# WORLD HEALTH ORGANIZATION 

## Human resources: annual report, 2000

## Report by the Secretariat

1. The first human resources annual report, ${ }^{1}$ submitted to the Fifty-third World Health Assembly, provided Member States with an overview of the Organization's staffing profile. It contained data on the overall staffing situation by source of funds, location and grade, distribution of staff by sex, geographical representation, and age profile.
2. This second annual report includes, in response to requests from Member States and others, the following additional information: distribution of the workforce across the main occupational groups, turnover statistics, data on external recruitment and internal reassignments, and information on national professional officers.
3. The reference date of 31 December 2000 ensures congruence with data submitted to the Health Assembly in the context of the Proposed programme budget 2002-2003 and financial reports.

## STAFFING PROFILE

## Appointment categories

4. At 31 December 2000 WHO had a total of 3486 staff members on fixed-term appointments of one to five years or career service appointments (referred to hereafter as "long-term appointments"). ${ }^{2}$ Of these, $1293(37.09 \%)$ were in the professional category, 2065 ( $59.24 \%$ ) in the general services and $128(3.67 \%)$ in the national professional officer category. Since 1994 there has been a moratorium on career service appointments, which are held currently by $5.6 \%$ of the professional workforce and $11.9 \%$ of the general service staff.
5. In addition to staff holding long-term appointments, 8547 short-term contracts were granted by the Organization during the year 2000, including consultants, professional and general service staff, and national professional officers.
6. The number of staff members holding long-term appointments has decreased by 600 over the past three bienniums and continues to decrease.

[^0]7. The tables and figures appearing in the document and the following summary analyses relate to staff holding long-term appointments (unless otherwise specified).

## Gender distribution

8. The percentage of women in the professional category has increased from just over $21.83 \%$ in 1990 to nearly $31.86 \%$ as at end 2000 . The proportion varies from $23.2 \%$ in the African Region to $42.9 \%$ in the Region of the Americas. Of the 164 appointments made during 200067 (38.93\%) were women. Of the 3486 staff members (see paragraph 4) 1828 are men and 1658 are women.

## Geographical representation

9. As of December 2000, 106 countries were within their desirable ranges, 24 were overrepresented, 15 under-represented and 46 (including two Associate Members) unrepresented.
10. Since the last report to the Health Assembly on geographical representation ${ }^{1}$ there have been 164 appointments to the professional category of which 58 or $35.36 \%$ were nationals of unrepresented or under-represented countries. Six countries previously adequately represented are now overrepresented (Egypt, India, Indonesia, Kenya, New Zealand and Zimbabwe), whereas two countries that were formerly adequately represented (South Africa and Sweden) are now under-represented, and three are unrepresented (Cape Verde, Grenada, Sao Tome and Principe). Three countries that were unrepresented are now adequately represented (Andorra, Namibia and Romania). Three countries (Côte d'Ivoire, Denmark and Sri Lanka) are at the upper limit of their range.

## Age, length of service and turnover of staff

11. More than half the professional workforce is aged 50 years or more; in the general service category, the largest concentration of staff are in their 40 s (this is also the case for the national professional officers).
12. At any time, the largest single group of the staff (29.9\%) has less than five years service. However, half of those who remain beyond the initial five-year period (50.34\%) stay with the Organization for 10 years or more. The average length of service is 11.5 years.
13. Data are included on staff appointments, which shows that $53.6 \%$ of professionals were recruited externally, $39.6 \%$ were existing short-term staff, and $6.7 \%$ were reassigned through interagency transfer. Almost $58 \%$ of all appointments took place in headquarters and in the African Region.
14. Nearly $13 \%$ of the current professional workforce and $6.3 \%$ of the general service staff are due to retire within the next three years.

## Occupational groups

15. Almost half the posts held by professional staff are in the category "Dental, nutrition, medical, nursing and veterinary specialists". Within this group, $90.8 \%$ are medical specialists and $2.9 \%$ are nurses. Over one-quarter of professional posts are administrative. In some areas, incumbents may have

[^1]other relevant professional profiles, for example, a doctor or a nurse may hold a senior administrative post.

## TABLES AND FIGURES

16. The tables and figures referred to in paragraph 7 are listed below for ease of reference:

TABLE 13. DISTRIBUTION OF POSTS ACROSS MAIN OCCUPATIONAL GROUPS ${ }^{1}$

[^3]
[^0]:    ${ }^{1}$ Document A53/23.
    ${ }^{2}$ This figure excludes staff from PAHO and IARC.

[^1]:    ${ }^{1}$ Document A53/INF.DOC./3.

[^2]:    * Associate Member

[^3]:    Occupied posts only; refers to the requirements of the job, not the skills of the incumbent.
    Coding follows the Common Classification of Occupational Groups, the occupational reference work of the United Nations system.
