AGENDA

1. **Opening of the session**

   1.1 Adoption of the agenda and organization of work

      Documents FCTC/COP/4/1 Rev.1 and FCTC/COP/4/1 Rev.1 (annotated)

   1.2 Credentials of participants

      Document FCTC/COP/4/25

2. **Applications for observer status to the Conference of the Parties to the WHO Framework Convention on Tobacco Control**

   Document FCTC/COP/4/2 Rev.1

3. **Invited speaker**

4. **Report of the Convention Secretariat, followed by a general debate**

   Document FCTC/COP/4/3

5. **Treaty instruments and technical matters**

   5.1 Protocol to eliminate illicit trade in tobacco products

      Documents FCTC/COP/4/4, FCTC/COP/4/5, FCTC/COP/4/INF.DOC./1 and FCTC/COP/4/INF.DOC./3

   5.2 Guidelines for implementation of Articles 9 and 10 of the Convention: “Regulation of the contents of tobacco products” and “Regulation of tobacco product disclosures”

      Documents FCTC/COP/4/6 and FCTC/COP/4/INF.DOC./2

   5.3 Guidelines for implementation of Article 12 of the Convention: “Education, communication, training and public awareness”

      Document FCTC/COP/4/7

   5.4 Guidelines for implementation of Article 14 of the Convention: “Demand reduction measures concerning tobacco dependence and cessation”

      Document FCTC/COP/4/8

---

1 Adopted at the first plenary meeting.
5.5 Economically sustainable alternatives to tobacco growing (in relation to Articles 17 and 18 of the Convention): progress report of the working group
   Document FCTC/COP/4/9

5.6 Measures that would contribute to the elimination of cross-border advertising, promotion and sponsorship (in relation to recommendations of the former working group on Article 13 of the Convention)
   Document FCTC/COP/4/10

5.7 Technical report on price and tax policies (in relation to Article 6 of the Convention)
   Document FCTC/COP/4/11

5.8 Control and prevention of smokeless tobacco products and electronic cigarettes
   Document FCTC/COP/4/12

5.9 Implementation of Article 19 of the Convention: “Liability”
   Document FCTC/COP/4/13

5.10 Commercial interests related to the implementation of the WHO FCTC
   Document FCTC/COP/4/Conf.Paper No.1

6. Reporting, implementation assistance and international cooperation

6.1 Reports of the Parties and global progress report on implementation of the Convention
   Documents FCTC/COP/4/14 and FCTC/COP/4/14 Add.1

6.2 Standardization and harmonization of data and data collection initiatives
   Document FCTC/COP/4/15

6.3 Financial resources and mechanisms of assistance
   Document FCTC/COP/4/16

6.4 Cooperation with international organizations and bodies for strengthening implementation of the Convention
   Document FCTC/COP/4/17

6.5 Promoting South–South cooperation for implementation of the Convention
   Document FCTC/COP/4/18

7. Budgetary and institutional matters
AGENDA

7.1 Performance report for the 2008–2009 workplan and budget
Documents FCTC/COP/4/19 and FCTC/COP/4/19 Add.1

7.2 Interim performance report for the 2010–2011 workplan and budget
Documents FCTC/COP/4/20, FCTC/COP/4/20 Add.1, FCTC/COP/4/20 Add.2 and FCTC/COP/4/INF.DOC./5

7.3 Proposed workplan and budget for the financial period 2012–2013
Documents FCTC/COP/4/21 and FCTC/COP/4/INF.DOC./4

7.4 Review of accreditation of nongovernmental organizations
Document FCTC/COP/4/22 Rev.1

7.5 Logo of the WHO Framework Convention on Tobacco Control: report of the Secretariat
Document FCTC/COP/4/23

7.6 Date and venue of the fifth session of the Conference of the Parties
Document FCTC/COP/4/24

7.7 Election of the President and the five Vice-Presidents of the Conference of the Parties

7.8 Review of the role of the Bureau of the Conference of the Parties

7.9 Coordination between WHO’s Tobacco Free Initiative and the Convention Secretariat

7.10 Process related to the renewal of the contract (or otherwise) of the current Head of the Convention Secretariat and to future appointments and renewals

8. **Closure of the session**
LIST OF DOCUMENTS

FCTC/COP/4/1 Rev.2 Agenda
FCTC/COP/4/2 Rev.1 Application for the status of observer to the Conference of the Parties to the WHO Framework Convention on Tobacco Control
FCTC/COP/4/3 Report of the Secretariat on its activities
FCTC/COP/4/4 Report of the Chairperson of the Intergovernmental Negotiating Body on a Protocol on Illicit Trade in Tobacco Products to the fourth session of the Conference of the Parties
FCTC/COP/4/5 Draft protocol to eliminate illicit trade in tobacco products
FCTC/COP/4/6 Rev.1 Draft guidelines for implementation of Articles 9&10 of the WHO Framework Convention on Tobacco Control
FCTC/COP/4/7 Draft guidelines for implementation of Art 12 of the WHO Framework Convention on Tobacco Control
FCTC/COP/4/8 Draft guidelines for the implementation of Article 14 of the WHO Framework Convention on Tobacco Control
FCTC/COP/4/9 Economically sustainable alternatives to tobacco growing (in relation to Articles 17 and 18 of the WHO Framework Convention on Tobacco Control)
FCTC/COP/4/10 Measures that would contribute to the elimination of cross-border advertising, promotion and sponsorship (decision FCTC/COP3(14))
FCTC/COP/4/11 Price and tax policies (in relation to Article 6 of the Convention) Technical report by WHO’s Tobacco Free Initiative
FCTC/COP/4/12 Control and prevention of smokeless tobacco products and electronic cigarettes
FCTC/COP/4/14 Reports of the Parties and global progress in implementation of the Convention: key findings
FCTC/COP/4/14 Add.1 Standardization and harmonization of data and data collection initiatives
FCTC/COP/4/15 Financial resources and mechanisms of assistance
FCTC/COP/4/16 Cooperation with international organizations and bodies for strengthening implementation of the Convention

DECISIONS

FCTC/COP4(1)          Adoption of the agenda and organization of work

The Conference of the Parties,

1. ADOPTS the provisional agenda prepared by the Convention Secretariat, with amendments, as contained in document FCTC/COP/4/1 Rev. 2;

2. AGREES that the Conference of the Parties will, following the practice of the first three sessions of the Conference of the Parties, establish two committees to work in parallel;

3. DECIDES, following the practice of the first three sessions of the Conference of the Parties, and in order to ensure regional representation, that each committee will have a chairperson and two vice-chairpersons as its officers.

(First plenary meeting, 15 November 2010)
FOURTH CONFERENCE OF THE PARTIES

FCTC/COP4(2)  Credentials of the Parties

The Conference of the Parties,

RECOGNIZES the validity of the credentials of the representatives of the following Parties:

Albania, Antigua and Barbuda, Armenia, Australia, Austria, Azerbaijan, Bangladesh, Barbados, Belgium, Benin, Bhutan, Bolivia (Plurinational State of), Brazil, Burkina Faso, Cambodia, Canada, Central African Republic, Chad, China, Colombia, Comoros, Cook Islands, Cyprus, Democratic Republic of the Congo, Denmark, Djibouti, Ecuador, Estonia, European Union, Finland, France, Georgia, Germany, Ghana, Greece, Guatemala, Guinea, Honduras, Hungary, India, Iran (Islamic Republic of), Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kenya, Kuwait, Kyrgyzstan, Lesotho, Liberia, Luxembourg, Madagascar, Malaysia, Maldives, Mali, Malta, Mauritania, Mexico, Micronesia (Federated States of), Mongolia, Montenegro, Namibia, Nepal, Netherlands, New Zealand, Niger, Nigeria, Niue, Norway, Panama, Paraguay, Peru, Philippines, Qatar, Republic of Korea, Republic of Moldova, Russian Federation, Rwanda, Saint Lucia, Samoa, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, Seychelles, Singapore, Slovenia, South Africa, Spain, Sudan, Sweden, Syrian Arab Republic, Thailand, The former Yugoslav Republic of Macedonia, Timor-Leste, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Tuvalu, Uganda, Ukraine, United Arab Emirates, United Kingdom of Great Britain and Northern Ireland, United Republic of Tanzania, Uruguay, Vanuatu, Viet Nam, Yemen and Zambia.

The representatives of the following Parties were entitled to participate provisionally in the session with all rights in the Conference, pending arrival of their formal credentials:

Afghanistan, Burundi, Chile, Congo, Côte d’Ivoire, Croatia, Egypt, Gambia, Guinea-Bissau, Kazakhstan, Lao People’s Democratic Republic, Marshall Islands, Nauru, Nicaragua, Pakistan, Palau, Poland, Sierra Leone, Solomon Islands, Sri Lanka, Swaziland, and Venezuela (Bolivarian Republic of).

(Fourth and Eight plenary meetings, 16 and 18 November 2010)
The Conference of the Parties, in accordance with Rule 31.2 of its Rules of Procedure and decision FCTC/COP2(6),

Having considered the recommendations contained in document FCTC/COP/4/2 Rev.1,

DECIDES:

(1) to grant the status of observer to the Conference of the Parties to the following nongovernmental organizations:
   • the European Network for Smoking and Tobacco Prevention;
   • the International Network of Women Against Tobacco;

(2) to reject the application for observer status submitted by the following nongovernmental organizations:
   • the Global Acetate Manufacturers Association;
   • the Liga Italiana Anti Fumo;
   • the International Tobacco Growers Association;

(3) to defer consideration of the application for observer status of the Human Rights and Tobacco Control Network until such time as the organization has fully established itself and submitted a report on relevant activities conducted internationally that would support its application.

(First plenary meeting, 15 November 2010)
The following officers were elected to Committees A and B:

**Committee A:**  
**Chairperson**  
Dr Nuntavarn Vichit-Vadakan (Thailand)  

**Vice-Chairpersons**  
Mr O.O. Salagaj (Russian Federation)  
Dr J.A. Segnon Agueh (Benin)  

(First meeting of Committee A, 17 November 2010)

**Committee B:**  
**Chairperson**  
Mr Yi Xianliang (China)  

**Vice-Chairpersons**  
Mr R.Y. Ibrahim (Sudan)  
Mr L.L. Viegas (Brazil)  

(First meeting of Committee B, 17 November 2010)
Recalling the preamble of the Constitution of the World Health Organization, which states that the enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being;

Recalling the preamble of the WHO Framework Convention on Tobacco Control (WHO FCTC), which states that the Parties to the Convention are determined to give priority to their right to protect public health, due to the devastating worldwide health, social, economic and environmental consequences of tobacco consumption and exposure to tobacco smoke;

Recognizing that the spread of the tobacco epidemic is a global problem with serious consequences for public health and that scientific evidence has unequivocally established that tobacco consumption and exposure to tobacco smoke cause death, disease and disability affecting all segments of the population in every country in the world, particularly the younger population;

Recognizing that measures to protect public health, including measures implementing the WHO FCTC and its guidelines fall within the power of sovereign States to regulate in the public interest, which includes public health;

Taking into account the fact that Article 5.3 of the WHO FCTC states that: “in setting and implementing their public health policies with respect to tobacco control, Parties shall act to protect these policies from commercial and other vested interests of the tobacco industry in accordance with national law”;

Recalling Article XX (b) of The General Agreement on Tariffs and Trade (GATT 1947) which states that nothing in the agreement shall be construed to prevent the adoption or enforcement by any contracting party of measures necessary to protect human health, subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where the same conditions prevail, or a disguised restriction on international trade;

Recalling Article 2.2 of the Agreement on Technical Barriers to Trade, which states that Members shall ensure that technical regulations are not prepared, adopted or applied with a view to or with the effect of creating unnecessary obstacles to international trade and for this purpose, technical regulations shall not be more trade-restrictive than necessary to fulfil a legitimate objective, such as the protection of human health or safety, taking account of the risks non-fulfilment would create;

Recalling Article 7 of the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS), which states that the protection and enforcement of intellectual property rights should contribute to the promotion of technological innovation and to the transfer and dissemination of technology, to the mutual advantage of producers and users of technological knowledge and in a manner conducive to social and economic welfare and to a balance of rights and obligations;

Recalling Article 8 of the TRIPS Agreement, which states that Members may adopt measures necessary to protect public health provided that such measures are consistent with the provisions of the said Agreement;

Recalling paragraph 4 of the Doha Declaration on the TRIPS Agreement and Public Health which states that: “the TRIPS Agreement does not and should not prevent Members from taking measures to protect public health. Accordingly, while reiterating our commitment to the
TRIPS Agreement, it can and should be interpreted and implemented in a manner supportive of WTO Members’ right to protect public health”;

Recalling also that paragraph 5(a) of the said Declaration recognizes in the light of paragraph 4 that: “while maintaining our commitments in the TRIPS Agreement, we recognize that these flexibilities include, (…) in applying the customary rules of interpretation of public international law, each provision of the TRIPS Agreement shall be read in the light of the object and purpose of the Agreement as expressed, in particular in its objectives and principles”,

The Parties to the WHO Framework Convention on Tobacco Control declare:

1. The firm commitment to prioritize the implementation of health measures designed to control tobacco consumption in their respective jurisdictions.

2. Their concern regarding actions taken by the tobacco industry that seek to subvert and undermine government policies on tobacco control.

3. The need to exchange information on the activities of the tobacco industry, at a national or international level, which interfere with the implementation of public health policies with respect to tobacco control.

4. That in the light of the provisions contained in Articles 7 and 8 of the TRIPS Agreement and in the Doha Declaration, Parties may adopt measures to protect public health, including regulating the exercise of intellectual property rights in accordance with national public health policies, provided that such measures are consistent with the TRIPS Agreement.

5. That Parties have the right to define and implement national public health policies pursuant to compliance with conventions and commitments under WHO, particularly with the WHO FCTC.

6. The need to urge the United Nations Ad Hoc Interagency Task Force on Tobacco Control to support multisectoral and interagency coordination for the strengthening of the implementation of the WHO FCTC within the whole United Nations system.

7. The need to include the topic “challenges to tobacco control” in the agenda of the summit on non-communicable diseases, which will be organized by the United Nations in 2011.

8. The need to urge all countries that have not done so, to ratify the WHO FCTC and implement its provisions and take measures recommended in its guidelines.

(Sixth plenary meeting, 18 November 2010)
FCTC/COP4(6)  Head of the Convention Secretariat

The Conference of the Parties,

Recalling its decision FCTC/COP1(10) on the establishment of a permanent secretariat of the Convention,

DECIDES:

(1) to establish an Evaluation Panel of three representatives from each region, including the six members of the Bureau of the Conference of the Parties elected by the Conference of the Parties at its third session, the six members of the Bureau of the Conference of the Parties elected by the Conference of the Parties at its fourth session, as well as six members to be identified by their respective regional groups, to recommend to the Director-General of WHO whether to renew the term of office of the current Head of the Convention Secretariat;

(2) that the recommendation of the Evaluation Panel shall be based on formal and transparent criteria derived from: Article 24(3) of the WHO Framework Convention on Tobacco Control (WHO FCTC); the job description for the Head of the Convention Secretariat; and the workplans approved by the Conference of the Parties;

(3) that the Evaluation Panel shall provide its recommendation to the Director-General of the World Health Organization no later than 28 February 2011. It shall also provide a report thereon to the Parties of the WHO FCTC by that date;

(4) that the work of the Evaluation Panel shall be conducted within existing budgetary resources of the Convention Secretariat and shall, to the extent possible, employ electronic means of communication in order to reduce costs;

(5) that in the event the term of office of the current Head of the Convention Secretariat is not renewed, a selection shall be made in accordance with decision FCTC/COP1(10);

(6) to request the Bureau, with the support of the Convention Secretariat, to propose for consideration at the fifth session of the Conference of the Parties a process to appoint the Head of the Convention Secretariat, including his or her term of office, and for considering renewal of the term of office, taking into account decision FCTC/COP1(10) and this decision.

(Eighth plenary meeting, 18 November 2010)
The Conference of the Parties,

Taking into account Article 12 (Education, communication, training and public awareness) of the WHO Framework Convention on Tobacco Control (WHO FCTC);

Recalling its decision FCTC/COP2(14) to establish a working group to elaborate guidelines on the implementation of Article 12 of the WHO FCTC and its decision FCTC/COP3(11) requesting the working group to continue its work and to submit draft guidelines to the Conference of the Parties for consideration at its fourth session;

Emphasizing that the aim of these guidelines is to assist Parties to meet their obligations under Article 12 of the WHO FCTC and that they are not intended to increase Parties' obligations under this article,

1. ADOPTS the guidelines for implementation of Article 12 of the WHO FCTC contained in the Annex to this decision;

2. REQUESTS the Convention Secretariat:

   (1) to identify options for development and the financing of an international database in relation to the guidelines for implementation of Article 12 of the WHO FCTC, preferably as part of an overarching database of good practices, instruments and measures to support the implementation of all guidelines adopted by the Conference of the Parties. To ensure synergy and efficiency, such a database would build upon the existing database of Parties’ implementation reports and also take into account other information available from relevant international sources. Support and collaboration should be sought from Parties and competent international organizations, particularly from WHO through its Tobacco Free Initiative and other relevant departments;

   (2) to make available within a specific period of time, preferably within 60 days, via a web site or other appropriate means, international, regional and national resources for tobacco control education, communication, training and public awareness;

   (3) to upload on the web site a resource list of organizations, both governmental and nongovernmental which can assist the Parties in planning and implementing their public education and training efforts;

3. DECIDES to consider at its sixth session whether to initiate a review of these guidelines.
ANNEX

GUIDELINES FOR THE IMPLEMENTATION OF ARTICLE 12 OF THE WHO FRAMEWORK CONVENTION ON TOBACCO CONTROL (EDUCATION, COMMUNICATION, TRAINING AND PUBLIC AWARENESS)

PURPOSE, OBJECTIVES AND PRINCIPLES OF THE GUIDELINES

Purpose

1. The purpose of the guidelines is to assist Parties in meeting their obligations under Article 12 and other related articles of the WHO Framework Convention on Tobacco Control. The guidelines propose measures to increase the effectiveness of education, communication and training efforts that raise public awareness of matters related to tobacco control. The guidelines draw on the available research-based evidence, best practices and experience gained by Parties, to establish a high standard of accountability for treaty compliance and to assist Parties in achieving the highest attainable standard of health through education, communication and training. Parties are also encouraged to implement any necessary measures beyond those required by the Convention and its protocols or suggested in these guidelines, in accordance with Article 2.1 of the Convention.1

Objectives

2. The objectives of the guidelines are:

   (a) to identify key legislative, executive, administrative, fiscal and other measures necessary to successfully educate, communicate with and train people on the health, social, economic and environmental consequences of tobacco production,2 consumption and exposure to tobacco smoke; and

   (b) to guide Parties in establishing an infrastructure that includes the sustainable resources required to support such measures, based on scientific evidence and/or good practice.

