

Mozambique statement on the Agenda point EB156/2 Report by the Director-General

Good morning chair

Thank you

Mozambique aligns with the statement made by Senegal on behalf of the 47 members of the WHO African region. We would like to take this opportunity to welcome the Director-General's report, which fully reflects the work that WHO has carried out around the world, particularly in developing countries and those hardest hit by epidemics, natural disasters, armed conflicts and humanitarian crises.

Mozambique thanks the WHO support particularly for emergency in last three months the country was hit by two cyclones.

As the Director-General said, the WHO reaches where no one else, often putting the lives of its employees at risk for the sake of saving those who desperately suffer and have practically nothing that can relieve themselves and their loved ones except through External Aid. And this aid comes through the WHO is based on the support of Member States, and institutions of goodwill to whom we are very grateful. And we must all make an effort to improve our contributions.

To accomplish the global health targets including the 14 Global Program of Work Mozambique is working toward increasing its Access contribution by 20% for the 2026/2027 biennium and make every effort to properly contribute to the investment round.

To conclude, Mozambique would like to emphasize that we remain disponible to work with other members states to overcome differences and conclude the Pandemic Agreement, in May 2025, one of the fundamental instruments of this organization to operationalize equity and reduce dependence .

Thank you very much for your attention
