

Joint Task Force on Reform of the Global Health Architecture

Bibliography

As of 9 August 2026

This bibliography has been compiled to support the work of the Joint Task Force on Global Health Architecture (GHA) Reform. It provides academic publications, policy papers, and commentaries relevant to the Joint Process. Entries are organized by each of the three objectives of the joint process source (i.e. peer-reviewed literature vs. other sources) and publication date.

The bibliography focuses primarily on literature published during the past 36 months, a period that has witnessed substantive shifts in the global health architecture itself, the context in which it is evolving and the broader discourse on its reform.

Within each category, **three to four publications are highlighted in bold**. These represent the publications that: (1) are most frequently cited or referenced, based on an AI-assisted review of available citation indicators and references in academic literature, policy papers, commentaries, blogs, and media sources, and (2) cover the broadest scope in the context of the Joint Process and its objectives.

This bibliography will be maintained as a living resource for the Task Force, updated regularly as new publications become available and made publicly accessible.

1. Essential Global Health Functions and Agency Mandates & Capacities

A. Peer-Reviewed Literature

Ren M, Hao Y, Wang M, Liang X, Wang X, Li Q, Wang Y, Qi X, Wang X, Zhou X, Huang Y. Reforming WHO to strengthen its role in the global health architecture. *Glob Health J*. 2026. doi:10.1016/j.glohj.2026.06.001.