Guiding principles

3. The following guiding principles underpin the implementation of Article 12.

   (i) The exercise of fundamental human rights and freedoms. The duty to educate, communicate with and train people to ensure a high level of public awareness of tobacco control, the harms of tobacco production, consumption and exposure to tobacco smoke, and the strategies and practices of the tobacco industry to undermine tobacco control efforts (as embodied in Article 12), derives from the Convention and reflects fundamental human rights and freedoms. These include, but are not limited to the right to life, the right to the highest

---

1 Parties are directed to the WHO Framework Convention on Tobacco Control web site (http://www.who.int/fctc/) where further sources of information on topics covered by these guidelines are maintained.

2 Including growing, manufacturing and marketing.
attainable standard of health and the right to education.\(^1\) The mandate of Article 12 is widely reflected throughout the WHO Framework Convention on Tobacco Control.\(^2\)

(ii) **Protection from threats to fundamental rights and freedoms.** Governments should adopt and implement effective legislative, executive, administrative or other measures to protect individuals from threats to their fundamental rights and freedoms.\(^1,2\)

(iii) **A comprehensive multisectoral approach.** Effective education, communication and public awareness programmes on the harm caused by the use of all tobacco products, including new and alternative products, and the impact these may have on vulnerable groups, as well as the strategies and practices of the tobacco industry to undermine tobacco control efforts, all call for a comprehensive multisectoral approach, as specified in Articles 4.4 and 5.2 of the Convention.

(iv) **Protection of public health policies from the tobacco industry.** The development and implementation of public health policies and programmes should be protected from commercial and other vested interests of the tobacco industry, as embodied in Article 5.3 of the Convention and elaborated in the guidelines on implementing Article 5.3, in particular guiding principle 1.\(^3\)

(v) **Research-based evidence and best practices.** Research-based evidence and best practices with regard to the circumstances in each country are fundamental to the elaboration, management and implementation of education, communication and training programmes aimed at raising public awareness of tobacco-control issues. Where resources permit, such programmes should undergo rigorous pre-testing, monitoring and evaluation at local, national/federal, regional and/or international level, as outlined in Article 20 of the Convention. Where resources do not permit and where evidence is not available in a specific country, evidence collected in and shared by other countries can be a starting-point for programme development, as described in Articles 20 and 22 of the Convention.

---

1 These rights are recognized in many international legal instruments (including Articles 3 and 25 of the Universal Declaration of Human Rights, the Preamble to the Constitution of the World Health Organization, the Convention on the Rights of the Child, the Convention on the Elimination of All Forms of Discrimination against Women, and the International Covenant on Economic, Social and Cultural Rights), are formally incorporated into the Preamble of the WHO Framework Convention on Tobacco Control and are recognized in the constitutions of many countries. The right to education is specified in Article 13 of the International Covenant on Economic, Social and Cultural Rights and the United Nations Economic and Social Council General Comment No. 13 (E/C.12/1999/10).

2 These rights are addressed in following articles of the Framework Convention: Article 2 (Relationship between this Convention and other agreements and legal instruments), Article 3 (Objective), Article 4 (Guiding principles), Article 5 (General obligations), Article 8 (Protection from exposure to tobacco smoke), Article 10 (Regulation of tobacco product disclosures), Article 11 (Packaging and labelling of tobacco products), Article 14 (Demand reduction measures concerning tobacco dependence and cessation), Article 17 (Provision of support for economically viable alternative activities), Article 18 (Protection of the environment and the health of persons), Article 19 (Liability), Article 20 (Research, surveillance and exchange of information), Article 21 (Reporting and exchange of information), and Article 22 (Cooperation in the scientific, technical and legal fields and provision of related expertise).

4 The term “research-based” refers to the use of rigorous, systematic, and objective methodologies to obtain reliable and valid knowledge relevant to education, communication and training activities and programmes. Specifically, such research in this case requires: (a) development of a logical, evidence-based chain of reasoning; (b) methods appropriate to the questions posed; (c) observational or experimental designs and instruments that provide reliable and generalizable findings; (d) data and analysis adequate to support findings; (e) explication of procedures and results clearly and in detail, including specification of the population to which the findings can be generalized; (f) adherence to professional norms of peer review; (g) dissemination of findings to contribute to scientific knowledge; (h) access to data for reanalysis, replication, and the opportunity to build on findings; (i) adherence to research ethics, including an unbiased approach and equipoise; and (j) independence from the commercial and other vested interests of the tobacco industry.
(vi) **International cooperation.** International cooperation and mutual support are fundamental to and necessary for strengthening the capacity of Parties to elaborate, manage and implement education, communication and training programmes, as described in Articles 4.3, 5.5, 20 and 22 of the Convention. Research-based outcomes and best practices should be regularly identified, implemented and shared among Parties.

(vii) **Norm change.** It is essential to change social, environmental and cultural norms and perceptions regarding the acceptability of the consumption of tobacco products, exposure to tobacco smoke, and aspects of the growing, manufacturing, marketing and sale of tobacco and tobacco products.

(viii) **Adequacy of resources.** It is essential to ensure that adequate resources are available to sustain comprehensive, multisectoral tobacco-control education and other awareness-raising programmes, making use, where appropriate, of bilateral and multilateral funding mechanisms as set out in Articles 5.6 and 26 of the Convention.

(ix) **Communication with all people.** It is essential that every person is aware of and has access to accurate and comprehensible information on the adverse health, socioeconomic and environmental consequences of tobacco production, consumption and exposure to tobacco smoke; on the benefits of cessation of tobacco use and of living a tobacco-free life; and a wide range of information on the tobacco industry, as outlined in Articles 4.1 and 12 of the Convention.

(x) **Consideration of key differences.** The consideration of key differences among population groups in relation to gender, age, religion, culture, educational background, socioeconomic status, literacy and disability is of paramount importance in the development and implementation of education, communication and training programmes for tobacco control.

(xi) **Active participation of civil society.** The active participation of and partnership with civil society, as specified in Article 4.7 of the Convention, is essential to the effective implementation of these guidelines.

**PROVIDING AN INFRASTRUCTURE TO RAISE PUBLIC AWARENESS**

**Background**

4. Public awareness of tobacco-control issues is essential to ensure social change. Tools to raise public awareness are important means of bringing about change in the behavioural norms around tobacco consumption and exposure to tobacco smoke. Comprehensive tobacco-control programmes contain research-based tools in education, communication and training – the three pillars of public awareness.

5. Infrastructure to raise public awareness refers to the organizational structures and capacity needed to ensure sustained education, communication and training programmes. It provides the means and resources needed to gather knowledge, translate research results and good practices into useful and understandable messages for individual target groups, communicate the relevant messages, and then monitor the effects of these messages on knowledge, attitude and behavioural outcomes.

6. Building on effective national coordinating mechanisms or focal points, the infrastructure should take into account local, national/federal and regional specificities, including traditional structures, to ensure that various population groups in both urban and rural settings are reached.
Recommendation

7. Parties should establish an infrastructure to support education, communication and training and ensure that they are used effectively to raise public awareness and promote social change, in order to prevent, reduce or eliminate tobacco consumption and exposure to tobacco smoke.

Action points

8. Parties should implement the actions listed below, taking into account national circumstances, priorities and resources.

9. Establish a coordinating mechanism or focal points according to Article 5.2(a) of the Convention. Define its role, in order to ensure, within the overall tobacco control strategies, plans and programmes, good planning, management and adequate funding for programmes based on Article 12 of the Convention. This coordinating mechanism or focal point should play a catalytic, coordination, and facilitation role in the delivery of tobacco-related education, communication and training programmes, by setting specific objectives, and then monitoring and evaluating their progress and outcomes.

10. Specify the people, bodies or entities responsible for tobacco-control education, communication and training, and define the role of governmental and nongovernmental bodies involved, to ensure cooperation within and between governments (including relevant authorities, such as ministries of education and science, health and consumer protection, finance and customs, economy and technology).

11. Define the role of programmes based on Article 12 of the Convention in relation to other public health programmes.

12. Establish action plans for the implementation of education, communication and training activities within a comprehensive tobacco-control programme.

13. Ensure legitimacy and formal recognition of programmes based on Article 12 of the Convention through broad consultation among implementing bodies or entities and enforcing authorities. Ensure that the programme is research-based, that it uses regular situation analysis and assessment to determine needs and resources, and that it provides for mid-course correction if its objectives are not being met. This includes, but is not limited to: delineating the current status of tobacco-control research and identifying individuals and institutions engaged in research to determine local expertise; and identifying areas where gaps in research exist to determine the allocation of technical assistance and resources.

14. Provide adequate human, material and financial resources to establish and sustain the programme at local, national/federal, regional and international levels, possibly using technical experts to design and execute the programme. To ensure sustainability of the programme, use existing funding sources and explore other potential sources, in accordance with Article 26 of the Convention. Potential funding mechanisms include but are not limited to raising tobacco excise taxes and

---

1 Recommendation are general political and programmatic suggestions to assist Parties in implementing Article 12 of the Convention.

2 Action points are measurable objectives, practices and undertakings consistent with the recommendations. They are the proposed means of attaining the successful implementation of the recommendations.

3 See Appendix 1 for an indicative list of items to cover in an action plan.

4 See Appendix 2 for an indicative list of research-based strategies and programmes.
introducing dedicated taxes (e.g. earmarking), licensing fees and other taxation schemes. The establishment of special foundations for tobacco-control education, communication and/or training are other potential funding mechanisms. All potential funding mechanisms must be protected against interference by the tobacco industry in accordance with the principles laid down in Article 5.3 of the Convention and its guidelines.

15. Provide cost-effective logistic and management support to tobacco-control programmes.

16. Ensure that new and developing tobacco-control organizations receive and use appropriate research-based training, training in strategic planning and technical assistance to carry out their missions and achieve sustainability.

17. Ensure that local, national/federal, regional and international data are collected to build a tobacco-control database or establish a central repository of research results, and ensure that the public has access to these data.

RUNNING EFFECTIVE EDUCATION, COMMUNICATION AND TRAINING PROGRAMMES

Background

18. Article 12 of the Convention calls for the use of all available communication tools to promote and strengthen public awareness of tobacco-control issues. Specific guidance on education, communication and training measures concerning tobacco dependence and cessation is suggested in the guidelines on Article 14.

19. Education, communication and training are the means of raising public awareness and achieving social change on tobacco use and exposure to tobacco smoke. To achieve the highest level of attainable health in all populations, social norms should provide enabling environments which protect against exposure to tobacco smoke, promote tobacco-free lifestyles, help tobacco users to quit tobacco use and prevent others, particularly young people, from starting.

20. In tobacco control, education comprises a continuum of teaching and learning about tobacco which empowers people to make voluntary decisions, modify their behaviour and change social conditions in ways that enhance health.

21. In tobacco control, communication is essential to change attitudes about tobacco production, manufacture, marketing, consumption and exposure to tobacco smoke, discourage tobacco use, curb smoking initiation, and encourage cessation, as well as being necessary for effective community mobilization towards providing enabling environments and achieving sustainable social change.

22. In tobacco control, training describes the process of building and sustaining the necessary capacity for a comprehensive tobacco-control programme through attaining vocational or practical skills and knowledge that relate to specific core competencies.

23. Promotion of social and environmental change refers to strategies, events or actions that promote visible and sustained changes in social and environmental norms and behaviour patterns within social groups. It is an important means of bringing about change in the behavioural norms around tobacco production, consumption and exposure to tobacco smoke.
Recommendation

24. Parties should use all available means to raise awareness, provide enabling environments and facilitate behavioural and social change through sustained education, communication and training.

Action points

25. Parties should implement the actions listed below, taking into account national circumstances, priorities and resources.

General

26. When planning, implementing and evaluating education, communication, training and other public-awareness programmes, develop a coordinated research-based approach.¹

27. Ensure inclusiveness of priority populations, consider and address key differences among population groups.² Interventions should include effective messages and ensure that everyone is reached without discrimination or unequal allocation of resources. Special attention should be paid to those most affected by marketing and rising tobacco use, such as young people, particularly young women, who are targeted as “replacement smokers”, as well as frequently neglected groups such as those who are illiterate, uneducated or undereducated, the poor, and people with disabilities. In addition, measures could be taken to raise awareness among parents, teachers, educators and pregnant women.

28. Ensure that the adverse health, socioeconomic and environmental consequences of tobacco production and consumption, of exposure to tobacco smoke, and the strategies and practices of the tobacco industry to undermine tobacco control efforts are communicated as widely as possible, and that the benefits of cessation of tobacco use and of a tobacco-free life are highlighted.³

29. Combine formative research, process evaluation and outcome evaluation to ensure the greatest possible likelihood that the programmes will effectively build knowledge and awareness, and change attitudes and behaviours as intended. Such research and evaluation should be as current as possible and evidence-based as far as possible, but not limit innovative approaches.

30. Identify and implement best practices at the local, national/federal and regional levels, and facilitate international cooperation through sharing research-based outcomes and best practices as specified in Article 22 of the Convention.

31. Introduce measures to ensure that entities involved in education, communication and training, and related research, including but not limited to academia, professional associations and governmental agencies, fully respect the principles laid down in Article 5.3 of the Convention and its guidelines, and thus do not accept any direct or indirect tobacco industry funding.

32. Consumption, tobacco advertising, promotion and sponsorship, and sales of tobacco products should be banned on premises used for educational or training purposes in order to complement tobacco-free messages, in accordance with Articles 8 and 13 of the Convention and the guidelines on their implementation.

¹ See Appendix 2 for an indicative list of research-based strategies and programmes.
² In accordance with guiding principle (x).
³ See Appendix 3 for an indicative list of areas to cover.
33. Personnel involved in education, training and communication should avoid using tobacco because:

(a) they are role models and by using tobacco, they undermine public health messages about its effect on health; and

(b) it is important to reduce the social acceptability of tobacco use and personnel involved in education, training and communication should set a good example in this respect.

Public education and communication activities

34. Develop and implement public education programmes at different levels, following a life-course approach.¹

35. Develop or adapt existing communication tools and activities, such as campaigns, according to the needs, knowledge, attitudes and behaviours of each target population, particularly aiming to ensure taking into account that they:

(a) are appropriate to the target audience;

(b) are of high frequency/long duration;

(c) contain refreshed and targeted messages;

(d) use a variety of methods and media vehicles;²

(e) use lessons learnt from other successful campaigns; and

(f) use integrated evaluation.

36. Communicate messages that are relevant, comprehensible, interesting, realistic, accurate, persuasive and empowering, while taking into account the effectiveness of key messages and the results of sound scientific research, where available. Acknowledge the potential role of both negative and positive messages by including a wide range of relevant information.³

37. Identify the most appropriate media to reach the intended audience, based on reach and relevance to the target groups. The opportunities and potential risks of using new and innovative communication and marketing vehicles, as well as new technologies, should be investigated and applied or avoided accordingly.

38. Consider supplementing mass media with community-based (including traditional) communication approaches, which may, for example, be used to reach low-income urban and rural populations in developing countries.

39. Maximize the coverage of education and communication campaigns by targeting vulnerable populations, including low-income and rural populations. Outreach can also be increased by encouraging and supporting nongovernmental organizations and other members of civil society active in the field of tobacco control, and not affiliated with the tobacco industry, to complement

¹ See Appendix 4 for an indicative list of venues for educational programmes.
² See Appendix 5 for an indicative list of methods and media vehicles.
³ See Appendix 3 for an indicative list of information to cover in communication and education campaigns.
governmental programmes through joint and/or independent educational activities and communication campaigns. Campaigns by, and with the participation of, civil society could be integrated into existing community education and mobilization programmes.

40. Monitor and evaluate the outcomes of public education and communication interventions in different target groups and take key differences, such as gender, cultural and educational background, age, and literacy into account in such monitoring and evaluation work. Identify effective research-based key messages for each of the target groups and use them to improve the responsiveness of programmes to each group, in particular those with the greatest needs.

