

REGIONAL COMMITTEE

SEA/RC23/10

Twenty-third Session

5 August 1970

Provisional Agenda item 9

LONG-TERM FINANCIAL INDICATORS

The Twenty-second World Health Assembly, in resolution WHA22.53, requested the Director-General to explore further the feasibility of providing appropriate long-term financial indicators and to report thereon to the forty-fifth session of the Executive Board.

The Executive Board, at its forty-fifth session, considered the Director-General's report as contained in document EB45/40 (attached as Annex 1) and adopted resolution EB45.R13 (attached as Annex 2).

The Executive Board, in its resolution EB45.R13, noted that this complex subject required more detailed study, including consultations with recipient governments, which would be carried out through the regional offices and the results considered by the regional committees.

Although there has not been sufficient time to undertake the consultations with governments prior to this session of the Regional Committee, the matter is being presented at this time in order that the Committee may be able to discuss it on a preliminary basis.

If the Committee agrees, its preliminary views on this matter will be transmitted to the Director-General for inclusion in the progress report which he intends to submit to the forty-seventh session of the Executive Board.
