Quarterly Member States Briefing PRSEAH (Q1, 2024)

Dr Gaya Gamhewage
Director, Prevention & response to Sexual Misconduct
Office of the Director-General

11 March, 2024
Please note that this event adheres to the Code of Conduct to prevent harassment, including sexual harassment, at WHO Events.
High level recommendations from annual PRS Review Conference, 2023

1. Accelerate institutional change
   - Build on existing good practices, be more joined up across all humanitarian and development actors
   - Acknowledge and promote the power of strong, positive and joyful leadership
   - Address SH and culture change as a matter of priority across agencies
   - Prioritize and resource prevention & response in high-risk settings including but not limited to health emergencies

2. Improve VSCA
   - Radically review the support we offer victims and survivors
   - Broaden our perspective on survivors aligning with the UN Victims Rights statement, including acknowledging their agency and strengths and empowering them to advocate for themselves
   - Work through local organizations and deploy social scientists to better identify and address needs for at-risk populations and victims/survivors (Side meeting recommendation)

3. Meaningfully engage stakeholders
   - Accelerate the involvement of Member states/government entities where development & humanitarian agencies are operating
   - Engage civil society thought the SM safeguarding cycle and not just for victim support
   - Use existing research and contribute to developing the evidence base as required for this area of work
Feedback from Member States
PBAC & EB January 2024

Acknowledgement of progress
1. TYS, PRS Accountability Framework, Policy reform
2. Year 1 implementation
3. Transparency & accountability
4. MS engagement, communication
5. Work with UN and partners
6. The PRS review conference
7. Risk assessments
8. Support to victims/survivors

Advise to strengthen
1. Culture change
2. Targeted and sustained training & awareness raising and address behaviour change
3. VSCA and support
4. End2End process, especially post investigation phase
5. Integrate all forms of abusive conduct not just SM
1. Implementation of Member State accountability in accordance with the WHO accountability framework for the prevention of and response to sexual misconduct.

2. Ways in which PRSEAH can be funded in health emergencies, so that a minimum set of actions can be taken at the outset of such a response to safeguard against sexual misconduct.

✔ Both recommendations approved. Secretariat requested to develop proposals for both
Follow up on PBAC/EB decisions

1. Member States/health sector roles, responsibilities, accountabilities

   a. Document review
   b. Consultation with UN and IASC partners (integrate into broader on-going system-wide efforts to engage governments, CAPSEAH, etc)
   c. Multi-stakeholder consultations
      i. Quarterly member states briefings (Q2 and Q3)
      ii. Webinar – Geneva Missions & PRSEAH experts
      iii. Online consultation (web-based feedback on zero draft)
      iv. Bilateral consultations during field missions
      v. Crowdsourcing ideas from experts, partners, CSOs etc
   d. Proposal to be submitted to PBAC 2025 (Daft ready by October 2024)
PSEA Clause for Inclusion in UNSDCF

Final draft for endorsement

Protection from Sexual Exploitation and Abuse (PSEA) is a key priority for the UNCT [insert name], with a special focus on prioritizing victims’ rights and creating an environment in which Sexual Exploitation and Abuse (SEA) does not occur. The UNCT and its partners will pursue all appropriate means to ensure the effective protection of the local population, particularly women and children, from sexual exploitation and abuse. SEA is unacceptable behavior and is prohibited for UN personnel and UN implementing partners.

In delivering on the obligations articulated in the present Cooperation Framework, the UNCT and the government of [insert name] reaffirm their commitment to, and will take collective action on, PSEA, by strengthening internal structures, reinforcing accountability measures, and establishing effective organizational capacities to prevent and respond to reports of SEA in connection with its personnel involved in common/joint projects. This entails (i) adhering to common values on PSEA (ii) taking preventive measures against sexual exploitation or sexual abuse, (iii) investigating allegations, and (iv) taking appropriate corrective action when incidents occur, including providing support to victims in accordance with a victim-centred approach.

Next Steps

• The memo on the PSEA clause in the UNSDCF was signed and sent to OLA (22nd February).

• The OLA review is expected to take 3-4 weeks. The HLSG is expected to take place in the beginning of April.

• The UN Technical Working aims to have the agreed clause, and the finalized framework document, for review and endorsement by the HLSG.

• WHO and UNICEF will soon hold consultations with member states to obtain feedback on the development and planned roll out of a PSEA Government Cooperation framework – an interagency initiative to streamline UN engagement with governments and bolster capacity on PSEA.
Follow up on PBAC/EB decisions

2. Funding mechanisms for PRS work in health emergency and humanitarian response

1. Document review
2. Consultation with UN and IASC partners
3. Internal WHO consultation (EXT, WHE, Polio, FMN)
4. Consultation with Geneva Donor group on PSEAH
5. Bilateral and group discussions with donors
6. Proposal to be submitted to PBAC 2025 (Daft ready by October 2024)
5 Shifts for 2024

1. Risk assessment & mitigation (RAM)
2. Manage risk by IPs
3. Work with CSOs
4. Map Victim/survivor services
5. Closer work with UN/IASC
6. Three-level visits

Policy implementation & monitoring
Focus on countries: 15 priority countries
Greater support for Regional and country level leadership
Safeguarding: Implementing partners & member states
Generating & using evidence

- Balancing operations with institutional change
- Accelerated learning
New developments

1. Online tools for
   - Risk assessment
   - Year 2 monitoring

2. Expanding #NoExcuse campaign
   Include all forms of abusive conduct

3. New Evaluations/Reviews
   JIU
   OSCEA

4. Stronger safeguarding measures to technical programmes
New technical work planned in 2024 - 1

Technical consultation on **evidence for PRS** work – April
- Agree on framework for generating, retrieving and analyzing evidence across the sexual misconduct safeguarding cycle
- Scope out an evidence review exercise
- Identify research gaps
- Plan of action
- Global goods

- **Quantitative & qualitative data**
- **Published and grey literature**
- **Prevalence**
- **Drivers**
- **Organizational and culture change**
- **Behaviour change**
- **Policy implementation**
- From a multitude of sectors and not just extrapolated from GBV, PRSEAH or peacekeeping
New technical work planned in 2024 -2

Technical consultation on engaging Civil society across the safeguarding cycle
- Take a true VSCA approach
- Leverage those who have the best connection and context for safeguarding from SM
- Consult WHO’s CSO network, and networks of networks
- Enable evidence-informed actions
- Enhanced sustainability and community ownership
- More efficient use of resources
