct Procurement Service. GDF performs compulsory independent testing of each batch of drugs it supplies and pre-shipment inspection of each order it delivers to confirm high quality.</p> <p>To facilitate the efficient delivery of products, GDF uses procurement agents. Prices include the cost of the product as well as quality control costs and a GDF procurement agent fee. Costs for pre-shipment inspection, transport (air freight or sea freight) and insurance, are not included in the listed product prices. GDF sends a team of TB and drug management experts to the country four months after drugs arrive, to assess drug usage and provide any needed technical assistance. GDF does not charge for its technical assistance to countries.</p>
Supply Chain Management System	SCMS	August 2013	5%	EXW (SCMS regional distribution center or directly from the supplier)	<p>The Supply Chain Management System project delivers essential lifesaving medicines to HIV/AIDS programs around the world. The project helps strengthen existing supply chains or establishes new ones to ensure a safe, secure, reliable and sustainable supply chain management system to procure pharmaceuticals and other products for people with HIV/AIDS and related infections. SCMS is funded by the US government as part of the President's Emergency Plan for AIDS Relief (PEPFAR). The SCMS project can work anywhere in the world, but is initially focused on the 15 PEPFAR focus countries. In addition to serving any project or implementing partner supported by PEPFAR, SCMS can also supply projects supported by national governments and other donors, subject to individual arrangements.</p>

International Development Organization	Code	Date of List	Handling Fee	Price Type	Details
UNICEF	UNICEF	February 2014	8%	FCA	As well as supporting UNICEF's ongoing programmatic activities, the UNICEF Supply function provides rapid supply response to emergencies. UNICEF also procures and supplies essential commodities on behalf of governments and other partners in their efforts. These procurement services can also include in-country logistics, capacity building, and project management. UNICEF prices are given as an indication only.
UN Population Fund	UNFPA	2013	5.13%	FOB	UNFPA conducts annual tenders to purchase goods for their field offices and on behalf of external clients in more than 168 countries, mainly in the developing world. UNFPA serves only governments and nonprofit organizations. UNFPA charges a 5% administration fee and a 0.132% insurance fee to non-UNFPA buyers. There is a minimum order requirement of US\$5,000 per item.
U.S. Agency for International Development Central Contraceptive Procurement Project	USAID /CCP	2013	5.5%	EXW	The USAID CCP Project, established in 1990, serves as the central procurement mechanism for USAID Missions to purchase high quality contraceptives, condoms, and other essential public health supplies. The USAID CCP Project (Central Contraceptive Procurement) also administers the Commodity Fund, which serves to increase condom availability and use by making condoms for HIV prevention free of charge to nonfocus programs. Since 2006, CCP also has provided other essential public health pharmaceuticals, diagnostics, and medical equipment at the request of USAID Missions. A handling fee is applied to each order and this is based on the type of commodity procured. In addition to procurement services, the USAID Commodities Security and Logistics Division also provides technical assistance to USAID Missions and host country organizations to improve the performance of local supply chains, to strengthen local systems and institutions, and to increase the availability of essential public health supplies.

3. **Buyers** (usually public-sector agencies) that procure commodities through international competitive bidding, or tenders. These are actual prices obtained by the organizations listed and are included for comparison purposes. It is not possible for a reader to place an order with any of these organizations.

Format of the Price Lists

The pharmaceutical products are presented in three separate lists, with different formats and features, but certain elements are common to all.

- List I: Products Sorted Alphabetically
- List II: Products Sorted by Therapeutic Category
- List III: Price Comparison Form

A detailed description of the information included in each list follows.

List I - Products Sorted Alphabetically

List I is intended for procurement reference and lists drugs in alphabetical order by generic name to allow a quick search for a particular drug. This list shows the pack size(s) available from each source and the pack price in U.S. dollars, including the source's standard service charges where applicable.

Item Description

The item description includes the generic name, strength, dosage form, and the route of administration. If the product has two widely used names (for example, vitamin C and ascorbic acid), one name will appear in brackets. See the List of Synonyms in the Annex.

IC

Products under international narcotics control are identified with (IC) next to the description.

Nomenclature

International nonproprietary names (INNs) have been used for the list of drugs in this *Guide*. If an INN has not been assigned, the most common generic name has been used. Drug dosage forms listed are generally those included in the World Health Organization's 18th Model List of Essential Medicines (revised April and October 2013), found at <http://www.who.int/medicines>.

