

The Regional Committee,

Having studied the inter-country programme proposed for implementation in 1957 with the services of a maternal and child health specialist for the collation and preparation of material for the composition of a manual or manuals of the various methods, procedures and techniques in the field of maternal and child health practiced in countries of the Region, and

Noting that, though the need is pronounced, no such manual has been produced,

- 1 EMPHASIZES the importance of such an intercountry activity; and
- 2 REQUESTS the Regional Director to implement it within the budgetary limitations.

September 1955
