

## **Agenda 8 – Immunization Agenda 2030**

Gavi welcomes the Director-General's mid-term review of Immunization Agenda 2030, which underscores the significant progress achieved and the persistent challenges that lie ahead, as well as the priorities for the next five years.

Gavi reaffirms its strong commitment to supporting countries in developing and implementing their national immunisation strategies, ensuring alignment with the IA2030 vision and the broader primary health care and UHC agendas.

Through our newly designed Country Vaccine Budgets, countries will be in the driver's seat to prioritise high-impact vaccines, optimise interventions and manage trade-offs. This approach, part of Gavi Leap, enhances country ownership over financial decision-making.

Over the next five years, Gavi will invest nearly US\$ 3 billion, around 35% of programmatic resources, in countries classified as fragile, complemented by the US\$ 380 million Gavi Resilience Mechanism to address emergencies and humanitarian crises.

We urge Member States to sustain IA2030 momentum by investing in routine immunisation, reaching zero-dose children, and strengthening outbreak preparedness and response.
