

Assessment of new Members and Associate Members: South Sudan

Report by the Secretariat

1. Following admission of South Sudan as a Member State of the United Nations on 14 July 2011, South Sudan became a new Member State of WHO on 27 September 2011.
2. The principle, established in resolution WHA8.5, and confirmed in resolution WHA56.33, is that the latest available United Nations scale of assessments will be used as a basis for determining the scale of assessments to be used by WHO. This assessment rate will be established later in 2012, by the United Nations General Assembly in New York.
3. In January 2013, the Executive Board at its 132nd session will be advised of the proposed assessment rate for South Sudan, which will then be applied retrospectively, pro rata, to the last three months of 2011 (October to December 2011), and to 2012.

ACTION BY THE HEALTH ASSEMBLY

4. The Health Assembly is invited to note this report.