Route of Administration

Routes of administration are coded as follows:

Item Type	Code
Condoms	COND
Diagnostic Strips and Tests and Lab Supplies	DIAG
Ear Preparations	OTIC
Eye Preparations	OPHT
Injectable Medicines	INJ
Intrauterine Device (IUD)	IUD
Intravenous Solutions	IV
Medicines for Inhalation	INH
Medicines for Nasal and Throat Use	N/T
Subcutaneous Medicines	S/C
Sublingual Tablets	SL
Suppositories/Enemas/Rectal Ointment	RECT
Tablets/Capsules/Oral Liquids	PO
Topical Medicines (liquids, powders, creams, ointments)	TOP
Vaginal Preparations	VAG
Not Applicable	N/A

Source

The list of price sources can be found on page E-9.

Package

Package sizes are provided by the suppliers and buyers.

Package Price (US\$)

Package prices are provided by the suppliers and buyers and have been converted to U.S. dollars at the exchange rates listed on page E-6 to facilitate comparison. If a supplier charges a standard handling fee percentage, that percentage has been added to the package price listed.

Unit Price (US\$)

The unit price is calculated by dividing the package price by the package size. This format facilitates the price comparison of different vendor pack sizes. The unit used to compare prices varies with the type of pharmaceutical preparation as follows:

Pharmaceutical Dosage Form	Comparison Unit (Code)
Ampoule or Vial	Milliliter (ML)
Cartridge	Milliliter (ML)
Condom, Intrauterine Device (IUD), Net, Test	Each (EACH)
Ear, Nose, and Throat Preparation	Milliliter (ML)
Enema	Milliliter (ML)
Gas	Cubic Meter (CUBMETER)
Granules	Gram (G)
Inhaler	Dose (DOSE)
Oral Liquid	Milliliter (ML)
Pack	Pack (PACK)
Pessary	Pessary (PESS)
Suppository	Suppository (SUPP)
Syringe	Syringe (SYRINGE)
Tablet or Capsule	Tablet or Capsule (TAB-CAP)
Topical Liquid	Milliliter (ML)
Topical Solid	Gram (G)
Treatment	Treatment (TREATMEN)
Vaccine	Dose (DOSE)
Vial (single strength)	Vial (VIAL)

DDD

The DDD is the assumed average maintenance dose per day for a drug used for its main indication in adults. The defined daily dose is a unit of measurement and does not necessarily reflect the recommended or prescribed daily dose. Doses for individual patients and patient groups will often differ from the DDD and will necessarily be based on individual characteristics (e.g.,

age and weight) and pharmacokinetic considerations.

Drug consumption data presented in DDDs give only a rough estimate of consumption and not an exact picture of actual use. DDDs provide a fixed unit of measurement independent of price and formulation, enabling the researcher to assess trends in drug consumption and to perform comparisons between population groups.

The defined daily doses are from the WHO Collaborating Centre for Drug Statistics Methodology. They are illustrative defined daily doses, as recommended by the World Health Organization's Drug Utilization Research Group (DURG). Not all drugs listed in this price comparison guide have defined daily doses assigned by this method. A DDD will only be assigned for drugs that already have an ATC code.

The main use of the DDD is for estimating drug consumption, based on inventory/distribution data. This estimate can be combined with price information for budgeting purposes.

Note: The defined daily dose should not be used for dosing or therapeutic determinations. Refer to prescribing information for dosing schedules for specific indications.

WHO EML

The "WHO EML" column indicates whether the product is included on the 2013 WHO Model List of Essential Medicines. We identify five categories in the *International Drug Price Indicator Guide*:

- E = On the WHO core list in the same dosage form and strength
- C = On the WHO complementary list in the same dosage form and strength
- P = On the WHO list, but in a different presentation (different dosage form and/or strength)
- T = Not on the WHO list, but can be an alternative for an item listed as a therapeutic group example
- N = Not on the WHO model list

ATC Code

The ATC code is the anatomical therapeutic chemical classification code assigned by the WHO Collaborating Centre for Drug Statistics Methodology. The purpose of the ATC/DDD system is to serve as a tool for drug utilization research in order to improve drug use practices. One component of this is the presentation and comparison of drug consumption statistics at international and other levels.

