NOTES SUR LES UNITÉS GÉOGRAPHIQUES — NOTE ON GEOGRAPHIC AREAS

Il ne faudrait pas conclure de la présentation adoptée dans le *Relevé épidémiologique hebdomadaire* que l'Organisation Mondiale de la Santé admet ou reconnaît officiellement le statut ou les limites des territoires mentionnés. Ce mode de présentation n'a d'autre objet que de donner un cadre géographique aux renseignements publiés. La même réserve vaut également pour toutes les notes et explications relatives aux pays et territoires qui figurent dans les tableaux. Les « circonscriptions » (voir définition de ce terme dans le Règlement sanitaire international) sont présentées suivant les notifications reçues des administrations sanitaires.

The form of presentation in the *Weekly Epidemiological Record* does not imply official endorsement or acceptance by the World Health Organization of the status or boundaries of the territories as listed or described. It has been adopted solely for the purpose of providing a convenient geographic basis for the information herein. The same qualification applies to all notes and explanations concerning the geographic units for which data are provided. Local areas under the International Sanitary Regulations are presented as designated by health administrations.

Soudan. — Par télégramme en date du 14 juin, l'administration sanitaire soudanaise a notifié 56 cas confirmés de variole et 5 décès dans la région d'Abu Surrug (District de Dar Masalit ou Geneina), et 3 cas et 1 décès dans la ville de Nyala (District de Southern Darfur). Les deux districts, qui ont été ajoutés à la liste des circonscriptions infectées publiée dans le présent *Relevé*, sont situés dans la province de Darfur qui est contiguë à la Préfecture de Ouaddaï (Tchad) où sévit une épidémie.¹

L'infection a été importée par deux *hausa* (population de la région nord du Nigéria), qui venaient du Tchad et étaient entrés par le District de Dar Masalit (Geneina).

La région est étroitement contrôlée, et une campagne massive de vaccination est en cours.

Aucun cas de variole n'avait été notifié au Soudan entre le 30 mars 1963 et le 11 mars 1965, date à laquelle l'infection avait été importée dans la région de Wad Medani (Northern Gezira District, Blue Nile Province).²
