This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
Demographic data

- Population size: 164.7m
  - Female: 81.4m
  - Male: 83.3m

Life expectancy at birth:
- Female: 83.3m
  - 75.6 years
- Male: 81.4m
  - 73.0 years

Population age distribution:
- 0-14: 26.8%
- 15-24: 18.7%
- 25-49: 37.5%
- 50+: 17.1%

Sexual and Reproductive Health

- Total fertility rate: 2.1 births per woman
- Adolescent birth rate: 83.0 per 1,000 women aged 15-19
- Young women (20-24) married before age 18: 58.6%
- Maternal mortality ratio: 173 per 100,000 live births

HIV

- Number of new HIV infections: ND
- Number of people living with HIV: ND
- Number of AIDS related deaths: ND

- HIV incidence per 1,000 population (15+): ND
- HIV prevalence among adults (15-49): ND

Context:
The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain
Impact on integrated SRHR:
- Supportive
- Partial
- Punitive

Laws and policies

People living with HIV
Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV
  - No
- Restrict entry, stay and residence of people living with HIV
  - No
- Protect against discrimination on basis of HIV status
  - No
- Allow HIV self-testing
  - Yes
- Make oral pre-exposure prophylaxis for HIV (PrEP) available
  - No

Key populations
Are there laws or policies that:
- Criminalize same-sex sexual behaviour
  - Yes
- Criminalize sex work
  - Partial
- Allow the death penalty for people convicted of drug-related offences
  - Yes
- Support a harm reduction approach for people who use drugs
  - Yes
- Legally recognize a third gender
  - Yes

SRHR and gender-based violence
Are there laws or policies that:
- Allow safe abortion
  - Yes
  - To save a woman's life
  - No
  - To preserve a woman's physical health
  - No
  - To preserve a woman's mental health
  - No
  - In case of rape
  - No
  - In case of incest
  - No
  - Owing to foetal impairment
  - No
  - For economic or social reasons
  - No
  - On request
  - No
- Require spousal consent for married women to access SRH services
  - No
- Explicitly criminalize marital rape
  - No
- Criminalize domestic violence
  - Yes
- Criminalize sexual harassment
  - Yes
- Require provision of CSE in primary school
  - No

National strategy or policy on self-care interventions
- No

Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)
- Maternity care
  - ND
  - Family planning
  - 0%
- CSE
  - 94%
- Sexual health
  - 39%
- Total
  - ND

Age of Consent
- Legal age for consent to sexual intercourse
  - Female ND
  - Male ND
- Legal age for marriage without parental consent
  - Female ND
  - Male ND

Women's empowerment
- Percentage of women that believe they should have final say in decisions regarding their own healthcare
  - ND
- Percentage of women (15-49) making SRHR decisions
  - 64.3%

Global Gender Gap Index
- Ranking (out of 156 countries)
  - Score (1.0 = parity)
  - Score 0.7
  - Ranking 65

Stigma
- Percentage of general population reporting discriminatory attitudes towards people living with HIV
  - ND
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain

### Health Systems

#### Universal Health Coverage

Coverage of essential health services (SDG 3.8.1)\[^{44}\]

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>48</td>
</tr>
</tbody>
</table>

Catastrophic health spending (SDG 3.8.2)

Households where expenditure on health is greater than:

- 10% of income\[^{45}\]
  - 24.7%
- 25% of income\[^{46}\]
  - 9.5%

#### Governance

Legislation on universal health coverage\[^{47}\]

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No</td>

**ND = No Data**

**SERVICE DELIVERY: SEXUAL HEALTH**

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.
## Harmful practices

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who died from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

35. 2019. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

37. No Data. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - https://unstats.un.org/sdgs/indicators/database

38. No Data. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/topicresult?i=1

43. No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org

48b. 2019. Indicator: Midwifery personnel (doctor, nurse or midwife) per 10,000 population. Source: WHO Global Health Observatory - https://apps.who.int/gho/data/view.main.UNCHRRHv

64. 2019. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

65. 2019. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

70. No Data. Indicator: Percentage of infants born to women living with HIV receiving a virological test for HIV within two months of birth. Source: UNAIDS estimates - https://aidsinfo.unaids.org

73. 2018. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z3610

75. No Data. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYPST

80. No Data. Indicator: People living with HIV who know their status who are on ART (15+). Source: UNAIDS estimates - https://aidsinfo.unaids.org

86. 2015. Indicator: SDG 5.2.1. Proportion of ever-married or partnered women aged 15-49 who experienced physical or sexual violence from a current or former intimate partner in the past 12 months. Source: SDG database - https://unsusts.un.org/sdgs/indicators/database

87. 2014. Indicator: Percentage of women ages 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS

88. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
89. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

90. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

91. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. No Data. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNICEF global databases - https://data.unicef.org/topic/hivaids/adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

104. 2015. Indicator: Percentage of men who have sex with men who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

106. 2015. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

110. 2015. Indicator: Percentage of female and male sex workers reporting the use of a condom with their most recent client. Source: UNAIDS estimates - https://aidsinfo.unaids.org

114. 2015. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. 2016. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. No Data. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
