

THE UNITED REPUBLIC OF TANZANIA
SEVENTY-EIGHTH WORLD HEALTH ASSEMBLY

Antimicrobial Resistance: Accelerating National and Global Responses
Provisional Agenda item 15, A78/8

1. Chairperson, The United Republic of Tanzania took note of the 2024 UNGA Political Declaration, key targets, and actions by raising local funding and contributing to the global reduction of AMR-related deaths by 10%, and achieving 70% utilization of antibiotics from the WHO Access Group. This is being implemented through strengthening laboratory capacity and AMR detection, surveillance of antimicrobial use, strengthening IPC practices, promoting immunization, improving WASH services, and enhancing AMR awareness, education, and advocacy.
2. **The URT** continues to be actively engaged in reporting to the Global Antimicrobial Resistance and Use Surveillance System (GLASS) by consistently providing data on antimicrobial resistance and consumption. With the support and collaboration from partners the volume of the reported kept on increasing.
3. **In conclusion, Mr. Chairperson**, the URT remains committed to supporting the fight against AMR by increasing domestic funding, accelerating the implementation and monitoring of the National Action Plan, sharing AMR data at regional and global platforms, and strengthening collaboration with local, regional, and international AMR-implementing partners.

Thank you.