Training

41. Identify training needs at the local, national/federal, regional and international levels, design a relevant training plan and select, implement and evaluate the resulting training programmes in different settings, focusing on the various needs. To increase reach and relevance, training programmes may follow the concept of place, people and practice, covering different environmental settings (e.g. rural, urban, and suburban), educational facilities (e.g. in formal, non-formal, and continuous education), and health-care providers (e.g. hospitals, primary health-care facilities and traditional healers) and so on.

42. Provide training for key professionals, as appropriate, including: physicians and other health workers; community workers; social workers; media professionals; educators; decision-makers; traditional communicators; healers (traditional medical or spiritual practitioners); religious and spiritual counsellors; administrators and fiscal, customs and justice officials; tobacco growers/workers; and other concerned persons.

43. Design a research-based training plan to ensure continued training of the relevant groups in the required competencies, including knowledge of effective tobacco-control measures and the vocational or practical skills needed to achieve them. Training programmes should include information about the strategies and practices of the tobacco industry to undermine tobacco-control efforts.

44. Identify the appropriate training methods for each target group, including the integration of novel approaches into training programmes.

45. Integrate the different aspects of tobacco control, including the adverse health, social, economic, and environmental consequences of tobacco production and consumption, as well as information on new tobacco products, into relevant curricula of universities, professional schools and other relevant vocational teaching institutions. Advance the introduction of tobacco-control education or training into the licensing requirements for relevant professions, as well as into requirements for continuous professional development.

46. Involve both practitioners and academic experts in capacity building and the development of research-based training tools, including professional associations, student organizations, and organizations active in formal and non-formal education and training. Identify influential groups and role models, such as government focal point staff, policy-makers, administrators, health professionals, media professionals or others who can contribute to training activities.

---

1 Further recommendations covering training on demand-reduction measures are given in the draft guidelines on implementation of Article 14 (document FCTC/COP/4/8).

2 See Appendix 6 for an indicative list of types of training (including examples of training for specific target groups).

3 See Appendix 7 for an indicative list of different types of novel approaches.
47. Monitor and evaluate the outcomes of training programmes at the local, national/federal, regional and international levels to identify the most appropriate training methods to be used for each target group.¹

48. Introduce and sustain budgetary provisions to meet the requirements for implementing training curricula and updating them periodically.

ININVOLVING CIVIL SOCIETY

Background

49. The Preamble and Article 4.7 of the Convention emphasize the contribution of nongovernmental organizations and other members of civil society. The participation of civil society² is of vital importance to national and international tobacco-control efforts. Vigilance must be exercised to ensure they are not affiliated with the tobacco industry, in accordance with the guidelines on Article 5.3 of the Convention.

Recommendation

50. Parties should actively involve members of civil society, in different phases such as planning, developing, implementing, monitoring and evaluating education, communication and training programmes.

51. Parties should restrict their collaboration to members of civil society not affiliated with the tobacco industry.³

Action points

52. Parties should implement the actions listed below, taking into account national circumstances, priorities and resources.

53. Regularly consult, cooperate and form effective partnerships with civil society involved in tobacco control education, communication and training, including but not limited to bodies representing key target groups.

54. Ensure civil society involvement in and collaboration with the governmental coordinating mechanism or focal point in planning, developing, implementing, monitoring and evaluating tobacco control education, communication and training programmes, including physical representation.

55. Work with civil society to create a climate of attitude that:

(a) engenders public and political support for action to control tobacco use;

(b) supports the government in its tobacco-control efforts;

(c) identifies legislative priorities and helps develop and enforce legislative measures;

¹ See Appendix 8 for an indicative list of different approaches to training methods for specific target groups.

² See Appendix 9 for an indicative list of members of civil society to consider actively involving in education, communication, training and public awareness programmes.

³ In accordance with the guidelines on Article 5.3 of the Framework Convention, this includes the tobacco industry itself as well as organizations and individuals that work to further the interests of the tobacco industry.
(d) makes the case that tobacco-control measures are reasonable and effective;

(e) increases awareness of tobacco industry interference; and

(f) provides a powerful and respectable public image for education, communication, training and awareness campaigns.

56. Identify key professionals, including but not limited to health professionals, teachers, journalists and other media professionals, and involve them as role models and agents of change in education, communication and training.

57. Build and strengthen tobacco-control movements and support effective tobacco-control alliances, for example by providing seed grants to support civil society groups and coalitions for tobacco control.

ENSURING WIDE ACCESS TO INFORMATION ON THE TOBACCO INDUSTRY

Background

58. Evidence demonstrates that tobacco companies use a wide range of tactics to interfere with tobacco control. Such strategies include direct and indirect political lobbying and campaign contributions, financing of research, attempts to affect the course of regulatory and policy machinery and engaging in so-called “corporate social responsibility” initiatives as part of public relations campaigns. The implementation guidelines on Article 5.3 of the Convention, especially recommendation 5.5, outline the information that Parties should require from the tobacco industry and those working to further its interests. To ensure that the obligations under Article 12 of the Convention are met, the public needs to have access to this information and all programmes should be protected from commercial and other vested interests of the tobacco industry (as described in Article 5.3).

Recommendation

59. Parties should ensure that the public has free and universal access to accurate and truthful information on the strategies and activities of the tobacco industry and its products, as appropriate, and that education, communication, training and public awareness programmes include a wide range of information on the tobacco industry as they require and in accordance with Articles 12(c) and 20.4(c) of the Convention.

Action points

60. Parties should implement the actions listed below, taking into account national circumstances, priorities and resources.

61. Adopt and implement effective measures that require the tobacco industry to be accountable and to provide accurate and transparent information in accordance with Article 12(c) and the implementing guidelines on Articles 5.3, 9, 10, 11 and 13 of the Convention.

---

1 In accordance with Articles 9 and 10 of the Convention and the draft implementation guidelines on these articles (document FCTC/COP/4/6).

2 See the implementation guidelines on Article 5.3, recommendation 5.2.
62. Provide public access to all information relevant to the strategies and activities of the tobacco industry, through such means as publicly accessible databases, monitoring instruments and research-based literature, and by publicizing trustworthy sources of information on the tobacco industry.

63. Consider putting in place education programmes, communication campaigns and training courses that can effectively inform and educate the public and all branches of government about:

(a) tobacco industry interference with activities related to education, communication and training, such as tobacco industry funded or co-funded youth prevention programmes, which have been demonstrated to be ineffective and even counterproductive, and have been publicly disapproved by the World Health Organization; and

(b) tobacco industry interference with Parties’ tobacco-control policies.¹

64. Consider ways to build sufficient capacity to enable effective monitoring and surveillance of the tobacco industry and its products, by training researchers and other relevant professionals, and by providing easy public access to relevant data on the tobacco industry and its products, as required in Article 12(c) of the Convention.

65. Develop and implement communication tools to facilitate public access to a wide range of information on the tobacco industry and its products.² Depending on cultural appropriateness, reach and accessibility, such communication tools could include:

(a) public repositories on the tobacco industry, such as the Legacy Tobacco Industry Documents Library;³ and

(b) counter-advertising campaigns using the media and/or relevant forms of modern technology.

STRENGTHENING INTERNATIONAL COOPERATION

Background

66. International collaboration, mutual support and sharing of information, knowledge and relevant technical capacity are vitally important to strengthen Parties’ capacities to meet their obligations under Article 12 of the Convention and to successfully counter the adverse health, socioeconomic and environmental consequences of tobacco production, consumption and exposure to tobacco smoke. The duty to cooperate in the development of effective measures, procedures and guidelines for implementation of the Convention, to cooperate with international and regional organizations and to use bilateral and multilateral funding mechanisms, derives from Articles 4.3, 5.4, 5.5, 20, 21 and 22 of the Convention.

Recommendation

67. Parties should collaborate at the international level to raise global public awareness.

¹ As specified in recommendations 1.1 and 1.2 of the implementation guidelines on Article 5.3 of the Convention.
² In accordance with recommendation 5.5 of the guidelines on Article 5.3 of the Convention.
³ See http://legacy.library.ucsf.edu/.
Action points

68. Parties should implement the actions listed below, taking into account national circumstances, priorities and resources.

69. Make available to other Parties strategies, data and experiences on planned and/or implemented public education programmes, communication campaigns and training efforts, impart practical skills and core competencies, and share best practices. Where appropriate, use international reporting mechanisms, such as the regular reporting instruments of the Convention on implementation, and take advantage of bilateral and multilateral contacts.

70. Use the multisectoral approach of the Convention. Raise awareness of its implementation in relevant international organizations, platforms and civil society to ensure that raising awareness of the Convention is not confined to tobacco-control meetings and the health sector.

MONITORING OF IMPLEMENTATION AND REVISION OF THE GUIDELINES

Background

71. Monitoring and evaluation of the implementation of Article 12 of the Convention are essential to ensuring that adequate means are employed to raise public awareness. Monitoring and evaluation at both national and international levels optimize the gains in implementation of the Convention. At country level, progress made becomes measurable and best practices can be identified to make effective use of resources. At the international level, the sharing of experiences and information allows Parties to adapt and improve their strategies and actions to have a broader impact on public awareness.

Recommendations

72. Parties should monitor, evaluate and revise their communication, education and training measures nationally and internationally to meet their obligations under the Convention, to enable comparisons and observe any trends.

73. Parties reporting via the existing reporting instrument of the Convention should provide information on education, communication, training and raising public awareness.

74. Parties should make use of the Convention and its monitoring instruments to raise awareness on its implementation, for example by communicating success stories and addressing gaps in the implementation of Article 12 of the Convention. Parties could also consider carrying out activities to raise the profile of the Convention as an effective international tobacco control strategy.

Action points

75. Parties should implement the actions listed below, taking into account national circumstances, priorities and resources.

76. Ensure that programmes in education, communication, and training are regularly monitored and evaluated, and the results made available for comparison and used for programme improvement.

77. Determine the needs, formulate measurable objectives and identify the resources required to implement actions based on these guidelines, and identify key indicators such as relevance, persuasion or behaviour change to assess the progress for each objective and achievement of outcomes.
78. Routinely collect data on the implementation of Article 12 of the Convention through surveys and other relevant research undertaken by government, nongovernmental organizations, or any other relevant entities.

79. Use the reporting instrument of the Convention to capture and share information on the policies adopted and any other measures taken in the implementation of Article 12.¹

KEY MESSAGES

80. With respect to the implementation of Article 12 of the WHO Framework Convention on Tobacco Control, Parties should:

(a) establish an infrastructure and build capacity to support education, communication and training, thereby raising public awareness and promoting social change;

(b) use all available means to raise awareness, provide enabling environments and facilitate behavioural and social change;

(c) actively involve civil society in relevant phases of public awareness programmes;

(d) ensure that education, communication, and training programmes include a wide range of information on the tobacco industry, its strategies and its products;

(e) collaborate at the international level to raise global public awareness;

(f) monitor, evaluate and revise education, communication and training measures nationally and internationally to enable comparisons and observe any trends;

(g) provide information on education, communication, and training via the existing reporting instrument of the Convention to monitor its implementation; and

(h) make use of the WHO Framework Convention on Tobacco Control and its monitoring instruments to raise awareness on its implementation and consider carrying out activities to raise the profile of the Convention as an effective international tobacco control strategy.

Appendix 1

Indicative (non-exhaustive) checklist for an action plan for the implementation of education, communication and training activities within a comprehensive tobacco-control programme

1. State the vision
2. Develop a mission statement
3. Formulate goals and objectives
4. Select strategies and expected results for each objective
5. Prepare a budget plan

¹ See Appendix 10 for an indicative list of useful information to consider in reporting at the international level.
6. Indicate who is responsible for each activity
7. Set target dates and determine the resources required
8. Identify progress indicators to enable measurement of the effectiveness of implementation
9. Monitor and evaluate implementation and outcomes
10. Disseminate results to people, bodies or entities responsible for tobacco-control education, communication and training.

Appendix 2

Indicative (non-exhaustive) checklist for research-based strategies and programmes

1. Conduct regular situation analyses and assessments of needs
2. Identify priority target groups
3. Determine behavioural change objectives
4. Identify indicators
5. Develop and pre-test messages
6. Select intervention methods
7. Obtain financing
8. Identify partners
9. Monitor and evaluate
10. Coordinate among governmental and related bodies
11. Disseminate results, including through earned media

Appendix 3

Indicative (non-exhaustive) list of areas to cover in education, communication and training programmes

1. The benefits of a tobacco-free life and cessation of tobacco use.

---

1 As specified in paragraph 10 of these guidelines.
2. The health effects of tobacco agriculture, production, consumption and exposure to tobacco smoke, including but not limited to epidemiological data on the contribution of tobacco to morbidity and mortality and information on novel tobacco products.

3. The health, social, environmental and economic costs and consequences of tobacco agriculture, production and consumption, including health-care costs, lost productivity, premature deaths, environmental impact, and contribution to poverty.

4. Local, national/federal, regional and international policies and reports related to tobacco and tobacco control, including but not limited to the Convention and its implementation guidelines.

5. Information on the strategies and activities of the tobacco industry to undermine tobacco-control efforts, and on the ineffectiveness of activities related to tobacco control funded by the tobacco industry, e.g. public-awareness campaigns aimed at youth.

6. Techniques for effective behaviour support (counselling skills) for tobacco dependence.

Appendix 4

Indicative (non-exhaustive) list of venues for educational programmes

1. Homes
2. Schools and school-like environments, including primary and secondary schools, colleges and universities, as well as continuous education and lifelong-learning programmes
3. Sports, recreation and leisure facilities
4. Workplaces
5. Health-care facilities
6. Communities
7. Reformative and rehabilitative facilities

Appendix 5

Indicative (non-exhaustive) list of appropriate methods and media vehicles

1. Methods include counter-marketing by means of:
(i) paid advertising;
(ii) media placements; and
(iii) earned media including but not limited to events which capture the attention of journalists and the public.
2. **Media vehicles** include:

   (i) television;
   
   (ii) radio;
   
   (iii) newspapers;
   
   (iv) magazines;
   
   (v) billboards; and
   
   (vi) electronic media, e.g. text messages, e-mail, web sites, blogs, social networks, etc.

### Appendix 6

**Indicative (non-exhaustive) list of types of training**

1. Orientation training and interaction (with survivors of tobacco-related diseases and disability)

2. Public speaking skills (for people talking to news media and other organizations about tobacco control)

3. Media advocacy skills and media training

4. Networking training

5. Campaign planning

6. Evaluation training

7. Peer education

8. Training on the negative impacts of tobacco and cost-effectiveness of tobacco-control interventions

9. News media staff training on tobacco-control issues

10. Capacity building on tobacco industry interference in school-based training programmes and so-called youth smoking prevention programmes

11. Social media training

### Appendix 7

**Indicative (non-exhaustive) list of types of novel approaches**

1. E-learning and web-based approaches
2. Peer education

3. Train-the-trainer models

4. Cross-training opportunities through existing programmes, such as reproductive health programmes (including those on HIV/AIDS), disease-management programmes (e.g. DOTS), substance-abuse prevention programmes (e.g. those aimed at alcohol or illicit drugs) or environmental protection programmes

Appendix 8

Indicative (non-exhaustive) list of different approaches of training methods for specific target groups

Monitoring data should distinguish, inter alia, between the different training methods used according to:

(a) the place of the intervention (settings such as educational facilities, workplaces, and health-care facilities);

(b) the people performing the intervention (providers, such as health workers, social workers, educators, and counsellors); and

(c) the practice involved (method used to reach the target audience, such as radio, skits, and lectures).

Appendix 9

Indicative (non-exhaustive) list of members of civil society to consider actively involving in education, communication, training and public awareness programmes

1. Nongovernmental organizations, including women’s, youth, environmental and consumer groups

2. Foundations

3. Professional organizations

4. Private agencies

5. Academia

6. Teaching and training institutions

7. Health-care institutions
Appendix 10

Indicative (non-exhaustive) list of useful information to consider in reporting at the international level

1. Results of monitoring and evaluating of education, communication, training and public-awareness interventions
2. Outcomes of evaluations undertaken at the national level
3. The most appropriate strategies identified in each country
4. The major challenges faced
5. The activities of the tobacco industry

(Ninth plenary meeting, 19 November 2010)
FCTC/COP4(8)  Guidelines for implementation of Article 14 of the WHO Framework Convention on Tobacco Control (Demand reduction measures concerning tobacco dependence and cessation)

The Conference of the Parties,

Taking into account Article 14 (Demand reduction measures concerning tobacco dependence and cessation) of the WHO Framework Convention on Tobacco Control (WHO FCTC);

Recalling its decision FCTC/COP3(15) to establish a working group to elaborate guidelines on the implementation of Article 14 of the WHO FCTC and to present a progress report or, if possible, draft guidelines for consideration by the Conference of the Parties at its fourth session;

Emphasizing that the aim of these guidelines is to assist Parties in fulfilling their obligations under Article 14 of the WHO FCTC,

1. ADOPTS the guidelines for implementation of Article 14 of the WHO FCTC contained in the Annex to this decision; and

2. REQUESTS the Convention Secretariat to maintain a database of information sources related to these guidelines, based on the information presented by the Parties through their implementation reports and other international sources, as appropriate.
INTRODUCTION

1. Article 14 of the WHO Framework Convention on Tobacco Control (WHO FCTC) states that “each Party shall develop and disseminate appropriate, comprehensive and integrated guidelines based on scientific evidence and best practices, taking into account national circumstances and priorities, and shall take effective measures to promote cessation of tobacco use and adequate treatment for tobacco dependence”.

