

14.4 “Implementation of resolution WHA 75.11 (2022)”

Thank you Chair,

I would like to thank WHO Director-General for the report on the implementation of the resolution WHA75.11 on health emergency in Ukraine, stemming from the Russian Federation’s aggression.

We welcome the valuable efforts made by the WHO and its partners to ensure the effective implementation of this important document and to address the health and humanitarian impacts of the Russian Federation’s aggression against Ukraine and the wider region.

Since May 2022, the adoption of one resolution and 3 decisions by the World Health Assembly and one resolution by the WHO Regional Committee for Europe on “Health emergency in Ukraine and refugee receiving and hosting countries, stemming from the Russian Federation’s aggression” were a major development.

However, Russia's aggressive war continues to this day, and Ukraine’s health care system remains under direct attack. According to WHO, attacks on health care in Ukraine increased by nearly 20% in 2025 compared with 2024. Since the beginning of the full-scale invasion, WHO has verified more than 3000 attacks on health care, affecting health workers, facilities, ambulances and medical warehouses. These attacks have killed 239 and injured at least 991 innocent people who were either providing or receiving medical treatment at the time.

The draft decision before you is co-sponsored by 45 WHO Member States. It aims to ensure the WHO continues to provide sustained support for the humanitarian and emergency health response in Ukraine. It also underscores the need to support the recovery and strengthening of Ukraine’s healthcare sector, which has been severely affected by the ongoing Russian aggression against Ukraine.

On behalf of Ukraine, I would like to urge all the delegations to support the draft decision submitted by Ukraine.

I thank you.