In the ATC classification system, the drugs are divided into different groups according to the organ or system on which they act and their chemical, pharmacological, and therapeutic properties. Drugs are classified in groups at five different levels. The drugs are divided into 14 main groups (1st level), with one pharmacological/therapeutic subgroup (2nd level). The 3rd and 4th levels are chemical/pharmacological/therapeutic subgroups, and the 5th level is the chemical substance.²

² Adapted from the WHO Collaborating Centre for Drug Statistics Methodology website at <http://www.whocc.no/atcddd/>.

Median Price

When using the *Guide* for comparison with local prices, or for estimating the total value of a proposed procurement list, an average price can be helpful. There are basically two kinds of average prices that could be used: the mean price and the median price. The mean price is the simple average of all prices shown for a drug; the values are added up and divided by the number of values.

However, there is a problem when one or two prices are much higher or lower than the rest for a certain drug. These “outliers” skew the mean and make it less representative. For example, in a series of seven values such as \$1, \$2, \$2, \$3, \$5, \$16, \$20, the total of all the values is \$49, and dividing by seven gives a mean value of \$7. For comparison or estimation purposes, it is likely that this average is too high, due to the two prices that are much higher than others in the series. To avoid this risk, we use the median price.

The median price is a type of average; it is the value that splits a series of values in half when the series is put in ascending order. This is likely to be a more valuable approach for estimating actual future prices (or for comparing with local prices) when there is a skewed distribution.

If there is an odd number of values in the series, as in the example above, the median value is the middle value in the series (\$3 in the example). When there is an even number of values in a series, such as the series \$1, \$3, \$4, \$6, \$14, \$20, the median is calculated by averaging the two middle values. In this example, the median is the average of \$4 and \$6, which is \$5. Again, this is likely to be closer to reality for comparison or estimation than the arithmetic mean of \$8 (\$48 divided by 6).³

High/Low Ratio

The high/low ratio compares the highest unit price with the lowest unit price. For example, a high/low ratio of 3 means that the highest unit price is three times greater than the lowest unit price.

³ For further discussion, see *Statistics without Tears—A Primer for Non-Mathematicians*, by Derek Rowntree (New York: Charles Scribner's Sons, 1981), pp. 41–45.

List II - Products Sorted by Therapeutic Category

For List II, the pharmaceuticals are listed in alphabetical order within each therapeutic class based on the WHO Essential Medicines List classification system. For products not included on the latest WHO EML (i.e., those products with an “N” in the “WHO EML” column in this Guide), we have assigned a therapeutic class based on the WHO EML classification system. This is done when a non-EML product clearly falls within an EML therapeutic category, as determined by MSH staff.

This assignment does not reflect a decision by WHO Essential Drugs and Medicines Policy or MSH staff that the non-EML product is appropriate for inclusion in the WHO Model List of Essential Medicines. If an unambiguous assignment of an EML therapeutic category was not possible, we placed the product in the category of “UA – Agents Unclassified in WHO EML.”

Items in a class cannot necessarily directly substitute for each other. All prices on this list are unit prices. For each item in this list, the following data are shown:

Item Description

The item description includes the generic name, strength, dosage form, and the route of administration. If the product has two widely used names (for example, vitamin C and ascorbic acid), one name will appear in brackets. See the List of Synonyms in the Annex.

List III - Price Comparison Form

The purpose of this list is to help the user compare his or her prices with the prices in the *Guide*. Only the median price is displayed here, and a shortened description of the item is used.

Item Description

The item description includes the generic name, strength, dosage form, and the route of administration. If the product has two widely used names (for example, vitamin C and ascorbic acid), one name will appear in brackets. See the List of Synonyms in the Annex.

IC

Nomenclature

International nonproprietary names have been used as the basis for the list of drugs in this *Guide*. If an INN has not been assigned, the most common generic name has been used. Drug dosage forms listed are generally those included in the World Health Organization's 18th Model List of Essential Medicines (revised April and October 2013), found at <http://www.who.int/medicines>.

WHO EML

The "WHO EML" column indicates whether the product is included on the 2013 WHO Model List of Essential Medicines. We identify five categories in the *International Drug Price Indicator Guide*:

- E = On the WHO core list in the same dosage form and strength
- C = On the WHO complementary list in the same dosage form and strength
- P = On the WHO list but in a different presentation (different dosage form and/or strength)
- T = Not on the WHO list, but can be an alternative for an item listed as a therapeutic group example
- N = Not on the WHO model list

Pack Size

The blank here is for the user to enter his or her purchase pack size.

