# Sampling

## Sampling Procedure

---

In Mexico strata were defined by locality (metropolitan, urban, rural).

All 211 PSUs selected for wave 1 were included in the wave 2 sample. A sub-sample of 211 PSUs was selected from the 797 WHS PSUs for the wave 1 sample.

The Basic Geo-Statistical Areas (AGEB) defined by the National Institute of Statistics (INEGI) constitutes a PSU.

PSUs were selected probability proportional to three factors:

- a) (WHS/SAGE Wave 0 50plus): number of WHS/SAGE Wave 0 50-plus interviewed at the PSU,
- b) (State Population): population of the state to which the PSU belongs,
- c) (WHS/SAGE Wave 0 PSU at county): number of PSUs selected from the county to which the PSU belongs for the WHS/SAGE Wave 0;

The first and third factors were included to reduce geographic dispersion. Factor two affords states with larger populations a greater chance of selection.

All WHS/SAGE Wave 0 individuals aged 50 years or older in the selected rural or urban PSUs and a random sample 90% of individuals aged 50 years or older in metropolitan PSUs who had been interviewed for the WHS/SAGE Wave 0 were included in the SAGE Wave 1 "primary" sample. The remaining 10% of WHS/SAGE Wave 0 individuals aged 50 years or older in metropolitan areas were then allocated as a "replacement" sample for individuals who could not be contacted or did not consent to participate in SAGE Wave 1. A systematic sample of 1000 WHS/SAGE Wave 0 individuals aged 18-49 across all selected PSUs was selected as the "primary" sample and 500 as a "replacement" sample.

This selection process resulted in a sample which had an over-representation of individuals from metropolitan strata; therefore, it was decided to increase the number of individuals aged 50 years or older from rural and urban strata. This was achieved by including individuals who had not been part of WHS/SAGE Wave 0 (which became a "supplementary" sample), although the household in which they lived included an individual from WHS/SAGE Wave 0. All individuals aged 50 or over were included from rural and urban "18-49 households" (that is, where an individual aged 18-49 was included in WHS/SAGE Wave 0) as part of the "primary supplementary" sample. A systematic random sample of individuals aged 50 years or older was then obtained from urban and rural households where an individual had already been selected as part of the 50 years and older or 18-49 samples. These individuals then formed part of the "primary supplementary" sample and the remainder (that is, those not systematically selected) were allocated to the "replacement supplementary" sample. Thus, all individuals aged 50 years or older who lived in households in urban and rural PSUs obtained for SAGE Wave 1 were selected as either a primary or replacement participant. A final "replacement" sample for the 50 and over age group was obtained from a systematic sample of all individuals aged 50 or over from households which included the individuals already selected for either the 50 and over or 18-49. This sampling strategy also provided participants who had not been included in WHS/SAGE Wave 0, but lived in a household where an individual had been part of WHS/SAGE Wave 0 (that is, the "supplementary" sample), in addition to follow-up of individuals who had been included in the WHS/SAGE Wave 0 sample.

Strata: Locality = 3

PSU: AGEBS = 211

SSU: Households = 6549 surveyed

TSU: Individual = 6342 surveyed

## Response Rate

---

Household

Response rate=83%

Main reason for non-response was the inability to locate the household.

Individual

Response rate=81%

## Weighting

---

Household weights(variable hhweight) for analysis at household level and individual weights(variable pweight) for analysis at person level were calculated. These were based on the selection probability at each stage of selection. Household weights

were post-stratified by locality according to the 2009 population census projections.

Individual weights were post-stratified by sex and age-groups (18-34, 35-49, 50-59, 60-105) according to the 2009 population census projections.

Weights are divided by 1000 and are not normalized.

# Questionnaires

## Overview

---

The questionnaires were based on the SAGE Wave 1 Questionnaires with some modification and new additions, except for verbal autopsy. SAGE Wave 2 used the 2012 version of the WHO Verbal Autopsy Questionnaire. SAGE Wave 1 used an adapted version of the Sample Vital Registration with Verbal Autopsy (SAVVY) questionnaire.

A Household questionnaire was administered to all households eligible for the study.

A Verbal Autopsy questionnaire was administered to 50 plus households only. In follow-up 50 plus household if the death occurred since the last wave of the study and in a new 50 plus household if the death occurred in the the past two years. Deceased had to be 50 years or more at the time of death.

An Individual questionnaire was administered to eligible respondents identified from the household roster.