2. Tobacco dependence treatment is defined differently by different cultures and in different languages. It sometimes includes measures to reduce tobacco use in the population as a whole, but often only refers to interventions at the individual level. These guidelines cover both, and therefore employ the term “promotion of tobacco cessation” as well as “tobacco dependence treatment”. Further effective measures to promote cessation of tobacco use are contained in other articles of the WHO FCTC and in the guidelines on their implementation.

3. Parties are encouraged to use these guidelines to assist them in fulfilling their obligations under the WHO FCTC and in protecting public health. They are also encouraged to implement measures beyond those recommended by the guidelines, in accordance with the provisions of Article 2.1 of the Convention.1

Purpose

4. The purpose of these guidelines is to assist Parties in meeting their obligations under Article 14 of the WHO FCTC, consistent with their obligations under other provisions of the Convention and with the intentions of the Conference of the Parties, on the basis of the best available scientific evidence and taking into account national circumstances and priorities.

5. To this end the guidelines:

(i) encourage Parties to strengthen or create a sustainable infrastructure which motivates attempts to quit, ensures wide access to support for tobacco users who wish to quit, and provides sustainable resources to ensure that such support is available;

(ii) identify the key, effective measures needed to promote tobacco cessation and incorporate tobacco dependence treatment into national tobacco control programmes and health-care systems;

(iii) urge Parties to share experiences and collaborate in order to facilitate the development or strengthening of support for tobacco cessation and tobacco dependence treatment.

---

1 Parties are directed to the WHO FCTC web site (http://www.who.int/fctc/) where further sources of information on topics covered by these guidelines are maintained.
Use of terms

6. For the purpose of these guidelines, the following definitions apply:

- “Tobacco user”: a person who uses any tobacco product.

- “Tobacco addiction/dependence”: a cluster of behavioural, cognitive, and physiological phenomena that develop after repeated tobacco use and that typically include a strong desire to use tobacco, difficulties in controlling its use, persistence in tobacco use despite harmful consequences, a higher priority given to tobacco use than to other activities and obligations, increased tolerance, and sometimes a physical withdrawal state.\(^1\)

- “Tobacco cessation”: the process of stopping the use of any tobacco product, with or without assistance.

- “Promotion of tobacco cessation”: population-wide measures and approaches that contribute to stopping tobacco use, including tobacco dependence treatment.

- “Tobacco dependence treatment”: the provision of behavioural support or medications, or both, to tobacco users, to help them stop their tobacco use.\(^2\)

- “Behavioural support”: support, other than medications, aimed at helping people stop their tobacco use. It can include all cessation assistance that imparts knowledge about tobacco use and quitting, provides support and teaches skills and strategies for changing behaviour.

- “Brief advice”: advice to stop using tobacco, usually taking only a few minutes, given to all tobacco users, usually during the course of a routine consultation or interaction.

UNDERLYING CONSIDERATIONS

7. **Tobacco use is highly addictive.**\(^3,4\) The use of tobacco and exposure to tobacco smoke have severe negative health, economic, environmental and social consequences, and people should be educated about these negative consequences and the benefits of cessation.\(^5\) Knowledge of these negative consequences is a powerful component of most tobacco users’ motivation to quit, and therefore it is important to ensure that they are fully understood by the public and policy-makers.

8. **It is important to implement tobacco dependence treatment measures synergistically with other tobacco control measures.** The promotion of tobacco cessation and treatment of tobacco dependence are key components of a comprehensive, integrated tobacco control programme. Support for tobacco users in their cessation efforts and successful treatment of their tobacco dependence will reinforce other tobacco control policies, by increasing social support for them and increasing their acceptability. Implementing cessation and treatment measures in conjunction with population level

---

\(^2\) Sometimes called “cessation support” in this document.

\(^4\) The terms addiction and dependence are used interchangeably in these guidelines, as in the Preamble and Articles 4 and 5 of the WHO FCTC.

\(^5\) As outlined in Article 12 of the WHO FCTC.
interventions covered by other articles of the WHO FCTC, will have a synergistic effect and thus maximize their impact.

9. **Tobacco cessation and tobacco dependence treatment strategies should be based on the best available evidence of effectiveness.** There is clear scientific evidence that tobacco dependence treatment is effective and that it is a cost-effective health-care intervention, and thus that it is a worthwhile investment for health-care systems.

10. **Treatment should be accessible and affordable.** Tobacco dependence treatment should be widely available, accessible and affordable, and should include education\(^1\) on the range of cessation options available.

11. **Tobacco cessation and tobacco dependence treatment should be inclusive.** Tobacco cessation strategies and tobacco dependence treatment should take into account factors such as gender, culture, religion, age, educational background, literacy, socioeconomic status, disability, and the needs of groups with high rates of tobacco use. Tobacco cessation strategies should be as inclusive as possible, and should where appropriate be tailored to the needs of individual tobacco users.

12. **Monitoring and evaluation are essential.** Monitoring and evaluation are essential components of successful tobacco cessation and tobacco dependence treatment programmes.

13. **Active partnership with civil society.** The active participation of and partnership with civil society, as specified in the Preamble and in Article 4.7 of the WHO FCTC, are essential to the effective implementation of these guidelines.

14. **Protection from all commercial and vested interests.** Development of strategies to implement Article 14 of the WHO FCTC should be protected from the commercial and other vested interests of the tobacco industry, in line with Article 5.3 of the Convention and its guidelines, and from all other actual and potential conflicts of interest.

15. **Value of sharing experience.** Sharing of experience and collaboration with each other will greatly enhance Parties’ abilities to implement these guidelines.

16. **Central role of health-care systems.** Strengthening existing health-care systems to promote tobacco cessation and tobacco dependence treatment is essential.

**DEVELOPING AN INFRASTRUCTURE TO SUPPORT TOBACCO CESSATION AND TREATMENT OF TOBACCO DEPENDENCE**

**Background**

17. Certain infrastructure elements will be needed to promote tobacco cessation and provide effective tobacco dependence treatment. Much of this infrastructure (such as a primary health care system) already exists in many countries. In order to promote tobacco cessation and develop tobacco dependence treatment as rapidly as possible and at as low a cost as possible, Parties should use existing resources and infrastructure as much as they can, and ensure that tobacco users at least receive brief advice. Once this has been achieved, other mechanisms for providing tobacco dependence treatment, including more specialist approaches (see “Developing cessation support: a stepwise approach” below), can be put in place.

---

\(^1\) Further guidance on education is given in the guidelines on implementation of Article 12 of the WHO FCTC adopted in decision FCTC/COP/4(7).
18. Professional associations and other groups with relevant expertise in this area should be involved at an early stage in the design and development of the necessary infrastructure, but with the process protected from all actual and potential conflicts of interest.

**Recommendation**

19. Parties should implement the actions listed below in order to strengthen or create the infrastructure needed to promote cessation of tobacco use effectively and provide adequate treatment for tobacco dependence, taking into account national circumstances and priorities.

**Actions**

*Conduct a national situation analysis*

20. Analyse, where appropriate: (1) the status of all tobacco control policies in the country and their impact, especially in motivating tobacco users to quit and creating demand for treatment support; (2) policies to promote tobacco cessation and provide tobacco dependence treatment; (3) existing tobacco dependence treatment services and their impact; (4) the resources available to strengthen the promotion of tobacco cessation and tobacco dependence treatment services (or to create such services where they do not yet exist), including training capacity,¹ health-care infrastructure, and any other infrastructure that may be helpful; (5) any monitoring data available (see “Monitoring and evaluation” below). Use this situation analysis where appropriate to create a strategic plan.

*Create or strengthen national coordination*

21. Ensure that the national coordinating mechanism or focal point facilitates the strengthening or creation of a programme to promote tobacco cessation and provide tobacco dependence treatment.

22. Maintain or consider creating an up-to-date, easily accessible information system on available tobacco cessation services and qualified service providers for tobacco users.

*Develop and disseminate comprehensive guidelines*

23. Parties should develop and disseminate comprehensive tobacco dependence treatment guidelines based on the best available scientific evidence and best practices, taking into account national circumstances and priorities. These guidelines should include two major components: (1) a national cessation strategy, to promote tobacco cessation and provide tobacco dependence treatment, aimed principally at those responsible for funding and implementing policies and programmes; and (2) national treatment guidelines² aimed principally at those who will develop, manage and provide cessation support to tobacco users.

24. A national cessation strategy and national tobacco dependence treatment guidelines should have the following key characteristics:

- they should be evidence based;
- their development should be protected from all actual and potential conflicts of interest;

---

¹ Further guidance on training is given in the guidelines on implementation of Article 12 of the WHO FCTC adopted in decision FCTC/COP4(7).

² Treatment guidelines are systematically developed statements to help service managers, practitioners and patients to make decisions about appropriate treatment for tobacco dependence and cessation.
• they should be developed in collaboration with key stakeholders, including but not limited to health scientists, health professional organizations, health-care workers, educators, youth workers and nongovernmental organizations with relevant expertise in this area;

• they should be commissioned or led by government, but in active partnership and consultation with other stakeholders; however, if other organizations initiate the treatment guidelines development process, they should do so in active collaboration with government;

• they should include a dissemination and implementation plan, should highlight the importance of all service providers (within or outside the health-care sector) setting an example by not using tobacco, and should be periodically reviewed and updated, in the light of developing scientific evidence, and in accordance with the obligations established by Article 5.1 of the WHO FCTC.

25. Additional key characteristics of national treatment guidelines:

• they should be widely endorsed at national level, including by health professional organizations and/or associations;

• they should include as broad a range of interventions as possible, such as systematic identification of people who use tobacco, provision of brief advice, quitlines, face-to-face behavioural support provided by workers trained to deliver it, systems to make medications accessible and free or at an affordable cost, and systems to support the key steps involved in helping people to quit tobacco use, including reporting tobacco use status in all medical notes;

• they should cover all settings and all providers, both within and outside the health-care sector.

Address tobacco use by health-care workers and others involved in tobacco cessation

26. Health-care workers should avoid using tobacco because:

• they are role models and by using tobacco they undermine public health messages about its effects on health;

• it is important to reduce the social acceptability of tobacco use and health-care workers have a particular responsibility to set a good example in this respect.

27. Specific programmes promoting cessation of tobacco use and offering tobacco dependence treatment should therefore be provided for health-care workers and any other groups involved in helping tobacco users to quit.

Develop training capacity

28. In most countries the health-care system and health-care workers should play a central role in promoting tobacco cessation and offering support to tobacco users who want to quit. However other groups should be involved where appropriate.

---

1 Further guidance on training is given in the guidelines on implementation of Article 12 of the WHO FCTC adopted in decision FCTC/COP4(7).
2 Including but not limited to governmental bodies, public and private health-care facilities, and funding organizations.
29. All health-care workers should be trained to record tobacco use, give brief advice, encourage a quit attempt, and refer tobacco users to specialized tobacco dependence treatment services where appropriate.

30. Outside health-care settings, other individuals can be trained to give brief advice, encourage a quit attempt, and refer tobacco users to specialized tobacco dependence treatment services where appropriate, and therefore also have a role to play in tobacco cessation and tobacco dependence treatment.

31. Both health-care workers and those outside health-care settings who deliver intensive specialized support (see “Key components of a system to help tobacco users to quit” below) should be trained to the highest possible standard and receive continuous education.

32. Tobacco control and tobacco cessation should be incorporated into the training curricula of all health professionals and other relevant occupations both at pre- and post-qualification levels, and in continuous professional development. Training should include information about tobacco use and the harm it does, the benefits of cessation, and the influence that trained workers can have in prompting quitting.

33. Training standards should be set nationally by competent authorities.

**Use existing systems and resources to ensure the greatest possible access to services**

34. Parties should use existing infrastructure, in both health-care and other settings, to ensure that all tobacco users are identified and provided with at least brief advice.

35. Parties should use existing infrastructure to provide tobacco dependence treatment for people who want to stop using tobacco. Such treatment should be widely accessible, evidence based, and affordable.

36. Parties should consider using existing infrastructure that would provide the greatest possible access for tobacco users, including but not limited to primary health care and other services such as those providing treatment for tuberculosis and HIV/AIDS.

**Make the recording of tobacco use in medical notes mandatory**

37. Parties should ensure that the recording of tobacco use status in all medical and other relevant notes is mandatory, and should encourage the recording of tobacco use in death certification.

**Encourage collaborative working**

38. It is essential that governmental and nongovernmental organizations work in partnership, in accordance with the spirit of the underlying considerations of these guidelines, in order to make rapid progress in implementing the provisions of Article 14 of the WHO FCTC.

**Establish a sustainable source of funding for cessation help**

39. The strengthening or creation of a national infrastructure to promote tobacco cessation and to provide tobacco dependence treatment will require both financial and technical resources and it will therefore be essential to identify funding for that infrastructure, in accordance with Article 26 of the WHO FCTC.

40. In order to alleviate governmental budgetary pressure, Parties could consider placing the cost of cessation support on the tobacco industry and retailers, through such measures as: designated tobacco
taxes; tobacco manufacturing and/or importing licensing fees; tobacco product registration fees; tobacco selling licenses for distributors and retailers; noncompliance fees levied on the tobacco industry and retailers, such as administrative monetary penalties; and annual tobacco surveillance/control fees for the tobacco industry and retailers. Successful action to reduce the illicit trade in tobacco products (as outlined in Article 15 of the WHO FCTC) could also increase government revenue substantially.

KEY COMPONENTS OF A SYSTEM TO HELP TOBACCO USERS QUIT

Background

41. Support can be offered to tobacco users in a wide variety of settings and by a wide variety of providers, as described in the previous section, and can include a range of options, from less intensive population-wide approaches to more intensive approaches delivered by specialists who are trained and may be paid. The key components of a system to help tobacco users quit include approaches with a wide reach like brief advice and quitlines¹ more intensive approaches like behavioural support delivered by trained specialists, and effective medications. There is a substantial body of scientific evidence showing that behavioural support and medications are effective and cost-effective, separately and combined, and that they are more effective when combined.

Recommendations

42. In designing national cessation and treatment systems for health-care and other settings, Parties should include the components listed below, taking into account national circumstances and priorities.

43. Parties should provide cessation support and treatment in all health-care settings and by all health-care providers. Parties should additionally consider providing cessation support and treatment in non-health-care settings and by suitably trained non-health-care providers, especially where scientific evidence suggests that some populations of tobacco users² may be better served in this way.

Actions

Establish population-level approaches

44. Mass communication. Mass communication and education programmes are essential for encouraging tobacco cessation, promoting support for tobacco cessation, and encouraging tobacco users to draw on this support.³ These programmes can include both unpaid and paid media placements.

45. Brief advice. Brief advice should be integrated into all health-care systems. All health-care workers should be trained to ask about tobacco use, record it in the notes, give brief advice on stopping, and direct tobacco users to the most appropriate and effective treatment available locally. Brief advice should be implemented as an essential part of standard practice and its implementation should be monitored regularly.

46. Quitlines. All Parties should offer quitlines in which callers can receive advice from trained cessation specialists. Ideally they should be free and offer proactive support. Quitlines should be widely publicized and advertised, and adequately staffed, to ensure that tobacco users can always

¹ A quitline is a telephone counselling service that can provide both reactive and proactive counselling. A reactive quitline provides an immediate response to a call initiated by the tobacco user, but only responds to incoming calls. A proactive quitline involves setting up a schedule of planned calls to tobacco users.

² Such populations may include, but not be limited to young people, parents, and people of low socioeconomic status.

³ See the guidelines on implementation of Article 12 of the WHO FCTC adopted in decision FCTC/COP4(7).
receive individual support. Parties are encouraged to include the quitline number on tobacco product packaging.

*Establish more intensive individual approaches*

47. **Specialized tobacco dependence treatment services.** Tobacco users who need cessation support should, where resources allow, be offered intensive specialized support, delivered by specially trained practitioners. Such services should offer behavioural support, and where appropriate, medications or advice on the provision of medications. The services may be delivered by a variety of health-care or other trained workers, including doctors, nurses, midwives, pharmacists, psychologists, and others, according to national circumstances. These services can be delivered in a wide variety of settings and should be easily accessible to tobacco users. Where possible they should be provided free or at an affordable cost. Specialized treatment services should meet national or applicable standards of care.

*Make medications available*

48. Medications that have been clearly shown by scientific evidence to increase the chances of tobacco cessation should be made available to tobacco users wanting to quit and where possible be provided free or at an affordable cost.

49. Some medications can also be made available population wide, with fewer restrictions to access, taking into account relevant legislation. Experience in some countries has shown that increasing the accessibility and availability of some medications can increase the number of attempts to quit.

50. Collective bargaining by governments or regional economic organizations should be used to reduce medication prices by bulk purchase or other available means, to ensure that cessation treatment does not impose excessive costs on those stopping tobacco use. Where low-cost, effective medications exist, these may be considered as a standard treatment.

*Consider emerging research evidence and novel approaches and media*

51. Parties should keep under review the developing scientific evidence of new approaches to promoting tobacco cessation and providing tobacco dependence treatment.

52. Parties should be open to new and innovative approaches to promoting tobacco cessation and providing tobacco dependence treatment, while at the same time prioritizing approaches that are more strongly based on the scientific evidence.

53. There is evidence from some countries that national No Smoking Days, sometimes held on World No Tobacco Day, can be effective low-cost interventions that motivate tobacco users to try to quit. Cellphone text messaging and Internet-based behavioural support may be especially useful in countries where telephone and Internet use are high. These and other approaches are being investigated in scientific trials, although there is insufficient evidence yet to recommend them as a core part of treatment provision. The potential of using electronic media like radio for delivering cessation messages and advice could also be explored, as in many countries radio is the most widespread and low-cost medium of mass communication. Some countries also have local and folk media which have wide access at the grass-roots level, and the use of these for disseminating information about availability of tobacco cessation facilities may be considered along with other culturally acceptable approaches to treatment.

