This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
**Demographic data**

- **Population size**: 10.1m
  - Female: 5.1m
  - Male: 5.1m

- **Life expectancy at birth**
  - Female: 74.1 years
  - Male: 68.8 years

- **Population age distribution**
  - 0-14: 23.5%
  - 15-24: 13.4%
  - 25-49: 38.8%
  - 50+: 24.3%

**Sexual and Reproductive Health**

- **Total fertility rate**: 2.1 births per woman

- **Adolescent birth rate**: 55.8 per 1,000 women aged 15-19

- **Median age at first sex among young people (20-24)**: ND (Male), ND (Female)

- **Young women (20-24) married before age 18**: 11.0%

- **Maternal mortality ratio**: 26 per 100,000 live births

- **Maternal mortality due to HIV**: ND

- **Neonatal mortality rate**: 10.9 per 1,000 live births

**HIV**

- **HIV prevalence among adults (15-49)**: 0.1%

**CONTEXT**

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain
Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

**Laws and policies**

**People living with HIV**

Are there laws or policies that:

- Criminalize transmission, exposure or non-disclosure of HIV\(^{19}\) **Yes**
- Restrict entry, stay and residence of people living with HIV** Yes**
- Protect against discrimination on basis of HIV status\(^{21}\) **Yes**
- Allow HIV self-testing\(^{22}\) **No**
- Make oral pre-exposure prophylaxis for HIV (PrEP) available\(^{23}\) **No**

---

**SRHR and gender-based violence**

Are there laws or policies that:

- Allow safe abortion\(^{29}\)
  - To save a woman’s life \(\text{ND}\)
  - To preserve a woman’s physical health \(\text{ND}\)
  - To preserve a woman’s mental health \(\text{ND}\)
  - In case of rape \(\text{ND}\)
  - In case of incest \(\text{ND}\)
  - Owing to foetal impairment \(\text{ND}\)
  - For economic or social reasons \(\text{ND}\)
  - On request **Yes**
- Require spousal consent for married women to access SRH services\(^{30}\) **No**
- Explicitly criminalize marital rape\(^{31}\) **No**
- Criminalize domestic violence\(^{32}\) **No**
- Criminalize sexual harassment\(^{33}\) **Yes**
- Require provision of CSE in primary school\(^{34}\) **No**
- National strategy or policy on self-care interventions\(^{35}\) **ND**

**Key populations**

Are there laws or policies that:

- Criminalize same-sex sexual behaviour\(^{34}\) **No**
- Criminalize sex work\(^{25}\) **No**
- Allow the death penalty for people convicted of drug-related offences\(^{26}\) **No**
- Support a harm reduction approach for people who use drugs\(^{27}\) **Yes**
- Legally recognize a third gender\(^{28}\) **ND**

---

**Impact on integrated SRHR**

**ND** = No Data

ENABLING ENVIRONMENT

Global Targets: Achieved ○ Challenges remain ○ Major challenges remain ○
Universal Health Coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

ND = No Data

Global Targets:
- **Achieved**
- **Challenges remain**
- **Major challenges remain**

### Universal Health Coverage

**Coverage of essential health services (SDG 3.8.1)**

- **Households**
  - Expenditure on health greater than 10% of income: **65**
  - Expenditure on health greater than 25% of income: **ND**

### Governance

**Legislation on universal health coverage**
- **Yes**

### Health workforce

**Skilled health professionals (per 10,000 population)**
- **Doctors**: **34.5**
- **Nurses and Midwives**: **64.3**
- **Pharmacists**: **2.00**

### Supply Chain

**Availability of essential medicines and commodities in Public Health facilities**
- **ND**

**Male condom stock-out in the past 12 months**
- **No**

### Health information

**Paper-based or electronic health information system**
- **Both**
- **ND**

**Antenatal care data captured in health information system**
- **ND**

### Health financing

**Total health expenditure as a percentage of GDP**
- **3.5%**

**Government health expenditure as percentage of GDP**
- **0.9%**

**Total health expenditure per capita (USD)**
- **$165.8**

**Government expenditure on reproductive health per capita (USD)**
- **ND**

### Integrated service delivery

**Health facilities delivering HIV counselling and testing with SRH services**
- **All**
- **Some**
- **None**

**Health facilities delivering HIV treatment and care with SRH services**
- **All**
- **Some**
- **None**
Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

