**Statement the Delegation of the Republic Indonesia**
**on Agenda item 26.4**
**At the 74th World Health Assembly**
**Virtual, 24 May – 1 June 2021**

Thank you, Chair.

Indonesia would like to thank the Secretariat for preparing the documents under this agenda item. Indonesia focuses on the agenda item 26.4: Global strategies and plans of action that are scheduled to expire within one year.

**First**. Regarding the WHO Global Disability Action Plan 2014-2021, Indonesia has adopted the GDAP into its national roadmap and is aiming to provide quality and effective health services for people with disability. Indonesia supports the Resolution EB148 on the highest attainable standard of health for persons with disabilities. This includes our commitment to strengthen data collection on disability, disaggregated by type of disability, age, and gender. Indonesia also encourages the promotion the implementation of United Nations Disability Inclusion Strategy in the health sector.

**Second**. Indonesia will continue giving its best effort to support the implementation the Global health sector strategies on, respectively, HIV, viral hepatitis and sexually transmitted infections (STIs), for the period of 2016-2021. To maximize its implementation, we have incorporated the five Strategic Directions of the GHSS into our national action plans.

Indonesia is also of the view that it is necessary to develop a Regional Action Plan or RAP of the GHSS. The RAP will provide more applicable guidelines for regional and national intervention for HIV, viral hepatitis, and STIs.

To ensure quality implementation of the HIV, Hepatitis, and STIs prevention and control, Indonesia encourages WHO to:

1. Continue promoting an integrated multi-disease approach under UHC for a more sustainable and resilient health system;
2. Develop effective strategy for countries based on lessons-learned from the impact of COVID-19 on essential health service delivery;
3. Work collaboratively with other UN bodies to achieve related SDGs targets;
4. Continue providing high quality technical assistance to member states in implementing the GHSS; and
5. Improve the quality of integrated surveillance and its analysis to inform member countries on the most effective strategies to achieve related SDGs targets.

**Third**. Indonesia supports and is co-sponsoring the draft resolution on *Recommitting to Accelerate Progress Towards Malaria Elimination: An Updated Global Technical Strategy and Targets for Malaria 2016–2030*. Indonesia has adopted the Strategy into its national strategy and operational plan for malaria control as part of the global effort.

I thank you.