Pack Price

This blank is for the user to enter the price for the purchase pack entered in the previous blank.

Unit Price

The user should calculate his or her unit price by dividing the pack price by the pack size. The comparison units used in the *Guide* are listed for each item to help ensure that prices are being compared on an equivalent basis.

Median Int. Supplier/Buyer Unit Price (US\$)

The unit price is calculated by dividing the package price by the package size. This format facilitates the price comparison of different vendor pack sizes. The unit used to compare prices varies with the type of pharmaceutical preparation as follows:

Pharmaceutical Dosage Form	Comparison Unit
Ampoule or Vial	Milliliter (ML)
Cartridge	Milliliter (ML)
Condom, Intrauterine Device (IUD), Net, Test	Each (EACH)
Ear, Nose, and Throat Preparation	Milliliter (ML)
Enema	Milliliter (ML)
Gas	Cubic Meter (CUBMETER)
Granules	Gram (G)
Inhaler	Dose (DOSE)
Oral Liquid	Milliliter (ML)
Pack	Pack (PACK)
Pessary	Pessary (PESS)
Suppository	Suppository (SUPP)
Syringe	Syringe (SYRINGE)
Tablet or Capsule	Tablet or Capsule (TAB-CAP)
Topical Liquid	Milliliter (ML)
Topical Solid	Gram (G)
Treatment	Treatment (TREATMEN)
Vaccine	Dose (DOSE)
Vial (single strength)	Vial (VIAL)

The median price is a type of average; it is whatever value splits a series of values in half when the series is put in ascending order. If there is an odd number of values in the series, the median value is the middle value in the series. This is likely to be more valuable for estimating actual future prices (or comparing with local prices), when there is a skewed distribution.

When there is an even number of values in a series, such as the series \$1, \$3, \$4, \$6, \$14, \$20, the median is calculated by averaging the two middle values. In this example, the median is the average of \$4 and \$6, which is \$5. Again, this is likely to be closer to reality for comparison or estimation than the arithmetic mean of \$8 (\$48 divided by 6).⁵

How to Analyze and Compare Your Prices

Comparison of prices that you have paid with international prices is one of the most fundamental indicators for assessing procurement efficiency. Other key indicators of procurement efficiency are the accuracy of needs estimation, timeliness of deliveries, and quality of products procured.

With the assistance of this *Guide*, it is possible for procurement personnel to compare the prices they pay with international reference prices (refer to the Price Comparison Form, SP-1 and BP-1). The method below presents one approach to making such comparisons. You may wish to visit the electronic version of the *International Drug Price Indicator Guide* in the Electronic Resource Center at <http://erc.msh.org/priceguide>. It contains features to help you compare your prices to those in the *Guide* and plan a budget or tender.

1. Make a list of products that you routinely procure in large volumes or that represent a high percentage of the budget.
2. For each product, list the vendor pack size used and the most recent price for this vendor pack size. Be sure to note whether the price is CIF (cost, insurance, and freight); FOB (free on board: transportation as far as the port of departure); EXW (ex-works: no transportation included); or another type of price. Prices may need to be adjusted so that they can be compared accurately.
3. Choose one of the two price comparison forms included in the *Guide*, based on the type of prices you are comparing. The buyer prices include shipping costs, and may be most appropriate if they represent a region of the world and tender value similar to yours. The supplier prices are FOB and EXW and must be adjusted to reflect the usual shipping, handling, and insurance charges for your situation.
4. On one of the price comparison forms, select the product in this *Guide* that corresponds most closely to your product. If the prices you are using locally are CIF prices and you have selected the buyer comparison form, no adjustment should be needed for either set of prices.

If the prices you are using locally are CIF prices and you have selected the supplier comparison form, we suggest that the prices on the supplier list be adjusted upward to reflect the difference between CIF and EXW/FOB. When prices on this list are FOB or EXW, it is reasonable to add 10% to the list price for freight and insurance, depending on the distance and the mode of transport. Any standard percentage charged for handling has already been added to the prices on this list.

When significant fluctuations in exchange rates occur, price adjustments must be made to reflect these changes.