**Demand for family planning satisfied with a modern method of contraception (15-49)**

### HIV prevention

- **Condom use at last high risk sex (15-49)**
  - Female: 60%
  - Male: 74%
  - **ND**

- **Male circumcision**
  - **ND**

### 95-95-95 testing and treatment cascade

- **People living with HIV who know their status (15+)**
  - Female: 60%
  - Male: 74%
  - **ND**

- **People living with HIV who are on ART (15+)**
  - Female: 50%
  - Male: 53%
  - **ND**

- **People living with HIV on ART who achieve viral load suppression (15+)**
  - Female: 45%
  - Male: 40%
  - **ND**

### PrEP and HIV self-testing

- **Current oral pre-exposure prophylaxis for HIV (PrEP) users**
  - **ND**

- **HIV self tests conducted**
  - **ND**

### Syphilis

- **Active syphilis among men who have sex with men**
  - 7.3%

- **Active syphilis among sex workers**
  - 20.9%

### Gender based violence

- **Women experiencing physical or sexual violence in past 12 months (15-49)**
  - **ND**

- **Wife agrees husband justified beating her - at least one reason specified**
  - 49%

### Care/support provided by service delivery points in cases of rape or incest

- **First-line support (psychological first aid)**
  - Yes

- **Emergency contraception for women (within 5 days)**
  - Yes

- **Safe abortion (in accordance with national laws)**
  - Yes

- **Post-exposure prophylaxis for STIs and HIV (within 72 hours)**
  - Yes

### Cervical cancer

- **Existence of national HPV vaccination programme**
  - No

- **Existence of national cervical cancer screening programme**
  - No

- **Type of programme**
  - None

- **Coverage of national screening programme**
  - 0%
Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.

ND = No Data

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain

### Harmful practices
- **Girls married before 18**
  - Female: 11.0%
  - Male: ND

- **Female genital mutilation / cutting**
  - Female: ND
  - Male: ND

### Comprehensive Sexuality Education
- **Primary schools fully implementing national CSE policy**
  - Female: ND
  - Male: ND

- **Secondary schools fully implementing national CSE policy**
  - Female: 76-100%
  - Male: ND

### Adolescent sexual health
- **Had multiple partners and used a condom at last sex (15-19)**
  - Female: ND
  - Male: ND

- **Correct knowledge of HIV prevention (15-24)**
  - Female: 14.9%
  - Male: ND

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

http://www.statcompiler.com/

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

38. 2013. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - http://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

40. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://lawsandpolicies.unaids.org/

45. No Data. Indicator: SDG 3.8.2. Population with large health expenditures as a share of total expenditure or income greater than 10%. Source: SDG database - https://aidsinfo.unaids.org

47. 2017. Indicator: Countries that have passed legislation on universal health coverage. Source: WHO Global Health Observatory - https://apps.who.int/gho/portal/uhc-hs-cabinet-wrapper-v2.jsp?id=1030103

59. No Data. Indicator: Percentage of total demand for family planning among married or in-union women ages 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unsanstats.un.org/sdgs/indicators/database

64. 2011. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

65. 2013. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

73. No Data. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z6910

75. No Data. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYPSTIv

87. 2006. Indicator: Percentage of women ages 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAM.REAS.ZS

88. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
89. 2017. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
90. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
91. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
100. No Data. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNICEF global databases - https://data.unicef.org/topic/hivaid/adolescents-young-people/
102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.
104. 2018. Indicator: Percentage of men who have sex with men who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org
105. 2018. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
106. 2018. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org
117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org
120. 2018. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org
121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org
