RESUMPTION BY CERTAIN MEMBERS OF ACTIVE PARTICIPATION  
IN THE WORLD HEALTH ORGANIZATION

Report by the Director-General

The Fifth World Health Assembly in Resolution WHA5.14,<sup>1</sup> "noting the small distribution of the Russian edition of the Chronicle of the World Health Organization", recommended "that the publication of this edition be suspended" and requested "the Director-General to report to a future Health Assembly any new considerations which might lead to a decision to resume publication of this edition".

The Director-General believes that the resumption of active participation in the work of the Organization by certain Members constitutes such a new consideration.

The annual cost of the Russian edition of the Chronicle is estimated at \$7500, as shown in Official Records 74, page 376.