A Proxy questionnaire was administered to individual respondents who had cognitive limitations.

The questionnaires were developed in English. All documents were translated into Spanish. All SAGE generic English questionnaires are available as external resources.

## Data Collection

### Data Collection Mode

Face-to-face [f2f], CAPI

### Data Collection Notes

The pre-test for the study took place on 24 July 2014 in the municipality of Ocoyoacac in the state of Mexico. 14 household questionnaires were administered, 2 verbal autopsy, 16 individual, 1 proxy. Anthropometrics were obtained for 14 respondents. No blood samples were taken. The pre-test data is not included in the final dataset.

There were 5 fieldwork teams. Each team was headed by a fieldwork coordinator who supervised one IT specialist and 2 supervisors. Each supervisor was responsible for 2 interviewers and one nurse.

A total of 5 coordinators, 10 supervisors, 5 IT specialists, 20 interviewers and 10 nurses comprised the fieldwork team.

Data collection took place over a period of about 12 weeks from 27 July until 14 October, 2014. Interviewing took place everyday throughout the fieldwork period.

Interviews were conducted in Spanish.

The overall field coordinator was Mrs Aurora Frank Nuez.

**Description**

In order to determine who remains in the household from the last time the survey team was here, and any new household members since then, I need to know who lives at this address. I have a record of household members from the last interview, and I will start with these people.

In order to determine who to interview, I need to know who lives at this address.

**Universe**

ALL: Let me assure you that any information you provide is strictly confidential. By asking "who lives at this household?", I mean those who share meals ('eat out of the same pot') and usually stay here for at least four months a year. I would like to know the age, sex, marital status, educational level and relationship to the household head of each of the members of this household who live here.

Please include people who may presently be in an institution due to their health (for example, in hospital or old people's home) for a short time.

**Literal question**

What is the total number of people who live in this household?

**Description**

Just to make sure I have a complete listing of everyone in the household - you said previously that (SEE Q0401) people live in this household.

**Literal question**

Are there any other persons such as small children or infants that we have not listed?

**Interviewer instructions**

INTERVIEWER: Check Q0401 - make sure total number of persons listed in the roster table above is equal to the number of persons living in the household.  
 If number matches, to Q0417.  
 If number does not match, go back to roster.

In the last part of this section, I will ask about the total income for the household in the last 12 months (previous to today) from paid work or other sources. I would like to know about all sources of income. I know it may be difficult to calculate that figure, but please do try to give as accurate an amount as possible. Remember that all information will be kept strictly confidential. This information is important to assess overall health and well-being of people in your household compared to other similar households

**Literal question**

Does your household have a regular source of income?

**Post question**

1. Yes, regular source
2. Yes, regular but seasonal
3. No

**Interviewer instructions**

Interviewer: Regular income over the last 12 months, meaning that the household can depend on a source to provide an income at intervals that can be used to base household budget decisions.

**Description**

Before we ask you more questions, this time about your own health and well-being, we would like to measure a few things, like your blood pressure, your weight and height. We'll also ask you to participate in a few tests to determine your health status

**Pre question**

First I would like to measure your blood pressure and pulse rate. Stay seated, and once I put this on your wrist, keep it steady and at the level of your heart. We will need to take the blood pressure reading three times. It will squeeze your wrist a bit, but won't hurt. Relax.

**Literal question**

Time 1, Systolic

**Interviewer instructions**

INTERVIEWER: respondent should remain seated. Demonstrate to the respondent how to hold their arm while the machine is measuring. Place the monitoring device on the wrist and have the respondent hold it at heart level against his/her chest. When the device is in the correct position and respondent is relaxed, press the button to start. Check to make sure it is working. Collect the blood pressure and pulse 3 times with one minute between each measurement. You do not need to remove the device between measurements.

**Pre question**

I have two tasks remaining for you in this part of our interview. In both of the tasks we will ask you to press a key/button on the computer.

**Literal question**

Q2549 Will you be able to press a key/button on the computer?

**Post question**

1. Respondent agrees and is able
2. Respondent agrees but is not able to Next section
3. Respondent does NOT agree to Next section

**Interviewer instructions**

INTERVIEWER: show them the key you want them to press, ask the question and allow the respondent a chance to press a key.

Indicate whether the respondent agrees or not.