**DEVELOPING CESSATION SUPPORT: A STEPWISE APPROACH**

---

1 According to the scientific evidence (see “Monitoring and evaluation” below).
**Background**

54. Tobacco control policies which reduce the demand for tobacco, and which are covered in other articles of the WHO FCTC,\(^1\) promote tobacco cessation by encouraging quitting and creating a supportive environment for the implementation of measures that support cessation. Implementing tobacco cessation and tobacco dependence treatment measures in conjunction with such policies will have a synergistic effect and thus maximize the impact on public health.

55. Even a country with a low proportion of tobacco users wanting to quit and needing help to do so may have large demand for cessation support, if the absolute number of tobacco users is high.

56. Introduction of the different components of a comprehensive, integrated system to promote tobacco cessation and treat tobacco dependence can be simultaneous or stepwise, according to each Party’s circumstances and priorities. Some Parties already have comprehensive treatment systems, and all Parties should aim to provide the fullest complement of interventions for tobacco cessation and treatment of tobacco dependence.

57. Resources are finite however, so this section suggests the elements of a stepwise approach to developing tobacco dependence treatment, if such an approach is deemed appropriate.

**Recommendations**

58. Parties that have not already done so should implement measures to promote tobacco cessation and increase demand for tobacco dependence treatment contained in other articles of the WHO FCTC.\(^2\)

59. Parties should use existing infrastructure, in both health-care and other settings, to ensure that all tobacco users are identified and provided with at least brief advice.

60. Parties should implement the actions listed below, taking into account national circumstances and priorities.

**Actions**

*Actions that establish basic infrastructure and create an environment that prompts quit attempts*

**Establish system components**

- Ensure that the population is well informed about the harmful effects of tobacco products.
- Strengthen or create – and fund – national coordination for tobacco cessation and tobacco dependence treatment, as part of the national tobacco control plan.
- Develop and disseminate a national tobacco cessation strategy and national tobacco dependence treatment guidelines.
- Identify and allocate sustainable funding for tobacco cessation and tobacco dependence treatment programmes.

---

\(^1\) Including, but not limited to, Articles 6, 8, 11, 12 and 13.

\(^2\) Including, but not limited to, Articles 6, 8, 11, 12 and 13.
Where appropriate, ensure that health insurance or other funded health-care systems record tobacco dependence as a disease or disorder and include its treatment in services covered.

Address the issue in health-care workers

- Incorporate tobacco dependence and cessation into the core curriculum and continuing professional training of medical, dental, nursing, pharmacy and other relevant undergraduate and postgraduate courses and in licensing and certifying examinations.
- Train health-care workers to give brief advice according to a simple formula.
- Where appropriate train workers and service providers outside the health-care sector in tobacco cessation and tobacco dependence treatment skills.
- Promote tobacco cessation among health-care workers and service providers who use tobacco, and offer support to them to quit if they need it.

Integrate brief advice into existing health-care systems

- Ensure that tobacco use is recorded in medical notes and other relevant notes at all levels of care.
- Integrate brief advice into the existing primary health-care system.
- Involve all relevant sectors of a country’s health-care system in providing brief advice.
- Integrate brief advice into other culturally relevant settings outside the health-care sector when the opportunity or necessity arises.
- Reimbursement of health-care workers’ time for tobacco cessation counselling, and of the costs of medications, is recommended where appropriate.

Actions that increase the likelihood of quit attempts succeeding

Create capacity for tobacco cessation support and tobacco dependence treatment

- Ensure that the population is well informed about the availability and accessibility of tobacco dependence treatment services and encourage them to make use of them.
- Establish a free proactive quitline providing advice on how to quit, or if resources are scarce, start by establishing a free reactive quitline.
- Ensure that effective medications are readily available, accessible, and free or at an affordable cost.
- Establish a network of specialized comprehensive tobacco dependence treatment services that meet national or applicable standards of care.

MONITORING AND EVALUATION

Background

61. Monitoring and evaluation activities measure the progress and impact of an intervention or programme by collecting data/information showing change, or the lack of it. This includes periodically
reviewing interventions and programmes. Scientific evidence is evidence gained by scientific enquiry, usually through formal research, and includes evidence obtained through monitoring and evaluation.¹

62. Monitoring and evaluation are essential to ensure that the best means are employed to develop and deliver effective treatment to tobacco users. At national level, monitoring and evaluation ensure that progress is measured, so that interventions can be modified and improved as necessary, helping to ensure that the most efficient use is made of limited resources. Internationally, the sharing of experience will help Parties to adapt and improve their strategies.

63. There are national and international data collection systems that can be used to inform and support the collection of monitoring and evaluation data.

Recommendation

64. Parties should monitor and evaluate all tobacco cessation and tobacco dependence treatment strategies and programmes, including process and outcome measures, to observe trends. They should benefit from the experience of other countries through the exchange of information, in accordance with the provisions of Articles 20, 21 and 22 of the WHO FCTC.

Actions

65. Formulate measurable objectives, determine the resources required, and identify indicators to enable the assessment of progress towards each objective.

66. Encourage health-care workers and service providers to participate in the monitoring of service performance through clearly defined indicators, taking account of national circumstances and priorities.

67. Use data collection systems that are practical and efficient, built on strong methodologies, and are appropriate to local circumstances.

INTERNATIONAL COOPERATION

Background

68. International cooperation between Parties is a treaty obligation under Article 22 of the WHO FCTC. International cooperation in tobacco cessation and tobacco dependence treatment is also a means of supporting and strengthening the implementation of the Convention.

Recommendation

69. Parties should collaborate at the international level to ensure that they are able to implement the most effective measures for tobacco cessation, in accordance with the provisions of Articles 20, 21 and 22 of the WHO FCTC.

¹ See the guidelines on implementation of Article 12 of the WHO FCTC adopted in decision FCTC/COP4(7), for a definition of research-based evidence.
**Actions**

70. Share tobacco cessation and treatment experiences with other Parties, including strategies to develop and fund support for cessation of tobacco use, national treatment guidelines, training strategies, and data and reports from evaluations of tobacco dependence treatment systems.

71. Where appropriate, use international reporting mechanisms, such as regular reporting on the implementation of the WHO FCTC, and take advantage of bilateral and multilateral contacts and agreements.

72. Review and revise these guidelines periodically to ensure that they continue to provide effective guidance and assistance to Parties.

(Ninth plenary meeting, 19 November 2010)
The Conference of the Parties,

Recalling the report of the study group on economically sustainable alternatives to tobacco growing to the Conference of the Parties at its third session;¹

Recalling its decision FCTC/COP3(16) establishing a working group on economically sustainable alternatives to tobacco growing in relation to Articles 17 and 18 of the WHO Framework Convention on Tobacco Control;

Noting the report of the working group to the Conference of the Parties at its fourth session on the progress of its work,²

1. DECIDES:

   (1) to request the working group established by decision FCTC/COP3(16) to continue its work and to submit a working report to the Conference of the Parties at its fifth session, that may include, inter alia, policy options and recommendations for implementation of economically sustainable alternatives to tobacco growing in relation to Articles 17 and 18;

   (2) to invite Parties, by 31 January 2011, to confirm to the Convention Secretariat their intention to continue as members of the working group or their intention to join the working group;³

2. ALSO DECIDES:

   (1) to request the Convention Secretariat to provide assistance and to make the necessary arrangements, including budgetary arrangements, for the working group to complete its work and to ensure, in consultation with the Bureau, that Parties have access to the draft text (for example via a protected web site) and can provide comments, before the circulation of policy options and recommendations to the Conference of the Parties;

¹ Document FCTC/COP/3/11.
³ Current membership of the working group is as follows:
   – Key Facilitators: Brazil, Greece, India, Mexico and Turkey;
   – Partners: Bangladesh, China, Djibouti, European Union, Georgia, Ghana, Iran (Islamic Republic of), Lao People’s Democratic Republic, Mali, Philippines, Syrian Arab Republic, Thailand, United Republic of Tanzania and Zambia.
(2) to adopt the timeline set out below:

(Ninth plenary meeting, 19 November 2010)
The Conference of the Parties,

Taking into account Article 7 (Non-price measures to reduce the demand for tobacco), Article 9 (Regulation of the contents of tobacco products) and Article 10 (Regulation of tobacco product disclosures) of the WHO Framework Convention on Tobacco Control (WHO FCTC);

Recalling its decision FCTC/COP1(15) to establish a working group to elaborate guidelines for implementation of Article 9 (Regulation of the contents of tobacco products) and Article 10 (Regulation of tobacco product disclosures) of the WHO FCTC, and its decision FCTC/COP2(14) to extend the work of the working group to include product characteristics, such as design features, to the extent that they affect the objectives of the WHO FCTC;

Recalling its decision FCTC/COP3(9) mandating the working group to continue to monitor the areas set out in its first progress report (document A/FCTC/COP/2/8) which include dependence liability and toxicology, to continue to examine the challenges and potential approaches to setting up a global data repository, to continue its work elaborating guidelines in a step-by-step process, and to submit a first set of draft guidelines to the Conference of the Parties for consideration at its fourth session;

Emphasizing that the aim of the guidelines is to assist Parties in meeting their obligations under Articles 9 and 10 of the WHO FCTC and to provide guidance for implementation of these Articles;

Mindful of the provisional nature of the guidelines and the need for periodical reassessment in light of the scientific evidence and country experience,

1. ADOPTS the partial guidelines for implementation of Article 9 (Regulation of the contents of tobacco products) and Article 10 (Regulation of tobacco product disclosures) of the WHO FCTC contained in the Annex to this decision;

2. WELCOMES the report of WHO’s Tobacco Free Initiative to the Conference of the Parties (document FCTC/COP/4/INF.DOC./2);

3. REQUESTS the Convention Secretariat:

(a) to invite WHO’s Tobacco Free Initiative to continue the validation of the analytical chemical methods for testing and measuring cigarette contents and emissions in accordance with the progress report (document FCTC/COP/3/6) and to inform the Conference of the Parties through the Convention Secretariat on a regular basis of the progress made;

(b) to make accessible, via a web site, the studies, research and other reference material used in the development of the guidelines for implementation of Articles 9 and 10 of the WHO FCTC;

4. DECIDES to mandate the working group to:

(a) continue its work in elaborating guidelines in a step-by-step process, and to submit draft guidelines on addictiveness and toxicity to future sessions of the Conference of the Parties for consideration;
(b) continue to monitor areas such as dependence liability and toxicology;

(c) examine the regulation of cigarette ignition propensity, as a product characteristic;

5. INVITES Parties, by 31 January 2011, to confirm to the Convention Secretariat their intention to continue as members of the working group or their intention to join the working group;¹

6. ALSO DECIDES, in accordance with decision FCTC/COP3(9):

(a) to request the Convention Secretariat to provide assistance and make the necessary arrangements including budgetary arrangements for the working group to continue its work, and to ensure, in consultation with the Bureau of the Conference of the Parties, that Parties have access to the draft text (for example, via a protected web site) and can provide comments before the circulation of the draft guidelines to the Conference of the Parties;

(b) to adopt the timeline set out below:

| Draft report made available by the Secretariat for comments by the Parties | At least six months before the opening day of the fifth session of the Conference of the Parties |
| Submission of the final report by the working group to the Secretariat | At least three months before the opening day of the fifth session of the Conference of the Parties |
| Circulation to the Conference of the Parties | At least 60 days before the opening day of the fifth session of the Conference of the Parties in accordance with Rule 8 of the Rules of Procedure of the Conference of the Parties |

¹ Current membership of the working group is as follows:
– Key Facilitators: Canada, European Union, Norway
– Partners: Algeria, Australia, Brazil, Bulgaria, China, Congo, Denmark, Finland, Ghana, Hungary, India, Jordan, Kenya, Mali, Mexico, Netherlands, Singapore, Thailand, Turkey, Ukraine, United Kingdom of Great Britain and Northern Ireland.
PARTIAL GUIDELINES FOR IMPLEMENTATION OF ARTICLES 9 AND 10 OF THE WHO FRAMEWORK CONVENTION ON TOBACCO CONTROL (REGULATION OF THE CONTENTS OF TOBACCO PRODUCTS AND OF TOBACCO PRODUCT DISCLOSURES)

1. PURPOSE, OBJECTIVES AND USE OF TERMS

1.1 PURPOSE

The purpose of the guidelines is to assist Parties in meeting their obligations under Articles 9 and 10 of the WHO Framework Convention on Tobacco Control (WHO FCTC). The guidelines, drawing on the best available scientific evidence and the experience of Parties, propose measures that may assist Parties in strengthening their tobacco-control policies through regulation of the contents and emissions of tobacco products and through regulation of tobacco product disclosures. Parties are also encouraged to implement measures beyond those recommended by these guidelines.

Whereas Article 9 deals with the testing and measuring of the contents and emissions of tobacco products, and their regulation, Article 10 deals with the disclosure of information on such contents and emissions to governmental authorities and the public. Owing to the close relationship between these two articles, guidance for their implementation has been consolidated into one set of guidelines.

1.2 OBJECTIVES

1.2.1 Regulation of the contents and emissions of tobacco products

One objective of the guidelines is to support Parties in developing effective tobacco product regulation. Tobacco product regulation has the potential to contribute to reducing tobacco-attributable disease and premature death by reducing the attractiveness of tobacco products, reducing their addictiveness (or dependence liability) or reducing their overall toxicity.

1.2.1.1 Attractiveness

Tobacco products are commonly made to be attractive in order to encourage their use. From the perspective of public health, there is no justification for permitting the use of ingredients, such as flavouring agents, which help make tobacco products attractive. Other measures to reduce the attractiveness of tobacco products have been included in the guidelines on the implementation of Articles 11 and 13 of the WHO FCTC.

The WHO FCTC, in its preamble, recognizes that tobacco products are harmful and create and maintain dependence. Any reduction of their attractiveness resulting from removing or reducing certain ingredients in no way suggests that those tobacco products are less dangerous for human health.

---

1 Parties are directed to the WHO FCTC web site (http://www.who.int/fctc/) where further sources of information on topics covered by these guidelines are maintained.

1.2.1.2 Addictiveness (dependence liability)

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

1.2.1.3 Toxicity

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

1.2.2 Disclosure to governmental authorities

Pursuant to Article 10, the primary objective of requiring disclosure to governmental authorities is to obtain from manufacturers and importers relevant information on the contents and emissions of tobacco products, as well as on their toxicity and addictiveness. This information is required for the development and implementation of relevant policies, activities and regulations, such as further analysis of tobacco product contents and emissions, monitoring of market trends, and assessment of tobacco industry claims.

1.2.3 Disclosure to the public

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

1.3 USE OF TERMS

“Attractiveness” refers to factors such as taste, smell and other sensory attributes, ease of use, flexibility of the dosing system, cost, reputation or image, assumed risks and benefits, and other characteristics of a product designed to stimulate use.

“Contents” means “constituents” with respect to processed tobacco, and “ingredients” with respect to tobacco products. In addition:

- “Constituents”:

   (This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

- “Ingredients” include tobacco, components (e.g. paper, filter), including materials used to manufacture those components, additives, processing aids, residual substances found in tobacco (following storage and processing), and substances that migrate from the packaging material into the product (contaminants are not part of the ingredients).

“Design feature” means a characteristic of the design of a tobacco product that has an immediate causal link with the testing and measuring of its contents and emissions. For example, ventilation

---

1 The guidelines are partial and will be completed in phases as new country experience, and scientific, medical and other evidence become available. Further progress will also depend on the validation of the analytical chemical methods for testing and measuring cigarette contents and emissions and other work pursuant to the decision by the Conference of Parties at its third session (decision FCTC/COP3(9)).

holes around cigarette filters decrease machine-measured yields of nicotine by diluting mainstream smoke.

“Emissions” are substances that are released when the tobacco product is used as intended. For example, in the case of cigarettes and other combusted products, emissions are the substances found in the smoke. In the case of smokeless tobacco products for oral use, emissions are the substances released during the process of chewing or sucking, and in the case of nasal use, refer to substances released by particles during the process of snuffing.

“Expanded tobacco” is tobacco that has been expanded in volume by quick volatilization of a medium such as dry ice.

“Reconstituted tobacco” is a paper-like sheet material comprised mainly of tobacco.

“Tobacco industry” means, as defined in Article 1 of the WHO FCTC, “tobacco manufacturers, wholesale distributors and importers of tobacco products”.

“Tobacco products”, as defined in Article 1 of the WHO FCTC, are “products entirely or partly made of the leaf tobacco as raw material which are manufactured to be used for smoking, sucking, chewing, or snuffing”.

2. PRACTICAL CONSIDERATIONS

2.1 APPROVAL AND IMPLEMENTATION OF MEASURES PURSUANT TO ARTICLE 9

As stated in Article 9 of the WHO FCTC, each Party shall, where approved by competent national authorities, adopt and implement effective legislative, executive and administrative or other measures, for the testing and measuring of the contents and emissions of tobacco products and for the regulation of these contents and emissions.

Parties should consider giving the authority responsible for tobacco control matters the responsibility for, or at a minimum the power to provide input into, the approval, adoption and implementation of the above-mentioned measures.

