III. Technical briefings

The following technical briefings will take place during the Sixty-sixth World Health Assembly.

Thursday, 23 May 2013

12:30–14:15

Room XII

Preparing for the UN High-level Meeting on Disability and Development: the health sector's contribution

There will be interpretation in Arabic, Chinese, English, French, Russian and Spanish

It is estimated that 15% of the world population, or 1 billion people, experience disability and the prevalence is growing largely due to population ageing and the increase in noncommunicable diseases. This technical briefing will provide an overview of the current situation for people with disability in terms of their greater unmet health-care needs and poorer levels of health when compared to the general population. It will summarize the role of the health sector in implementing the recommendations of the WHO-World Bank *World report on disability*. The briefing will be an important opportunity for Member States to provide input to the September 2013 UN High-level Meeting on Disability and Development from the health sector perspective.

Friday, 24 May 2013

12:30–14:00

Room XII

Universal Health Coverage: what is it and how can progress be measured?

There will be interpretation in Arabic, Chinese, English, French, Russian and Spanish

Since the two WHA resolutions on universal health coverage (WHA58.33 of 2005 and WHA64.9 of 2011) many countries have sought to modify their health systems to provide universal coverage. An increasing number of governments have sought WHO technical and policy support in this endeavour. In February 2013, WHO and the World Bank jointly hosted a ministerial-level meeting on universal health coverage which included participation from ministries of health, ministries of finance, development partners, and civil society. A clear statement was requested regarding what universal health coverage is, what it is not, the actions countries can take to move closer to universal health coverage, and information on how countries can monitor their own progress. The technical briefing will include a report of the ministerial-level meeting, followed by a discussion of the framework for universal health coverage, and suggestions on how progress can be monitored.
