Pay attention to these 5 MOMENTS when using medication/s.

• visit a doctor, nurse, pharmacist or dentist
• visit a primary health care facility or pharmacy
• are admitted to and discharged from a health care facility
• are referred to another health care facility
• are transferred to another health care facility
• receive treatment and care at home.

For patients, families and caregivers

It is intended to engage patients in their own care in a more active way, to encourage their curiosity about the medications they are taking, and to empower them to communicate openly with their health professionals.

For health professionals

This tool is intended for use by patients, their families and caregivers, with the help of health professionals, at all levels of care and across all settings.