2.2 APPROVAL AND IMPLEMENTATION OF MEASURES PURSUANT TO ARTICLE 10

As stated in Article 10 of the WHO FCTC, each Party shall, in accordance with its national law, adopt and implement effective legislative, executive, administrative or other measures for the disclosure by manufacturers and importers of tobacco products to governmental authorities of information about the contents and emissions of tobacco products, as well as for the public disclosure of information about the toxic constituents of tobacco products and their emissions.

Parties should consider giving the authority responsible for tobacco control matters the responsibility for, or at a minimum the power to provide input into, the adoption and implementation of the above-mentioned measures.

2.3 FINANCING

Implementing effective tobacco product regulations and operating a programme for their administration require the allocation of significant resources by Parties. In order to alleviate
governmental budgetary pressure, Parties could consider placing these costs on the tobacco industry and retailers. There are various means of financing tobacco product regulation measures.

The list below sets out some options that Parties could consider using:

(a) designated tobacco taxes;
(b) tobacco manufacturing and/or importing licensing fees;
(c) tobacco product registration fees;
(d) licensing of tobacco distributors and/or retailers;
(e) non-compliance fees levied on the tobacco industry and retailers; and
(f) annual tobacco surveillance fees (tobacco industry and retailers).

See Appendix 1 for descriptive examples of means of financing tobacco product regulation measures.

2.4 LABORATORIES USED FOR PURPOSES OF DISCLOSURE

Laboratories used by manufacturers and importers of tobacco products for the purposes of disclosure to governmental authorities should be accredited in accordance with International Organization for Standardization (ISO) Standard 17025 (General requirements for the competence of testing and calibration laboratories), by a recognized accreditation body. The accreditation methods used should include, at a minimum, the methods set out in these guidelines.

2.5 LABORATORIES USED FOR COMPLIANCE PURPOSES

Laboratories used by Parties for compliance purposes should be either governmental laboratories or independent laboratories that are not owned or controlled, directly or indirectly, by the tobacco industry. In addition, such laboratories should be accredited as set out in the previous paragraph. Parties may consider making use of governmental or independent laboratories located in other countries.

2.6 CONFIDENTIALITY IN RELATION TO DISCLOSURE TO GOVERNMENTAL AUTHORITIES

Parties should not accept claims from the tobacco industry concerning the confidentiality of information that would prevent governmental authorities from receiving information about the contents and emissions of tobacco products. Governmental authorities should apply appropriate rules in accordance with their national laws when collecting information claimed to be confidential by tobacco manufacturers and importers in order to prevent unauthorized use and/or dissemination of this information.¹

2.7 CONFIDENTIALITY IN RELATION TO DISCLOSURE TO THE PUBLIC

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

¹ Guidance regarding public disclosure of this information is left to future guidelines.
2.8 CIVIL SOCIETY

Civil society has an important role to play in raising public awareness and building support for the regulation of the contents and emissions of tobacco products, and for the disclosure of information on these contents and emissions. Civil society should be involved as an active partner.

3. MEASURES

3.1 CONTENTS

3.1.1 Ingredients (Disclosure)

This section outlines measures that Parties could introduce to require the disclosure by manufacturers and importers of tobacco products of information about ingredients.

3.1.1.1 Background

By requiring manufacturers and importers to disclose information about ingredients to governmental authorities, valuable insight will be gained on the composition of tobacco products, which in turn will assist authorities in developing effective, product-appropriate measures.

3.1.1.2 Recommendations

(i) Parties should require that manufacturers and importers of tobacco products disclose to governmental authorities information on the ingredients used in the manufacture of their tobacco products at specified intervals, by product type and for each brand within a brand family. Contrary to disclosing ingredients as part of a combined list, disclosing on a brand-by-brand basis and in a standardized format will provide opportunities to governmental authorities to analyse trends in product composition and keep track of subtle changes in the market.

(ii) Parties should ensure that manufacturers and importers disclose to governmental authorities the ingredients used in the manufacture of each of their tobacco products and the quantities thereof per unit of each tobacco product, including those ingredients present in the product’s components (e.g. filter, papers, glue), for each brand within a brand family. Parties should not accept disclosure only of maximum quantities by category of ingredient, or only of the total quantity. To do so would seriously limit the kind of analysis that could be performed.

(iii) Parties should require that manufacturers and importers disclose further information on the characteristics of the tobacco leaves they used, for example:

- (i) type(s) of tobacco leaves (e.g. Virginia, Burley, Oriental), and percentage of each type used in the tobacco product;
- (ii) percentage of reconstituted tobacco used;
- (iii) percentage of expanded tobacco used;
- (iv) Parties should require that manufacturers and importers notify governmental authorities of any changes to tobacco product ingredients when the change is made;
(v) Parties should require that manufacturers and importers provide governmental authorities with a statement setting out the purpose of the inclusion of an ingredient in the tobacco product and other relevant information;

(vi) Parties should require that manufacturers disclose the name, address and other contact information of each ingredient’s supplier to facilitate direct disclosure to the Party by the supplier, where appropriate, and for compliance monitoring purposes.

3.1.2 Ingredients (Regulation)

This section outlines measures that Parties could introduce to regulate ingredients.

Parties should introduce the measures outlined in this section, in accordance with their national laws, taking into account their national circumstances and priorities.

Parties should consider scientific evidence, other evidence and experience of other countries when determining new measures on ingredients of tobacco products and they should aim to implement the most effective measures that they can achieve.

3.1.2.1 Background

Regulating ingredients aimed at reducing tobacco product attractiveness can contribute to reducing the prevalence of tobacco use and dependence among new and continuing users. The preamble to the WHO FCTC states that Parties recognize “that cigarettes and some other products containing tobacco are highly engineered so as to create and maintain dependence”.

Attractiveness and its impact on dependence should be taken into account when considering regulatory measures. The guidelines on implementation of Article 13 of the WHO FCTC, on tobacco product advertising, promotion and sponsorship, recommend that restrictions apply to as many as possible of the features that make tobacco products more attractive to consumers. Such features include coloured cigarette papers and attractive smells. Similarly, this section presents measures that will help limit inducements to use tobacco.

3.1.2.2 Tobacco products

(i) Ingredients used to increase palatability

The harsh and irritating character of tobacco smoke provides a significant barrier to experimentation and initial use. Tobacco industry documents have shown that significant effort has been put into mitigating these unfavourable characteristics. Harshness can be reduced in a variety of ways including: adding various ingredients, eliminating substances with known irritant properties, balancing irritation alongside other significant sensory effects, or altering the chemical properties of tobacco product emissions by adding or removing specific substances.

Some tobacco products contain added sugars and sweeteners. High sugar content improves the palatability of tobacco products to tobacco users. Examples of sugars and sweeteners used in these products include glucose, molasses, honey and sorbitol.

---

1 Examples include substances that are used as adhesives, binders, combustion modifiers, addictiveness enhancers, flavours, humectants, plasticizers, casings, smoke enhancers and colourings.
Masking tobacco smoke harshness with flavours contributes to promoting and sustaining tobacco use. Examples of flavouring substances include benzaldehyde, maltol, menthol and vanillin.

Spices and herbs can also be used to improve the palatability of tobacco products. Examples include cinnamon, ginger and mint.

**Recommendation:**

Parties should regulate, by prohibiting or restricting, ingredients that may be used to increase palatability in tobacco products.

Ingredients indispensable for the manufacturing of tobacco products and not linked to attractiveness should be subject to regulation according to national law.

(ii) Ingredients that have colouring properties

Colouring agents are added to various components of tobacco products to make the resulting product more appealing. Attractively-coloured cigarettes (e.g. pink, black, denim blue) have been marketed in some countries. Examples of colouring agents include inks (e.g. imitation cork pattern on tipping paper) and pigments (e.g. titanium dioxide in filter material).

**Recommendation:**

Parties should prohibit or restrict ingredients that have colouring properties in tobacco products. However, Parties should consider allowing the use of colouring agents for tax-related markings or for health warnings and messages.

(iii) Ingredients used to create the impression that products have health benefits

Various ingredients have been used in tobacco products to help create the impression that such products have health benefits, or to create the impression that they present reduced health hazards. Examples include vitamins, such as vitamin C and vitamin E, fruit and vegetables (and products resulting from their processing such as fruit juices), amino acids, such as cysteine and tryptophan, and essential fatty acids such as omega-3 and omega-6.

**Recommendation:**

Parties should prohibit ingredients in tobacco products that may create the impression that they have a health benefit.

(iv) Ingredients associated with energy and vitality

Energy drinks, popular with young people in some parts of the world, are perceived to increase mental alertness and physical performance. Examples of stimulant compounds contained in such drinks include caffeine, guarana, taurine and glucuronolactone. Tobacco industry documents and patent applications show that some of these (caffeine and taurine) have also been considered for use in tobacco products.

**Recommendation:**

Parties should prohibit ingredients associated with energy and vitality, such as stimulant compounds, in tobacco products.
3.1.3 Constituents (Disclosure)

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

3.1.4 Constituents (Regulation)

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

3.2 EMISSIONS

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

3.3 PRODUCT CHARACTERISTICS

3.3.1 Disclosure

This section outlines measures that Parties could introduce to require the disclosure by manufacturers and importers of tobacco products of information about product characteristics, such as design features.

3.3.1.1 Background

Collecting data on product characteristics, such as design features, will help Parties improve their understanding of the impact these characteristics have on smoke emission levels, properly interpret measurements obtained and, more importantly, keep abreast of any changes to cigarette design features.

3.3.1.2 Recommendations

(i) Parties should require that manufacturers and importers of tobacco products disclose information on design features to governmental authorities at specified intervals, and as appropriate, including the results of tests conducted by the tobacco industry.

(ii) In order to establish and maintain the consistency of the data reported to them by the tobacco industry, Parties should specify the recommended methods, where applicable, for the reporting of design features as set out in Appendix 2.

(iii) Parties should ensure that every manufacturer and importer provides to governmental authorities a copy of the laboratory report where a laboratory test was performed for the measurement of a particular design feature, as well as the proof of accreditation of the laboratory that performed the analysis.

(iv) Should there be any change to the design features of a particular brand of tobacco product, Parties should require that manufacturers notify governmental authorities of the change and provide the updated information when the change is made.
3.3.2 Regulation

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

3.4 DISCLOSURE TO GOVERNMENTAL AUTHORITIES – OTHER INFORMATION

3.4.1 Background

In order to put effective product regulation in place, including regulation of ingredients, it is essential that governmental authorities have accurate market information. Governmental authorities need to know the importance of a particular tobacco product compared to others to help determine regulatory needs and priorities. Furthermore, consistent with Article 20.2 of the WHO FCTC, information on tobacco companies and on their sales will help assess the magnitude and patterns of tobacco consumption.

3.4.2 Recommendations

Parties should require that manufacturers and importers of tobacco products disclose general company information, including the name, street address and contact information of the principal place of business and of each manufacturing and importing facility. This information may prove useful for compliance monitoring purposes.

Parties should consider requiring that tobacco manufacturers and importers disclose, at specified intervals, for each brand within a brand family, sales volume information in units (e.g. number of cigarettes or cigars, or weight of roll-your-own tobacco). These disclosures should be on a national basis, and where appropriate on a sub-national basis as well.

3.5 DISCLOSURE TO THE PUBLIC

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

4. COMPLIANCE AND ENFORCEMENT

4.1 COMPREHENSIVE APPROACH

Effective legislative, executive, administrative or other measures should impose legal responsibilities for compliance on manufacturers and importers of tobacco products and should provide penalties for violations. Legislative, executive, administrative or other measures should identify the authority or authorities responsible for enforcement, and should include a system both for monitoring compliance and for prosecuting violators.

4.2 INFRASTRUCTURE AND BUDGET

Parties should consider ensuring that the infrastructure necessary for compliance monitoring and enforcement activities exists. Parties should also consider providing a budget for such activities.

4.3 STRATEGIES

To enhance compliance, Parties should inform stakeholders of the requirements of the law before it comes into force.
Parties should consider using inspectors or enforcement agents to conduct regular visits to manufacturing and importing facilities, as well as at points of sale, to ensure compliance. It may not be necessary to create a new inspection system if mechanisms are already in place that could be extended to inspect business premises as required.

4.4 DEADLINE – PROHIBITED OR RESTRICTED INGREDIENTS

Parties should specify a deadline following which tobacco industry and retailers must only supply tobacco products that comply with requirements.

4.5 INSPECTIONS – PROHIBITED OR RESTRICTED INGREDIENTS

Parties should consider conducting visits to manufacturing facilities to verify whether any prohibited or restricted ingredient is being used. Inspection should include direct access to the raw supplies storage area and to the finished products storage area, as well as direct observation of the manufacturing process. Inspections should not constitute an approval or certification of the tobacco products, nor recognition of their manufacturing procedures.

4.6 SAMPLING AND TESTING – PROHIBITED OR RESTRICTED INGREDIENTS

Parties should consider having samples of tobacco products collected from importers’ facilities, from retail outlets and, where needed, from manufacturers’ facilities. These samples should then be tested for the presence of prohibited or restricted ingredients in laboratories used for compliance purposes (see Appendix 3).

4.7 AUDITS FOLLOWING DISCLOSURE TO GOVERNMENTAL AUTHORITIES

Parties should consider conducting audits at manufacturers’ facilities to ensure that information received concerning tobacco products is complete and accurate. Audits should not constitute an approval or certification of the tobacco products, nor recognition of their manufacturing procedures.

4.8 RESPONSE TO NON-COMPLIANCE

Parties should ensure that their enforcement authorities are prepared to respond quickly and decisively to instances of non-compliance. Strong, timely responses to early cases will make it clear that compliance is expected and will facilitate future enforcement. Parties should consider making the results of enforcement action public in order to send a strong message that non-compliance will be investigated and that appropriate action will be taken.

4.9 SANCTIONS

In order to deter non-compliance with the law, Parties should specify appropriate sanctions, such as criminal sanctions, monetary amounts, corrective actions, and the suspension, limitation or cancellation of business and import licences.

4.10 SEIZURE, FORFEITURE AND DESTRUCTION

Parties should ensure that they have authority to have non-compliant tobacco products seized, forfeited and destroyed, under supervision in accordance with national law.
4.11 PENALTIES

Parties should specify a range of fines or other penalties commensurate with the severity of the violation and whether it is a repeat violation.

5. INTERNATIONAL COOPERATION

International cooperation is essential if progress in tobacco product regulation and disclosure is to be made. Several articles of the WHO FCTC provide for the exchange of knowledge and experience to promote implementation. As stated in Article 22 of the WHO FCTC, such cooperation shall promote the transfer of technical, scientific and legal expertise and technology, as mutually agreed. It would result in the effective implementation of these guidelines and facilitate development of the best possible measures for regulating the contents of tobacco products.

6. MONITORING AND EVALUATION

(This section has been left blank intentionally to indicate that guidance will be proposed at a later stage.)

7. LINKS TO OTHER ARTICLES OF THE WHO FCTC

In the spirit of Articles 11 and 13 of the WHO FCTC, unless Parties have already adopted measures to ban any type of promotion on tobacco product packages (as outlined in the guidelines on Articles 11 and 13), Parties should consider imposing a ban on the sale of tobacco products whose packaging suggests the presence of an ingredient that has been prohibited or, where appropriate, restricted as per the above recommendations.

Appendix 1

Descriptive examples of means of financing tobacco product regulation measures

(a) Designated tobacco taxes

Designated tobacco taxes require a proportion of tobacco tax revenue to be allocated to a specified purpose or purposes, such as a tobacco-control programme or a health promotion fund. The proportion of tobacco tax revenue might be expressed as a percentage of revenue (e.g. 1%) or as a fixed monetary amount per unit (e.g. 25 cents per package of 20 cigarettes). Designated tobacco taxes are sometimes referred to as “earmarked tobacco taxes” or “hypothesized tobacco taxes”.

(b) Tobacco manufacturing and/or importing licensing fees

A licensing fee on tobacco manufacturers and/or importers could be implemented in a number of ways. The fee could be a specified monetary amount per company, regardless of company size. (A separate fee might be required for each manufacturing and/or importing facility.) The fee could be a fixed monetary amount per unit sold (e.g. a certain amount per cigarette or package of cigarettes, or per gram for certain types of tobacco products). The fee could be based on a total amount for all companies, and determined on the basis of a company’s market share (e.g. if the total amount to be paid by all companies was US$ 100 million and a company’s market share was 20%, and the company’s license fee would be US$ 20 million). The required fee might have to be paid at specified intervals, such as prior to the beginning of an annual
period. Where a fee is based on a monetary amount per unit sold, the payment interval might be more frequent, e.g. monthly.

(c) Tobacco product registration fees

Tobacco product registration fees involve requiring the manufacturer and/or importer, or potentially a wholesale distributor, to register each tobacco product sold by the company and to pay an accompanying fee. The amount of the fee might be set at a level such that government costs (or average costs) associated with the product, such as testing, measuring and enforcement, are fully or partially recovered. The required fee might have to be paid at specified intervals, e.g. prior to the beginning of an annual period.

(d) Licensing of tobacco distributors and/or retailers

A licensing fee could be placed on distributors or retailers, or both. The fee could be a specified monetary amount per outlet, regardless of company size. (A separate fee might be required for each manufacturing and/or importing facility.) The fee could vary based on the size of the distributor and/or retailer, e.g. based on sales volume. The fee might be set at varying amounts depending on sales volume (either units or total monetary amount), e.g. a fee if sales are not higher than amount A, a higher fee if sales are between amount A and amount B, and a further increased fee if sales are higher than amount B. The required fee might have to be paid at specified intervals, e.g. prior to the beginning of an annual period.