**Pre question**

SIMPLE REACTION TIME TEST:

Look at the screen and rest your finger on/over this key/button. An "X" will appear on the screen (allow example image to appear). When this happens, your task is to press his key/button as quickly as you can upon appearance of the image/picture. We will test you three times. First with your left hand, then with your right hand, then again with your left hand. Remember, as soon as you see the "X" on the screen, press the key.

**Literal question**

Trial 1: Let's start with your left hand.  
 Respondent completed simple test trial 1

**Post question**

1. YES
2. NO

Next I am going to ask you about the time you spend doing different types of physical activity in a typical week. Please answer these questions even if you do not consider yourself to be an active person. Think first about the time you spend doing work. Think of work as the things that you have to do such as paid or unpaid work, household chores, harvesting food/crops, fishing or hunting for food, providing care or seeking employment.

In answering the following questions 'vigorous activities' require hard physical effort and cause large increases in breathing or heart rate, 'moderate activities' require moderate physical effort and cause small increases in breathing or heart rate.

**Literal question**

Does your work involve vigorous-intensity activity that causes large increases in breathing or heart rate, [like heavy lifting, digging or chopping wood] for at least 10 minutes continuously?

**Pre question**

INPATIENT HOSPITAL CARE Continued...

I want to know more about why you needed an overnight stay in a health care facility. Starting with the most recent stay, I want to know more about your overnight stays, including why you needed to be hospitalized each time. But first I would like you to come back to thinking about your last overnight hospital stay only.

**Literal question**

What type of hospital or facility was it? Remember we are asking now about your last (most recent) overnight stay.

Please tell me the main things that you did yesterday morning from the time you woke up until around noon/mid-day. Please also mention if you were talking or interacting with anyone for any parts of the morning. By interacting with, I mean were you consistently paying attention to someone. For example, if you were bathing a young child you would be interacting with them even if you were not talking. On the other hand, talking to someone for less than 5 minutes does not count as interacting.

Be sure to cover as much as you can remember. You don't have to go in order, but it's probably easier that way. Be sure to stop with activities from around noon/mid-day.

**Pre question**

Please tell me the main things that you did yesterday morning from the time you woke up until around noon/mid-day. Please also mention if you were talking or interacting with anyone for any parts of the morning. By interacting with, I mean were you consistently paying attention to someone. For example, if you were bathing a young child you would be interacting with them even if you were not talking. On the other hand, talking to someone for less than 5 minutes does not count as interacting.

Be sure to cover as much as you can remember. You don't have to go in order, but it's probably easier that way. Be sure to stop with activities from around noon/mid-day.

**q8001: any members of your household, needed care for any reason (q8001)**

File: MexicoINDDataW2

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 8  
 Decimals: 0  
 Range: 1-2

Valid cases: 4665  
 Invalid: 0

**Description**

In the following questions, we want to find out about how families and households cope and support each other in times of need or through prolonged illnesses and death. I would like to spend some time talking to you about people who have needed care or support, adults who have been ill or died in the last 12 months and/or children who require care due to illness or age. I will ask about care you have provided, and also care you have received. The information you provide will be kept strictly confidential and will be used to improve programs for families and children in need.

**Universe**

I will ask you a few questions about adults and children in your household who need or needed care, due to age (young or old), physical limitations, illness or other reasons, or have been ill and died in the last 12 months. By care or caregiving we mean financial or emotional support, physical, health or personal care provided to an individual. This includes both daily personal care such as help with eating, dressing, bathing, moving around in the house, as well as assistance with their affairs outside the house such as transportation to see doctors, getting to school, going to buy medicine or medical appointment, assistance with studies or managing the ill person's financial situation, health care, emotional well-being or other personal affairs.

**Pre question**

I will then ask about care provided to adults and children who do not live in this household. Finally, I will ask about care or support you may need and receive. It is possible that you may feel uncomfortable answering some of the questions. You can choose if you don't want to answer some questions.

First I would like to know more about everyone who receives in your household.

### Overview

Type: Discrete  
Format: numeric  
Width: 8  
Decimals: 0  
Range: 1-2

Valid cases: 90

### Description

I want to shift now to questions about children under the age of 18 in the household, and about care you provide or have provided over the last 12 months - including those for whom one or both parents are ill or absent (prolonged illness or absent through death or migration or other reason). Care could be related to physical care, health care, financial or emotional support or other reasons, where you are responsible for the well-being of the child/children.

### Literal question

Over the last 12 months, have there been any children under the age of 18 years living in your household or compound whose parents are not currently living in the household or who cannot/do not provide primary care?

### Post question

1. Yes  
2. No
