Notifications et informations se rapportant à l'application
 du Règlement sanitaire international et notes relatives à la
 fréquence de certaines maladies

Service de la Quarantaine internationale
 Adresse télégraphique: EPIDNATIONS GENÈVE
 Télex 22335

Notifications under and information on the application of the
 International Sanitary Regulations and notes on current incidence
 of certain diseases

International Quarantine Service
 Telegraphic Address: EPIDNATIONS GENEVA
 Telex 22335

21 AVRIL 1967

42^e ANNÉE — 42nd YEAR

21 APRIL 1967

MALADIES QUARANTENAIRES — QUARANTINABLE DISEASES

Territoires infectés au 20 avril 1967 — Infected areas as on 20 April 1967

Notifications reçues aux termes du Règlement sanitaire international
 concernant les circonscriptions infectées ou les territoires où la présence
 de maladies quaranténaires a été signalée (voir page 185).

■ = Circonscriptions ou territoires notifiés aux termes de l'article 3 à la
 date donnée.

Autres territoires où la présence de maladies quaranténaires a été notifiée
 aux termes des articles 4, 5 et 9 a):

A = pendant la période indiquée sous le nom de chaque maladie;
 B = antérieurement à la période indiquée sous le nom de chaque maladie;
 X = territoires nouvellement infectés.

Notifications received under the International Sanitary Regulations relating
 to infected local areas and to areas in which the presence of quarantinable
 diseases was reported (see page 185).

■ = Areas notified under Article 3 on the date indicated.

Other areas in which the presence of quarantinable diseases was notified
 under Articles 4, 5 and 9 (a):

A = during the period indicated under the heading of each disease;
 B = prior to the period indicated under the heading of each disease;
 X = newly infected areas.

INFORMATIONS ÉPIDÉMIOLOGIQUES

CHOLÉRA

Asie

Thaïlande. — Par télégramme du 19 avril, l'administration sanitaire a notifié comme suit des cas de choléra El Tor, confirmés par le laboratoire: Municipalité de Bangkok (à l'exclusion du port et de l'aéroport), un cas; Province de Samut Songkhram, 2 cas; Province de Ratchburi, 3 cas (1 décès), pour la semaine terminée le 15 avril. Un cas pour la semaine terminée le 1^{er} avril a été rapporté dans la Province de Samut Songkhram, et un cas pour la semaine terminée le 8 avril dans la Province de Ratchburi.

Les derniers cas de choléra survenus en Thaïlande avaient été rapportés pour la semaine terminée le 12 novembre 1966.

Les Etats de la région ont été informés de ce qui précède par télégramme CODEPID du 19 avril.

VARIOLE

Asie

Koweït. — Le 13 avril, l'administration sanitaire a notifié par télégramme le décès, le 12 avril, d'un enfant de 11 mois qui était suspect de variole. Dans un deuxième télégramme, le 16 avril, neuf cas (deux décès) étaient rapportés. L'origine de l'infection n'est pas connue. Les campagnes habituelles de vaccinations effectuées tout au long de l'année sont maintenant concentrées sur la zone du foyer.

Le dernier cas de variole à Koweït avait été notifié pour la semaine terminée le 4 avril 1959.

Les administrations sanitaires de la région ont été tenues au courant les 14 et 17 avril par télégramme CODEPID.

GRIPPE

Europe

Finlande (information en date du 10 avril). —¹ Les poussées d'affections d'allure grippale semblent se déplacer vers les parties nordiques du pays. Elles restent surtout confinées aux unités militaires.

Seize souches de virus grippal A2 ont été isolées jusqu'ici. Quatre d'entre elles furent testées au Centre mondial de la Grippe et, bien qu'elles aient présenté de bonnes affinités pour les antisera vis-à-vis desquels elles furent testées, y compris A2/Singapore/1/57, elles semblent plus proches des variantes récentes du virus A2 que de A2/Singapore/1/57.

¹ Voir N° 12, p. 152.

EPIDEMIOLOGICAL NOTES

CHOLERA

Asia

Thailand. — By cable on 19 April, the health administration notified laboratory confirmed cholera El Tor cases as follows: Bangkok Municipality (excluding port and airport), one case; Samut Songkhram Province, 2 cases; Ratchburi Province, 3 cases (one death) — for the week ended 15 April. One case for the week ended 1 April is reported in Samut Songkhram Province and one case for the week ended 8 April in Ratchburi Province.

The last cases of cholera in Thailand were reported for the week ended 12 November 1966.

States in the area were notified by CODEPID cable on 19 April.

SMALLPOX

Asia

Kuwait. — By telegram on 13 April, the health administration reported one death of suspected smallpox in an infant 11 months old on 12 April. In a further cable sent on 16 April nine cases (two deaths) were notified. Origin of the infection is unknown. Mass vaccinations routinely carried on all year around are now concentrated in the area of the focus.

The last previous case of smallpox reported was for the week ending 4 April 1959.

Health administrations in the area were informed by CODEPID cable on 14 and 17 April.

INFLUENZA

Europe

Finland (information dated 10 April). —¹ The outbreaks of influenza-like illness seem to be moving to the northern parts of the country. They are still mostly confined to military units.

Sixteen strains of influenza virus A2 have been isolated so far. Four of them were tested at the World Influenza Centre and, although they reacted well with the antisera against which they were tested, including A2/Singapore/1/57, they seem to be more closely related to the recent variants of virus A2 than to A2/Singapore/1/57.

¹ See No. 12, p. 152.

NOTE SUR LES UNITÉS GÉOGRAPHIQUES — NOTE ON GEOGRAPHIC AREAS

Il ne faudrait pas conclure de la présentation adoptée dans le *Relevé épidémiologique hebdomadaire* que l'Organisation mondiale de la Santé admet ou reconnaît officiellement le statut ou les limites des territoires mentionnés. Ce mode de présentation n'a d'autre objet que de donner un cadre géographique aux renseignements publiés. La même réserve vaut également pour toutes les notes et explications relatives aux pays et territoires qui figurent dans les tableaux. Les « circonscriptions » (voir définition de ce terme dans le Règlement sanitaire international) sont présentées suivant les notifications reçues des administrations sanitaires.

The form of presentation in the *Weekly Epidemiological Record* does not imply official endorsement or acceptance by the World Health Organization of the status or boundaries of the territories as listed or described. It has been adopted solely for the purpose of providing a convenient geographic basis for the information herein. The same qualification applies to all notes and explanations concerning the geographic units for which data are provided. Local areas under the International Sanitary Regulations are presented as designated by health administrations.