(e) Non-compliance fees levied on the tobacco industry and retailers

Revenue could be collected from administrative monetary penalties. Administrative monetary penalties are a form of civil penalty in which an administrative body seeks monetary relief against an individual or corporate body as restitution for unlawful activity. Revenue could also be collected from fines imposed by a court.

(f) Annual tobacco surveillance fees (tobacco industry and retailers)

Annual tobacco surveillance fees involve assessing the amount to be paid by the tobacco industry and/or retailers for monitoring and enforcement. For tobacco manufacturers/importers/distributors, this could be a fixed amount per company, a fixed amount for each brand variation sold, a fixed amount per unit sold, or an amount based on market share. For tobacco retailers (or others), a separate licence and fee might be required for each retail outlet.

Appendix 2

Design features of cigarettes¹

(a) Dimensions, diameter and weight
(b) Length of filter, shape of the cross-section of the filter
(c) Length of tipping paper
(d) Dimensions and shape of the cross-section of the tobacco rod

¹ See ISO 9512 (Cigarettes – Determination of ventilation – Definitions and measurement principles) for an explanation of the terms used here.
(e) Distance of ventilation holes from butt mark in millimetres

(f) Draw resistance of cigarette as determined in accordance with ISO 6565 (Tobacco and tobacco products – Draw resistance of cigarettes and pressure drop of filter rods – Standard conditions and measurement)

(g) Degree of filter ventilation as determined in accordance with ISO 9512 (Cigarettes – Determination of ventilation – Definitions and measurement principles)

(h) Degree of paper ventilation as determined in accordance with ISO 9512 (Cigarettes – Determination of ventilation – Definitions and measurement principles)

(i) Type of cigarette paper used and its air permeability or porosity determined in accordance with ISO 2965 (Materials used as cigarette papers, filter plug wrap and filter joining paper, including materials having an oriented permeable zone – Determination of air permeability)

(j) Product firmness (nominally a measure of packing density)

(k) Pressure drop of the filter as determined in accordance with ISO 6565 (Tobacco and tobacco products – Draw resistance of cigarettes and pressure drop of filter rods – Standard conditions and measurement)

(l) Moisture content as determined in accordance with Association of Official Analytical Chemists Official Method 966.02 (Loss on drying (moisture) in tobacco)\(^1\)

(m) Type of filter (for example, cellulose acetate) and other characteristics, where applicable (for example, charcoal content)

Appendix 3

**Analytical methods for ingredients**

(a) For the purposes of compliance monitoring and enforcement, there may be cases in which analytical methods would be required to confirm the presence of prohibited or restricted ingredients. Such methods typically consist of several distinct steps: sampling, sample preparation, separation, identification, quantification and data analysis.

(b) Analytical procedures should be carried out by properly trained personnel in a suitably equipped laboratory. Such procedures frequently involve the use of hazardous materials. To ensure the correct and safe execution of these procedures, it is essential that laboratory personnel follow standard safety procedures for the handling of hazardous materials.

(c) For ingredients that are also food additives, suitable analytical methods may be found in the *Combined compendium of food additive specifications (volume 4).*\(^2\) This document

---

provides a reference for the analytical methods mentioned in the specifications for the identity of additives used in foods or in food production.

(d) For ingredients such as flavouring agents which have a low-boiling point (that is, which vaporize easily at low temperatures), a technique called “headspace-gas chromatography” may be used. A description of this method may be found in the Combined compendium of food additive specifications (volume 4).

(e) Another laboratory technique for sampling ingredients with a low boiling point, which can be combined for separation, identification and quantification with gas chromatography/mass spectrometry, is called “solid-phase microextraction”. It is very similar to headspace analysis, but differs in that the headspace is concentrated.

(Tenth plenary meeting, 20 November 2010)

FOURTH CONFERENCE OF THE PARTIES

FCTC/COP4(11) Draft protocol to eliminate illicit trade in tobacco products

The Conference of the Parties,

Recalling its decisions FCTC/COP2(12) and FCTC/COP3(6);

Acknowledging the progress made by the Intergovernmental Negotiating Body on a Protocol on Illicit Trade in Tobacco Products as presented in the draft protocol to eliminate illicit trade in tobacco products contained in document FCTC/COP/4/5;

Taking note of the report of the Chairperson of the Intergovernmental Negotiating Body to the fourth session of the Conference of the Parties contained in document FCTC/COP/4/4;

DECIDES:

(1) to extend the mandate of the Intergovernmental Negotiating Body established by decision FCTC/COP2(12) of the Conference of the Parties to a final session to be held for one week early in 2012, for the purpose of finalizing the text of a draft protocol to eliminate illicit trade in tobacco products, based on the draft text contained in document FCTC/COP/4/5;

(2) to request the Intergovernmental Negotiating Body to submit the text of a draft protocol to eliminate illicit trade in tobacco products to the fifth session of the Conference of the Parties, in accordance with Article 33.3 of the WHO Framework Convention on Tobacco Control, for consideration;

(3) to request the Convention Secretariat:

(a) to make the necessary arrangements, including budgetary arrangements, for the performance of the work of the Intergovernmental Negotiating Body;

(b) to facilitate the participation of low-income and lower-middle-income Parties in the work of the Intergovernmental Negotiating Body;\(^1\)

(c) to make the necessary arrangements, in consultation with interested Parties, prior to the fifth session of the Conference of the Parties, to ensure the accuracy of the Arabic, Chinese, French, Russian and Spanish translations of the English text of the draft protocol to eliminate illicit trade in tobacco products;

(4) to establish an informal working group to work during the period between the fourth session of the Conference of the Parties and the final session of the Intergovernmental Negotiating Body on:

(a) those articles in Part III (Supply Chain Control) of the draft protocol that have not yet been agreed;

(b) matters referred to the Conference of the Parties by the Intergovernmental Negotiating Body,\(^2\) namely:

\(^1\) In accordance with decision FCTC/COP4(21).

(i) the method of financing of the protocol, currently referred to in Article 35 of the draft protocol;

(ii) whether the provisions on mutual legal assistance and extradition (currently referred to in Articles 30–32 of the draft protocol) need to be retained in the draft protocol; and

(iii) how to cover the issue of protection of personal data in the draft protocol;

(c) how the text of the draft protocol, and its implementation, can best complement existing relevant agreements and arrangements, including the United Nations Convention against Corruption and the United Nations Convention against Transnational Organized Crime, in order to maximize synergy and to avoid duplication. This should involve discussions with the United Nations Office on Drugs and Crime, the World Customs Organization and other relevant international bodies. Within this, a particular issue is where the global information sharing focal point should be organizationally located;

(5) that the working group will develop possible text for the articles referred to in paragraph 4(a) above, to facilitate further negotiations at the final session of the Intergovernmental Negotiating Body;

(6) that the working group will make proposals with regard to the matters mentioned in sub-paragraphs 4(b) and (c) above;

(7) that each WHO region will nominate not more than five Parties to comprise the working group, and that each Party will not be represented by more than one person in the working group;

(8) that each WHO region will communicate the nominated persons to the Convention Secretariat through (to be determined) not later than (to be determined);

(9) to invite:

(a) relevant intergovernmental organizations that are accredited observers to the Conference of the Parties with specific expertise in the matters under the mandate of the working group to nominate not more than one representative; and

(b) nongovernmental organizations that are accredited observers to the Conference of the Parties collectively to nominate not more than four representatives with specific expertise in the matters under the mandate of the working group who will participate, in an expert capacity, as observers to the working group;

(c) observers under Rule 29 of the Rules of procedure of the Conference of the Parties with specific expertise in the matters under the mandate of the working group.

(Tenth plenary meeting, 20 November 2010)

1 Secretariat note: the Secretariat will seek the guidance of the Bureau of the Conference of the Parties on the process and timeline for nominations.
FCTC/COP4(12)  Measures that would contribute to the elimination of cross-border advertising, promotion and sponsorship of tobacco products

The Conference of the Parties,

Recalling its decisions FCTC/COP2(8), FCTC/COP3(12), FCTC/COP3(13) and FCTC/COP3(14);

Taking note of the report of the Convention Secretariat contained in document FCTC/COP/4/10,

DECIDES:

subject to the prioritization of work by the Conference of the Parties,

(1) to establish an expert group on cross-border advertising, promotion and sponsorship according to the recommendations contained in document FCTC/COP/4/10, comprising a maximum of 15 members;

(2) to mandate the expert group to:

(a) keep the Conference of the Parties up to date on relevant developments in technology in cross-border tobacco advertising, promotion and sponsorship, and in best practices for responding to cross-border tobacco advertising, promotion and sponsorship;

(b) monitor and review the guidelines for implementation of Article 13 of the WHO Framework Convention on Tobacco Control and the arrangements established to facilitate international cooperation between Parties with respect to cross-border tobacco advertising, promotion and sponsorship; and

(c) report to the Conference of the Parties, through the Convention Secretariat, on the performance of its functions;

drawing on, inter alia, the experience of the former expert group on cross-border advertising, promotion and sponsorship established by the Conference of the Parties at its first session,

(3) to request the Convention Secretariat:

(a) to invite Parties to nominate members to the expert group, in a manner to be decided by the Bureau of the Conference of the Parties, taking into account appropriate regional and technical representation;

(b) to make the necessary arrangements, including budgetary arrangements, for the performance of the work of the expert group.

(Tenth plenary meeting, 20 November 2010)

---

1 Decision FCTC/COP1(16).
FCTC/COP4(13) Working group on Article 6 (Price and tax measures to reduce the demand for tobacco)

The Conference of the Parties,

Recalling its decision FCTC/COP3(8), which invited WHO’s Tobacco Free Initiative, through the Convention Secretariat, to develop a comprehensive technical report relating to price and tax policies, based on expert advice;

Noting the report on price and tax policies (in relation to Article 6 of the WHO Framework Convention on Tobacco Control (WHO FCTC)) prepared by WHO’s Tobacco Free Initiative and presented by the Convention Secretariat for consideration by the Conference of the Parties at its fourth session;¹

Recalling Article 6.2 of the WHO FCTC, which recognizes the sovereign right of Parties to determine and establish their taxation policies,

DECIDES:

(1) to establish a working group composed of fiscal and health experts for the elaboration of guidelines for implementation of Article 6 (Price and tax measures to reduce the demand for tobacco) of the WHO FCTC, which shall present a progress report or, if possible, draft guidelines for consideration by the Conference of the Parties;

(2) to request the working group to take into account the report prepared by WHO’s Tobacco Free Initiative and presented by the Convention Secretariat for consideration by the Conference of the Parties at its fourth session, as well as the comments provided on the report at that session;

(3) to request the Convention Secretariat to invite observers under Rule 29 of the Rules of Procedure of the Conference of the Parties with specific expertise in this area and relevant intergovernmental and nongovernmental organizations with specific expertise in this area to actively participate in and contribute to the work of the working group;

(4) to establish initial membership of the working group as follows:

Key Facilitator: Thailand

Partners: Brazil, Central African Republic, Chad, Congo, Cook Islands, Djibouti, Egypt, Ghana, Guatemala, India, Jamaica, Jordan, Kenya, Maldives, Namibia, Nigeria, Palau, Paraguay, Philippines, Senegal, Swaziland, Syrian Arab Republic, Tunisia, Turkey, Uganda, United Republic of Tanzania and Zambia;

(5) to set 31 January 2011 as the deadline for other Parties to announce to the Convention Secretariat their participation as partners or Key Facilitators in the working group;

(6) to invite Parties to nominate members to the working group, in a manner to be decided by the Bureau of the Conference of the Parties, taking into account appropriate regional and technical representation;

¹ Document FCTC/COP/4/11.
(7) to make the necessary arrangements, including budgetary arrangements, for the performance of the work of the working group.

(Tenth plenary meeting, 20 November 2010)
The Conference of the Parties,

Taking note of the report by the Convention Secretariat on smokeless tobacco products and electronic cigarettes contained in document FCTC/COP/4/12,

DECIDES:

to request the Convention Secretariat to prepare jointly with WHO’s Tobacco Free Initiative a comprehensive report based on the experience of Parties on the matter of smokeless tobacco products and nicotine delivery systems including electronic cigarettes for consideration at the fifth session of the Conference of the Parties.

(Tenth plenary meeting, 20 November 2010)

The Conference of the Parties,

Taking note of the report by the Convention Secretariat on liability contained in document FCTC/COP/4/13,

DECIDES:

to request the Convention Secretariat to prepare jointly with WHO’s Tobacco Free Initiative a comprehensive report on the matter of liability in the context of Article 19 of the WHO Framework Convention on Tobacco Control, including possible mechanisms on appropriate means by which the Conference of the Parties could support Parties in their activities in accordance with this Article, for consideration at the fifth session of the Conference of the Parties.

(Tenth plenary meeting, 20 November 2010)
DECIDES:

(1) to replace the existing cycle of submission of Parties’ implementation reports, which is linked to the date of the entry into force of the WHO FCTC for each individual Party, with a new standardized cycle of two-year implementation reports synchronized with the biennial cycle of the regular sessions of the Conference of the Parties. In order to put this decision into effect:

(a) to request the Parties to submit their reports on implementation of the WHO FCTC at regular two-year intervals, with a submission date of not later than six months before the next regular session of the Conference of the Parties;

(b) to request the Convention Secretariat to inform Parties of the submission procedures and deadline not later than 12 months before such a deadline;

(c) to also request the Convention Secretariat to submit global progress reports on implementation of the WHO FCTC, based on the reports of the Parties submitted by that deadline, for the consideration of each regular session of the Conference of the Parties;

(d) to put the above arrangements into effect starting from 2012, with the first reports of Parties according to the new cycle to be submitted at least six months before the fifth session of the Conference of the Parties, which is due to take place in that year, and every second year thereafter. In the transition period between the fourth and fifth sessions of the Conference of the Parties, Parties submitting their implementation reports in 2011 according to the existing cycle will not be required to report again in 2012.

(2) to adopt the phase 2 (Group 2 questions) of the reporting instrument, as amended in accordance with Annex 2 of document FCTC/COP/4/15, as the single reporting instrument for Parties’ biennial reports to the Conference of the Parties, and to request the Convention Secretariat to make available the instrument on the WHO FCTC web site, along with the step-by-step instructions adjusted accordingly, within three months of the close of the fourth session of the Conference of the Parties;
(3) to invite WHO to use the data received through Parties’ implementation reports as a principal source of information for relevant surveillance and monitoring activities, avoiding the use of a parallel international system for regular collection of data concerning tobacco control;

(4) to request the Convention Secretariat, under the guidance of the Bureau of the Conference of the Parties and in cooperation with competent authorities within WHO, in particular the Tobacco Free Initiative, as well as relevant intergovernmental and nongovernmental organizations with specific expertise in this area, to prepare and submit a report for consideration by the fifth session of the Conference of the Parties containing:

(a) recommendations for taking into account, in the reporting instrument of the WHO FCTC, the key measures contained in the guidelines adopted by the Conference of the Parties;

(b) further recommendations for the standardization of definitions and indicators deriving from specific articles of the WHO FCTC and the guidelines adopted by the Conference of the Parties, and for the promotion of their use by the Parties in their national data collection initiatives, as outlined in the report contained in document FCTC/COP/4/15;

(c) recommendations to better facilitate regular review of progress in implementation of the WHO FCTC.