5. Once the pack prices have been adjusted to reflect freight, insurance, and other additional costs, divide the pack price by the number of comparison units contained in the vendor pack (for example, divide the pack price by 1,000 if that pack is a bottle of 1,000 tablets, or by 100 if the pack is a vial of 100 ml). Make sure that the comparison unit used is the same as the comparison unit on the *Guide* list. The median international unit price is listed on both price comparison forms for your convenience.

Because packaging can add considerably to the cost of a product, caution is needed when comparing unit prices between different packages. For example, the unit price with strip packaging is usually much higher than the unit price for tablets packaged in a bottle of 1,000. Prices in the *Guide* do not cover specialty packaging, except where noted.

An analysis of this type includes many assumptions that affect its outcome. International price comparisons identify extreme price differences, both high and low. An extremely high ratio between locally available prices and the prices in this *Guide* may indicate that a less expensive source is available. If the locally available prices are much lower than the prices in this *Guide*, it might reflect effective procurement, but it could also be the result of a compromise of quality control, differences in packaging, or other factors that might reduce product quality. These comparisons are only indicators, and should be viewed as pointers for further investigation.

About Management Sciences for Health

Management Sciences for Health (MSH) is an international nonprofit organization, dedicated to closing the gap between what is known about the overwhelming public health challenges facing many nations and what is done to address those challenges.

Since 1971, MSH has worked in more than 140 countries with policymakers, health professionals, and health care consumers to improve the quality, availability, and affordability of health services. We work with governments, donors, nongovernmental organizations, and health agencies to respond to priority health problems such as HIV & AIDS, tuberculosis, malaria, maternal-child health, and reproductive health. Our publications and electronic products augment our assistance in these technical areas.

MSH's staff of more than 2,400 from over 70 nations work in its Medford, Massachusetts, headquarters; offices in the Washington, DC, area; and more than 35 country offices. Through technical assistance, research, training, and systems development, MSH is committed to making a lasting difference in global health.

About the MSH Center for Pharmaceutical Management

MSH has more than 30 years of experience in establishing, managing, and evaluating pharmaceutical sector activities in developing countries. In 1983, the MSH Drug Management Program (DMP) was established in recognition of the key role that pharmaceuticals play in delivering high-quality health care in developing countries.

In 2001, the DMP was restructured as the Center for Pharmaceutical Management (CPM). The center, building on the work of the DMP, remains committed to providing high-quality technical assistance and training in pharmaceutical management worldwide.

The key to MSH's success in providing technical assistance in pharmaceutical management is our proven ability to work closely with both senior- and operations-level personnel in developing countries, while maintaining strong working relationships with the many international agencies and donors sponsoring our work. These donors include USAID, WHO, PAHO, UNICEF, Danida, the World Bank, and foundations such as the Bill & Melinda Gates Foundation and the Rockefeller Foundation.

CPM has nearly 700 staff members working out of its primary office in the Washington, D.C., area and other locations worldwide, together with a roster of more than 50 expert consultants, who are available as required. For more information on CPM, please contact:

International Drug Price Indicator Guide

MSH's *International Drug Price Indicator Guide* provides an indication of drug prices on the international market. Updated annually, this *Guide* contains a spectrum of prices from drug suppliers and procurement agencies based on their current price lists. It also contains prices obtained from international development organizations and government agencies. Comparative price information is important for getting the best price, and this is an essential reference for anyone involved in the procurement of pharmaceuticals.

The 2013 edition of the *International Drug Price Indicator Guide* was produced in collaboration with the World Health Organization.

The *Guide* is also available on MSH's Electronic Resource Center at <http://erc.msh.org/priceguide>.

"As a health economist working on drug policy issues, I find the MSH International Drug Price Indicator Guide invaluable..."

— Research Fellow, London School of Hygiene & Tropical Medicine

"This Guide has become an indispensable tool in our efforts here to promote rational drug use."

— Physician, National Drug Information Center, College of Medicine, the Philippines

Managing Drug Supply:

Managing Access to Medicines and other Health Technologies

Third Edition

Working with authors from around the world, MSH has revised its seminal publication on global pharmaceutical management. Its 52 updated chapters provide an overview and specific suggestions for effectively managing pharmaceutical systems. The publication includes six new chapters on pharmacovigilance, traditional medicines, intellectual property, and other cutting-edge topics. *MDS-3* is available on CD-ROM and online at www.msh.org.
