Sauf indication contraire, les taux sont calculés par 1,000 naissances vivantes survenues au cours de la période correspondante.

Les chiffres en italique se réfèrent aux maxima, médians et minima enregistrés pendant les périodes indiquées; ceux en caractères gras égalent ou dépassent le quartile supérieur des mêmes séries.

Lorsque la colonne VII est laissée en blanc, il s'agit de taux mensuels; dans le cas contraire, les taux se réfèrent à des périodes de quatre semaines.

R La lettre « R » signifie que les taux se réfèrent à la population résidente (de droit); dans tous les autres cas, les taux se réfèrent à la population présente (de fait).