(Tenth plenary meeting, 20 November 2010)
The Conference of the Parties,

Noting the reports of the Secretariat on financial resources and mechanisms of assistance and cooperation with international organizations and bodies for strengthening implementation of the WHO Framework Convention on Tobacco Control (WHO FCTC);{2}

Noting also the report of the United Nations Secretary-General to the 2010 substantive session of the Economic and Social Council and in particular the action points on implementation of the Convention under the United Nations Development Assistance Frameworks (UNDAFs);

Reaffirming that implementation of the WHO FCTC under the UNDAFs is a strategic approach ensuring long-term and sustainable implementation, monitoring and evaluation of implementation progress for developing country Parties and Parties with economies in transition, and that it encourages developing country Parties and Parties with economies in transition to utilize the opportunities for assistance under the UNDAFs;

Recalling the measures under the WHO FCTC including objectives, guiding principles and general obligations, demand and supply side measures for tobacco control sustainability and protection of the environment, scientific and technical cooperation, communication of information and institutional arrangements and financial resources, and in this regard;

Recalling, in particular, Articles 22, 23.5(e) and (g), 24.3(e), 25 and 26 of the WHO FCTC, highlighting the importance of international cooperation in implementation of the Convention;

Further recalling earlier decisions of the Conference of the Parties{3} to strengthen the financial resources and mechanisms of assistance to developing country Parties and Parties with economies in transition, including decision FCTC/COP1(13), in which the Conference of the Parties decided, inter alia, to strongly encourage all international and regional organizations to support activities related to tobacco control and to acknowledge its role in the achievement of the Millennium Development Goals, especially those related to poverty reduction, gender empowerment, reduction of child mortality, environmental sustainability and global partnership for development;

Taking note of the fact that summary reports of implementation of the WHO FCTC by the Parties reveal that lack of resources is one of the most important obstacles to implementation of the Convention;

Recognizing the importance of financial resources, mechanisms of assistance and international cooperation in implementation of the WHO FCTC and taking note of the Convention Secretariat database on available resources;

Reaffirming the importance of international cooperation and the potential contribution of the United Nations system, particularly through the UNDAFs and the role of other relevant international, regional and subregional organizations, financial institutions and other potential development partners in assisting the Parties in implementation of the WHO FCTC;

---

1 Document FCTC/COP/4/16.
3 Decisions FCTC/COP1(13) and FCTC/COP2(10).
Welcoming efforts within the United Nations system to address noncommunicable diseases, including resolution A/RES/64/265, in which the United Nations General Assembly decided to convene a high-level meeting of the General Assembly in September 2011, with the participation of Heads of State and Government, on the prevention and control of noncommunicable diseases;

Endorsing the recognition in resolution A/RES/64/265 of the enormous human suffering caused by noncommunicable diseases, such as cardiovascular diseases, cancers, chronic respiratory diseases and diabetes, and the threat they pose to the economies of many States, leading to increasing inequalities between countries and populations, thereby threatening the achievement of internationally agreed development goals, including the Millennium Development Goals;

Considering that resolution A/RES/64/265 underlined the importance for States to continue addressing key risk factors for noncommunicable diseases, including through the implementation of the WHO FCTC, and emphasizing the role of tobacco control as a leading strategy to combat noncommunicable diseases,

1. DECIDES to:

   (1) urge all Parties to implement the WHO FCTC, recalling that it is their primary responsibility and that governments of developing countries are in the driving seat of tobacco control activities, which is essential for countries’ ownership in accordance with the Paris Declaration on Aid Effectiveness and the Accra Agenda for Action;

   (2) call upon Parties, particularly developed country Parties, to include support to the implementation of the WHO FCTC as an eligible area of bilateral assistance programmes provided this assistance can be eligible to official development assistance (ODA);

   (3) urge Parties to share their technical, legal and scientific expertise and technologies in implementing the WHO FCTC and to assess and share their needs in light of their total obligations under the WHO FCTC;

   (4) call upon Parties to support the inclusion of full and rapid implementation of measures required under the WHO FCTC as a key goal of the international community and the inclusion of tobacco control in the successor goals of the internationally agreed development goals and any subsequent global indicators of development;

   (5) call upon relevant international, regional and subregional organizations, international financial institutions and other partners to build capacity and allocate resources in support of global implementation of the WHO FCTC, particularly the needs identified in developing country Parties and Parties with economies in transition.
2. FURTHER DECIDES to request the Convention Secretariat to:

   (1) continue to actively work in accordance with Article 24.3(e) of the WHO FCTC and in line with paragraph 22 of the report on cooperation with international organizations and bodies,¹ and in particular with the United Nations agencies responsible for implementation of the UNDAFs and coordination of the delivery of assistance, for strengthening implementation of the WHO FCTC at country level, and to present a report on progress made in this area to the next regular session of the Conference of the Parties. This report would include the assessment of implementation mechanisms at the international, regional and country levels;

   (2) take the necessary action to coordinate with the relevant United Nations agencies, funds and programmes and other development partners to assist developing country Parties and Parties with economies in transition to utilize the opportunities for assistance, including under the UNDAFs;

   (3) actively engage in and contribute to the holding of the high-level meeting of the General Assembly requested in resolution A/RES/64/265, and the special meeting of the Ad Hoc Interagency Task Force on Tobacco Control requested in resolution E/2010/L.26, and to report to the fifth session of the Conference of the Parties on the outcomes of these meetings and any impacts on the mobilization of resources for implementation of the WHO FCTC;

   (4) make the database on available resources, established in line with the decision of the Conference of the Parties, available to the Parties and update the available information in the database on a continuous basis, actively identify and facilitate access to resources upon request by Parties, and whenever possible earmark extrabudgetary resources from the WHO FCTC budget for specific implementation activities;

   (5) actively work to raise the necessary extrabudgetary resources to implement the required activities, as contained in the workplan for the biennium 2012–2013,² to facilitate assistance to Parties in implementation of the WHO FCTC, including, in particular, the conduct of needs assessments in cooperation with WHO’s Tobacco Free Initiative and relevant development partners;

   (6) undertake, under the guidance of the Bureau of the Conference of the Parties and with the assistance of competent authorities within WHO, in particular the Tobacco Free Initiative, as well as Parties particularly interested in the issue and relevant intergovernmental and nongovernmental organizations, a review of progress in the mobilization of resources and the performance of the mechanisms of assistance to support implementation of the WHO FCTC, and to submit a report and recommendations based on this review to the fifth session of the Conference of the Parties.

   (Tenth plenary meeting, 20 November 2010)

¹ Document FCTC/COP4/17.
² Decision FCTC/COP4(20)
FCTC/COP4(18) Cooperation between the Convention Secretariat and the World Trade Organization

The Conference of the Parties,

Recalling the preamble to the WHO Framework Convention on Tobacco Control (WHO FCTC), which states that Parties to the Convention are “determined to give priority to their right to protect public health”;

Having considered the report by the Convention Secretariat on cooperation with international organizations and bodies for strengthening implementation of the Convention (document FCTC/COP/4/17);

Welcoming progress made in establishing cooperative relations with international organizations towards implementation of the Convention, particularly activities related to achievement of the Millennium Development Goals and other aspects of the global development agenda;

Recalling that the Fifty-ninth World Health Assembly noted the need for all relevant ministries, including those of health, trade, commerce, finance and foreign affairs, to work together constructively in order to ensure that the interests of trade and health are appropriately balanced and coordinated, and requested the Director-General to continue collaborating with the competent international organizations in order to support policy coherence between trade and health sectors at regional and global levels (resolution WHA59.26);

Recalling that the joint 2002 study by WHO and the World Trade Organization (WTO) Secretariat on WTO agreements and public health\(^1\) recognizes that health and trade policy-makers can benefit from closer cooperation to ensure coherence between their different areas of responsibilities;

Mindful that closer cooperation with the WTO specifically on tobacco-control issues would support Parties to the WHO FCTC in implementing the Convention;

Recalling that WHO has observer status in the WTO Technical Barriers to Trade Committee and that it has ad hoc observer status in the TRIPS and GATS Councils,

1. REQUESTS the Convention Secretariat to invite WHO to develop, in consultation with the Convention Secretariat and appropriate international organizations or bodies, a comprehensive report for presentation to the fifth session of the Conference of the Parties that explores options for cooperation with the WTO on trade-related tobacco-control issues as a means of strengthening implementation of the Convention, and that makes recommendations on the feasibility of implementing the identified options;

2. REQUESTS the Convention Secretariat to:

   (1) cooperate with the WTO Secretariat with the aim of information sharing on trade-related tobacco control issues;

   (2) monitor trade disputes regarding WHO FCTC-related tobacco control measures and other trade-related issues of relevance to the implementation of the Convention;

(3) facilitate information sharing on trade-related issues between Parties to the WHO FCTC, by creating links between Parties having similar problems;

(4) to communicate regularly with the relevant WHO offices on tobacco-control issues raised at WTO committees and report on these activities regularly to the Conference of the Parties.

(Tenth plenary meeting, 20 November 2010)
The Conference of the Parties,

Taking note of the report of the Secretariat on South–South cooperation and the implementation of the WHO Framework Convention on Tobacco Control (WHO FCTC);¹

Acknowledging the potential of technological, scientific and economic cooperation among the developing countries, particularly with reference to the 30-year report on the promotion of South–South cooperation by the United Nations Secretary-General, ² and the growing significance of triangular cooperation in international development cooperation;

Further acknowledging the role of the Parties, South–South and triangular cooperation networks and institutions as well as existing mechanisms under the United Nations system in facilitating the implementation of the WHO FCTC at country, regional and global levels;

Recognizing the importance attached to South–South cooperation in its previous sessions,³ particularly in view of the fact that the tobacco epidemic disproportionately affects populations in developing countries, and of its expected growth in developing countries in the future;

Further recognizing the importance of South–South and triangular cooperation in international development assistance mechanisms in general, and in the context of implementation of the WHO FCTC in particular,

1. DECIDES to reaffirm the importance of South–South and triangular cooperation in implementation of the WHO FCTC and call upon Parties to actively consider promotion of South–South and triangular cooperation for implementation of the WHO FCTC;

2. REQUESTS the Convention Secretariat:

(1) to actively work in the areas of potential South–South and triangular cooperation and actively engage with the appropriate institutions and networks in areas as mentioned in paragraphs 27 and 32, respectively, of the Convention Secretariat report on South–South cooperation and the implementation of the WHO FCTC;⁴

(2) to provide appropriate inputs and information on opportunities available to the Parties for South–South and triangular cooperation and to promote transfer of technical, scientific and legal expertise and technology for tobacco control in accordance with Articles 22 and 25 of the WHO FCTC;

(3) to continue its efforts to raise the required extrabudgetary resources for implementation of activities related to South–South cooperation and prepare a comprehensive report on the work undertaken to promote South–South and triangular cooperation to be presented to the Conference of the Parties at its next regular session.

(Tenth plenary meeting, 20 November 2010)

FCTC/COP4(20)  Workplan and budget for the financial period 2012–2013

The Conference of the Parties,

Reaffirming its decision FCTC/COP1(9) on the adoption of the Financial Rules of the Conference of the Parties to the WHO Framework Convention on Tobacco Control;

Recalling its decision FCTC/COP3(19) on the workplan and budget for the financial period 2010–2011,

DECIDES:

(1) to adopt the budget for the financial period 2012–2013 as follows:

<table>
<thead>
<tr>
<th>1. Activity costs, including:</th>
<th>USD</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Conference of the Parties</td>
<td>1,560,000</td>
</tr>
<tr>
<td>1.2 Protocols, guidelines and other possible instruments for the implementation of the Convention</td>
<td>1,960,000</td>
</tr>
<tr>
<td>1.3 Reporting arrangements under the Convention</td>
<td>445,000</td>
</tr>
<tr>
<td>1.4 Assistance to Parties in implementation of the Convention, with particular focus on developing country Parties and Parties with economies in transition</td>
<td>2,610,000</td>
</tr>
<tr>
<td>1.5 Coordination with international and regional intergovernmental organizations and bodies</td>
<td>451,000</td>
</tr>
<tr>
<td>1.6 Administration and management, and other arrangements and activities</td>
<td>220,000</td>
</tr>
<tr>
<td>Subtotal</td>
<td>7,246,000</td>
</tr>
</tbody>
</table>

2. Staff cost | 5,942,000 |

3. Programme support cost (13%) | 1,714,000 |

Total | 14,902,000 |

(2) to adopt the workplan for the financial period 2012–2013, as indicated in Annex 1 to this decision, taking into account the decisions taken by the Conference of the Parties at its fourth session;

(3) to adopt the table showing the distribution of voluntary assessed contributions for the financial period 2012–2013, as indicated in Annex 2 to this decision;

(4) to authorize the Convention Secretariat to request the payment of voluntary assessed contributions, including from countries that may become a Party to the Convention between the fourth and fifth sessions of the Conference of the Parties, in line with the scale of assessment as indicated in Annex 2;

(5) to request the Head of the Convention Secretariat to implement the Conference of the Parties budget and workplan, and to submit to the Conference of the Parties:
(a) an interim performance report along with a final performance report on the workplan and budget for the financial period 2010–2011, at its fifth session; and

(b) a final performance report on the workplan and budget for the financial period 2012–2013, at its sixth session;

(5) to authorize the Convention Secretariat to seek and receive voluntary extrabudgetary contributions for activities in line with the workplan;

(6) to encourage Parties to the Convention to provide extrabudgetary contributions for meeting the objectives of the workplan;

(7) to review progress made in implementation of the workplan and budget for the financial period 2012–2013 at the fifth session of the Conference of the Parties and make revisions, if necessary, in light of the availability of funds that are required for its full implementation;

(8) to call on the Head of the Convention Secretariat to keep the Bureau regularly updated on the status of budget and workplans agreed by the Conference of the Parties.

Total: 8 757 000  350 000  9 107 000

1 Figures rounded to the nearest dollar.

2 The additional contribution of a total of US$ 350 000 as reflected in this table is a one-time exception as agreed among the Parties. This is to facilitate funding for projected expenditure through additional voluntary assessed contributions.

(Tenth plenary meeting, 20 November 2010)
FCTC/COP4(21)  Harmonization of travel support available to Parties to the WHO Framework Convention on Tobacco Control in line with current World Health Organization administrative policies for travel support

The Conference of the Parties,

Recalling World Health Assembly resolution WHA 50.1,

DECIDES to harmonize the travel support available to Parties to the WHO Framework Convention on Tobacco Control in line with current WHO administrative policies for travel support in favour of least developed countries;

DECIDES to finance the per diem of least developed countries on the same basis until and including the fifth session of the Conference of the Parties;

DECIDES to continue to finance travel for low- and lower-middle-income countries on the budget financed by voluntary assessed contributions, and to cover the costs of the corresponding per diem with resources available in the extrabudgetary funds until and including the fifth session of the Conference of the Parties;

REQUESTS the Convention Secretariat to prepare a full report on this issue taking into consideration the severe budgetary constraints for consideration by the fifth session of the Conference of the Parties.

(Tenth plenary meeting, 20 November 2010)
FCTC/COP4(22)  Arrears in the payment of financial contributions

The Conference of the Parties,

Recalling the current budget constraints and bearing in mind the priority that should be given to operational work under the WHO Framework Convention on Tobacco Control (WHO FCTC);

Deeply concerned by the present situation whereby a very large number of Parties still have outstanding voluntary assessed contributions and that a number of Parties have never paid any of their voluntary assessed contributions,

1. REQUESTS the Convention Secretariat to prepare and present to the fifth session of the Conference of the Parties a report on ways and means to improve payment of voluntary assessed contributions to the WHO FCTC taking into account relevant practice in the United Nations system;

2. URGES all Parties, mainly those which are in a position to do so, to comply with their contributions in due time.

(Tenth plenary meeting, 20 November 2010)
FCTC/COP4(23)  

Review of accreditation of nongovernmental organizations with observer status to the Conference of the Parties

The Conference of the Parties,

Recalling its decision FCTC/COP3(19) on the workplan and budget for the financial period 2010–2011, requesting the Convention Secretariat to conduct a review of accreditation of nongovernmental organizations with observer status to the Conference of the Parties in accordance with Rule 31.3 of its Rules of Procedure;

Having examined the report of the Convention Secretariat contained in document FCTC/COP/4/22 Rev.1,

1. DECIDES:

(1) to maintain the observer status of the following organizations:

(2) to discontinue the observer status of the following organizations:

(3) to request the following organizations to submit their pending reports on activities that they undertake to support implementation of the Convention by 15 February 2011 and to mandate the Bureau of the Conference of the Parties to examine these reports and decide on maintaining or discontinuing their observer status based on criteria referred to in document FCTC/COP/4/22 Rev.1. The observer status should automatically be considered as discontinued if no such reports are presented:

1 Formerly International Union Against Cancer.
The Global Forum for Health Research; the International College of Surgeons; the International Council on Alcohol and Addictions; the International Non Governmental Coalition Against Tobacco.

2. ALSO DECIDES:

to request the Convention Secretariat to develop and propose for adoption by the Conference of the Parties at its fifth session: (a) a standard form to be used and completed by nongovernmental organizations wishing to apply for observer status, in light of the provisions set in Rule 31 of its Rules of Procedure as well as in decision FCTC/COP2(6); and (b) a formal set of criteria in order to facilitate conducting future such reviews.

(Tenth plenary meeting, 20 November 2010)
FCTC/COP4(24)  Review of the role of the Bureau of the Conference of the Parties

The Conference of the Parties,

Having considered document FCTC/COP/4/26,

REQUESTS the Convention Secretariat, in consultation with the Bureau, to elaborate and present recommendations on how to address the matters contained therein to the Conference of the Parties at its fifth session, including possible budgetary implications of the recommendations.

(Ninth plenary meeting, 19 November 2010)
FCTC/COP4(25) Date and venue of the fifth session of the Conference of the Parties to the WHO Framework Convention on Tobacco Control

The Conference of the Parties, in accordance with Rules 3 and 4 of its Rules of Procedure,

DECIDES that:

(1) its fifth session will be held in the Republic of Korea in the last quarter of 2012, subject to the conclusion of an appropriate host agreement between the Republic of Korea and the Convention Secretariat by 30 May 2011;

(2) the exact venue and dates will be decided by the Bureau of the Conference of the Parties after receiving confirmation by the Convention Secretariat of the conclusion of a host agreement.

(Tenth plenary meeting, 20 November 2010)
FCTC/COP4(26)  

Election of the President and the five Vice-Presidents of the Conference of the Parties

The Conference of the Parties, pursuant to Rule 21 of its Rules of Procedure,

1. ELECTS the following officers to constitute the Bureau of the Conference of the Parties:

   **President:** Ambassador R. Varela (Uruguay)

   **Vice-Presidents:**
   - Mr O. Ag Mouhamedoun (Mali)
   - Mr J. Draijer (Netherlands)
   - Dr C. Otto (Palau)
   - Mrs S. Ali-Higo (Djibouti)
   - His Excellency L. Zangley Dukpa (Bhutan)

2. DECIDES that, of the five Vice-Presidents, the following should act as Rapporteur:

   **Rapporteur:** His Excellency L. Zangley Dukpa (Bhutan)

(Tenth plenary meeting, 20 November 2010)

---

1 In accordance with Rule 24 of the Rules of Procedure of the Conference of the Parties to the WHO Framework Convention on Tobacco Control, lots were drawn to determine the order in which the Vice-Presidents would serve in the place of the President. The order presented in this list is the order in which the lots were drawn.
