

→ **WASH and Health Working Together - a 'how to' guide  
for NTD programmes**

# **Situation analysis executive summary template**

# Situation analysis executive summary template

\*NB: include all relevant tables, graphs and maps where appropriate

## Purpose

Outline the purpose/objectives for the situation analysis (e.g. to support the development of an integrated/coordinated disease control programme)

## Methods

- Describe the methods used for the analysis, such as document reviews, consultation workshops, interviews and field visits
- Outline the constituencies of stakeholders involved in the analysis (government, NGO, specific sectors etc.)
- Outline the key areas and topics of investigation
- Set out how the findings will be used

## Key findings

- Data: Demographic, disease and WASH information
- Current challenges for WASH-NTDs integration and collaboration: Who are the primary and key implementation actors? What are the key coordination overlaps, synergies and gaps? Based on the available mapping exercises, where are the priority intervention areas?
- Behaviour change tools and approaches, Media channels, Advocacy
- Are there aspects on which information/formative research is still required?
- Key issues underpinning disease prevalence and programming in the country:

Theme	Key problem/challenge to address
Behaviour	<ul style="list-style-type: none"><li>▶ (e.g. poor hygiene practices – lack of handwashing with soap, lack of face washing, lack of shoe wearing)</li><li>▶ (e.g. bathing, swimming and laundry in surface water)</li></ul>

Theme	Key problem/challenge to address
<b>Environment</b>	<ul style="list-style-type: none"> <li>▶ (e.g. Lack of access to and use of toilets; Vector breeding near/in poorly managed water sources; Poor maintenance of sanitation facilities)</li> </ul>
<b>Social inclusion</b>	<ul style="list-style-type: none"> <li>▶ (e.g. Stigma-related exclusion from water sources (e.g. for people affected by certain NTDs))</li> </ul>
<b>Treatment and care</b>	<ul style="list-style-type: none"> <li>▶ (e.g. lack of reliable water supply in healthcare facilities providing surgical interventions; lack of water for self-care)</li> </ul>

## Key opportunities

- Technical/programmatic (e.g. features of existing or planned programmes that enable integration/coordination; opportunities for new approaches and innovation)
- Financial (opportunities to increase domestic or external funding, improve financial management, any health or WASH system strengthening initiatives for improving absorptive capacity and spending)
- Coordination (forthcoming policy or strategy reviews, new coordination initiatives, existing coordination structures that can be further strengthened or utilised)
