WHA59.2 Application of the International Health Regulations (2005)

The Fifty-ninth World Health Assembly,

Having considered the report on application of the International Health Regulations (2005);¹

Recalling resolutions WHA58.3 on revision of the International Health Regulations and WHA58.5 on strengthening pandemic-influenza preparedness and response;

Reaffirming the serious risk to human health, including the possible emergence of a pandemic virus, arising from ongoing outbreaks in poultry of highly pathogenic avian influenza, caused by the H5N1 strain of Influenzavirus A, in parts of Asia and elsewhere;

Noting with concern the persistence of outbreaks in poultry, the continuing occurrence of sporadic cases of severe human disease associated with these outbreaks, the endemicity of the virus in several countries, the spread of the virus to new areas through the migration of wild waterfowl, and its predicted further spread;

Aware that these and other developments have increased the probability that a pandemic may occur;

Highlighting the importance of WHO’s global influenza preparedness plan and the control measures recommended therein;²

Mindful that rapid detection of human cases, supported by adequate national capacity, and rapid and transparent reporting of findings underpin WHO’s ability to issue a reliable risk assessment and declare an appropriate phase of pandemic alert, and are further needed to ensure that the earliest epidemiological signals of increased transmissibility of the virus among humans are not missed;

Aware that several provisions in the International Health Regulations (2005) would be useful in ensuring a strengthened and coordinated response on the part of the international community to both the present situation and a possible pandemic;

Further aware that strengthened capacity to respond to human cases of avian influenza and the corresponding pandemic threat will strengthen the capacity to respond to many other emerging and epidemic-prone infectious diseases, and thus increase global public-health security against the threat of infectious diseases;

Noting that the International Health Regulations (2005) will not enter into force until 15 June 2007;

Recalling the main conclusions reached, and recommended actions agreed on, at a joint meeting convened by WHO, FAO, OIE and the World Bank on avian influenza and human pandemic influenza (Geneva, 7-9 November 2005);

¹ Document A59/5.
Responding to the specific request made during that meeting to put forward proposals to the Fifty-ninth World Health Assembly through the Executive Board at its 117th session for immediate voluntary compliance with relevant provisions of the International Health Regulations (2005),

1. CALLS UPON Member States to comply immediately, on a voluntary basis, with provisions of the International Health Regulations (2005) considered relevant to the risk posed by avian influenza and pandemic influenza;

2. DECIDES that relevant provisions of the International Health Regulations (2005) shall include the following:

   (1) Annex 2, in so far as it requires prompt notification to WHO of human influenza caused by a new virus subtype;

   (2) Article 4 pertaining to the designation or establishment of a National IHR Focal Point within countries and the designation of WHO IHR Contact Points, and the definition of their functions and responsibilities;

   (3) Articles in Part II pertaining to surveillance, information-sharing, consultation, verification and public health response;

   (4) Articles 23 and 30-32 in Part V pertaining to general provisions for public health measures for travellers on arrival or departure and special provisions for travellers;

   (5) Articles 45 and 46 in Part VIII pertaining to the treatment of personal data and the transport and handling of biological substances, reagents and materials for diagnostic purposes;

3. NOTES that such voluntary compliance is without prejudice to the position of any Member State with regard to the International Health Regulations (2005);

4. URGES Member States:

   (1) to designate or establish immediately a National IHR Focal Point, as provided for in Article 4 of the Regulations, and to inform WHO accordingly within 90 days, the said Focal Point having the authority to communicate official information and to provide support for, and if so decided by the Member State, to participate in, collaborative risk assessment with WHO;

   (2) to follow, in matters pertaining to human cases of avian influenza, mechanisms and procedures set out in the Regulations for a disease that may constitute a public health emergency of international concern;

   (3) to provide transparent and urgent notification and subsequent continued communication to WHO of any probable or confirmed human cases of avian influenza, including exported or imported cases;

   (4) to disseminate to WHO collaborating centres information and relevant biological materials related to highly pathogenic avian influenza and other novel influenza strains in a timely and consistent manner;

   (5) to develop domestic capacity to produce influenza vaccine or to work with neighbouring States to establish regional vaccine-production capacity, in order to promote adequate supplies
of vaccine in the event of a public health emergency of international concern caused by a novel influenza virus;

(6) to strengthen collaboration on human and zoonotic influenzas among national organizations responsible for human and animal health in order to strengthen surveillance and implement immediate measures to control outbreaks of avian influenza in humans and animals;

(7) to respect time frames stipulated in the Regulations for undertaking and completing urgent activities and communications, particularly for the reporting of human cases of avian influenza, verification of events, and response to requests for further information from WHO;

(8) to collaborate, including through the mobilization of financial support, in building, strengthening and maintaining the capacity for influenza surveillance and response in countries affected by avian influenza or pandemic influenza;

(9) to follow recommendations issued by the Director-General, with technical advice from the influenza pandemic task force, considered necessary for the international response to avian influenza or pandemic influenza;

(10) to inform the Director-General of the measures that they have taken in voluntary compliance with the International Health Regulations (2005);

(11) to initiate a process of identifying and addressing the constraints – administrative and legal – for timely implementation of the Regulations with a view to promoting intersectoral participation;

5. REQUESTS the Director-General:

(1) to designate immediately WHO IHR Contact Points, as provided for in Article 4 of the Regulations;

(2) to implement, in so far as feasible and relevant for the purpose of this resolution, measures in Parts II and III of the Regulations falling under the responsibility of WHO;

(3) to further accelerate steps to establish a roster of experts and to invite proposals for its membership, pursuant to Article 47;

(4) to use the influenza pandemic task force as a temporary mechanism until entry into force of the International Health Regulations (2005) in order to advise the Organization on the response to avian influenza, the appropriate phase of pandemic alert and the corresponding recommended response measures, the declaration of an influenza pandemic, and the international response to a pandemic;

(5) to collaborate with Member States in implementation of the present resolution, and in voluntary compliance with the International Health Regulations (2005), as appropriate, including through:

(a) provision or facilitation of technical cooperation and logistical support;

(b) mobilization of international assistance, including financial support, in consultation with Member States, especially for avian influenza or pandemic influenza-affected countries lacking sufficient operational capacity;
(c) production of guidelines as support to Member States in development of capacities for a public-health response specific to the risk posed by avian influenza and pandemic influenza;

(d) reasonable stockpiling of necessary drugs;

(e) facilitation, in collaboration with international partners, of development and commercial production of vaccines against avian influenza and pandemic influenza;

(6) to collaborate with Member States to the extent possible in providing support to developing countries in building and strengthening the capacities required under the International Health Regulations (2005);

(7) immediately to search for solutions to reduce the current global shortage of, and inequitable access to, influenza vaccines, and also to make them more affordable for both epidemics and global pandemics;

(8) to mobilize and dedicate WHO’s technical resources where possible, using capacities available in regional offices and collaborating centres, in order to expand and accelerate training efforts in the areas of epidemic surveillance, alert and response, laboratory capacity including regional networking of laboratories, biosafety, and quality control, in order to provide support to Member States in implementation of the International Health Regulations (2005);

(9) to report to the Sixtieth World Health Assembly through the Executive Board at its 119th session on implementation of this resolution, and to report annually thereafter on progress achieved in providing support to Member States on compliance with, and implementation of, the International Health Regulations (2005).

(Eighth plenary meeting, 26 May 2006 – Committee A, first report)
