

Republic of Moldova

Statement Agenda Item 3

Mr. Chair, Distinguished Members of the Executive Board,

The Republic of Moldova takes note of the Report of the Regional Committees to the Executive Board. We acknowledge the comprehensive nature of this report and commend the efforts of the WHO Secretariat and the Regional Committees in fostering alignment between regional and global health priorities.

We particularly recognize the key issues and outcomes highlighted within the report, which emphasize global health security, preparedness, and the continued efforts to strengthen health systems across all WHO regions.

With respect to the Regional Committee for Europe, we express our support for the adopted decisions on health emergency preparedness, response, and resilience, as well as the regional framework for resilient and sustainable health systems and an Emergency Medical Teams regional action plan.

We also take note of the discussions surrounding equitable access to medical products, local vaccine production, and health workforce resilience, which are essential for achieving universal health coverage and sustainable healthcare financing. These issues remain particularly relevant for Moldova as we strive to enhance our healthcare system's efficiency and resilience.

I thank you for your attention.
