This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022*
Demographic data

- Population size: 0.40m
  - Female: 0.20m
  - Male: 0.20m

Life expectancy at birth

- Female: 77.8 years
- Male: 71.4 years

Sexual and Reproductive Health

- Total fertility rate: 2.3 births per woman
- Adolescent birth rate: 68.5 per 1,000 women aged 15-19
- Median age at first sex among young people (20-24): ND
- Young women (20-24) married before age 18: 33.5%
- Maternal mortality ratio: 36 per 100,000 live births
- Maternal mortality due to HIV: ND
- Neonatal mortality rate: 8.1 per 1,000 live births

HIV

- Number of new HIV infections: ND
- Number of people living with HIV: ND
- Number of AIDS related deaths: ND

HIV incidence per 1,000 population (15+): ND

HIV prevalence among adults (15-49): ND

CONTEXT

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain
**ENABLING ENVIRONMENT**

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

**ND = No Data**

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain

### Laws and policies

#### People living with HIV

**Are there laws or policies that:**

- Criminalize transmission, exposure or non-disclosure of HIV
  - Yes

- Restrict entry, stay and residence of people living with HIV
  - ND

- Protect against discrimination on basis of HIV status
  - ND

- Allow HIV self-testing
  - No

- Make oral pre-exposure prophylaxis for HIV (PrEP) available
  - ND

### Key populations

**Are there laws or policies that:**

- Criminalize same-sex sexual behaviour
  - No

- Criminalize sex work
  - Partial

- Allow the death penalty for people convicted of drug-related offences
  - ND

- Support a harm reduction approach for people who use drugs
  - ND

- Legally recognize a third gender
  - ND

### SRHR and gender-based violence

**Are there laws or policies that:**

- Allow safe abortion
  - Yes
  - To save a woman’s life
  - Yes
  - To preserve a woman’s physical health
  - Yes
  - To preserve a woman’s mental health
  - Yes
  - In case of rape
  - ND
  - In case of incest
  - ND
  - Owing to foetal impairment
  - Yes
  - For economic or social reasons
  - ND
  - On request
  - ND

- Require spousal consent for married women to access SRH services
  - ND

- Explicitly criminalize marital rape
  - Yes

- Criminalize domestic violence
  - Yes

- Criminalize sexual harassment
  - Yes

- Require provision of CSE in primary school
  - ND

- National strategy or policy on self-care interventions
  - ND

### Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

| Demand for family planning satisfied with a modern method of contraception (15-49) | 64.9% |
| Knowledge of modern contraceptive methods | ND |
| Use of modern contraceptive methods (women 15-49) | 48.5% |
| Injection | 20.8% |
| Self injectable | ND |
| Pill | 22.5% |
| Male condom | 9.9% |
| IUD | 3.1% |
| Implant | 6.8% |
| Female sterilization | 35.9% |
| Other modern methods | 1.0% |

**Antenatal, delivery and postnatal care**

| Attending antenatal clinic | 97.2% |
| Proportion of births attended by skilled health personnel | 94.0% |
| Births by caesarean section | 34.2% |
| Postnatal checkup in first two days after birth | 96.4% |

**Vertical transmission of HIV**

| Pregnant women tested for HIV | ND |
| Early infant diagnosis (HIV-testing of infants at risk) | ND |
| Vertical transmission (at 12 months) | ND |
| Primary infertility among women | ND |

**Vertical transmission of syphilis**

| Tested for syphilis at 1st antenatal care visit | 93.4% |
| Percentage testing positive for syphilis who are treated | 42.9% |
| Congenital syphilis rate (per 100,000 live births) | 0.0 |

**Abortion**

| Abortions per 1,000 women (15-49) | ND |
**SERVICE DELIVERY: SEXUAL HEALTH**

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

ND = No Data

### Global Targets:
- Achieved
- Challenges remain
- Major challenges remain

#### HIV prevention
- Condom use at last high-risk sex (15-49)\(^7\)
  - Male circumcision\(^7\)\(^8\)

#### 95-95-95 testing and treatment cascade
- People living with HIV who know their status (15+)\(^7\)
- People living with HIV who know their status who are on ART (15+)\(^7\)
- People living with HIV on ART who achieve viral load suppression (15+)\(^7\)

#### PrEP and HIV self-testing
- Current oral pre-exposure prophylaxis for HIV (PrEP) users\(^3\)

#### Syphilis
- HIV self tests conducted\(^3\)
- Active syphilis among men who have sex with men\(^4\)
- Active syphilis among sex workers\(^5\)

#### Gender based violence
- Women experiencing physical or sexual violence in past 12 months (15-49)\(^6\)
- Wife agrees husband justified beating her - at least one reason specified\(^7\)

#### Care/support provided by service delivery points in cases of rape or incest
- First-line support (psychological first aid)\(^8\)
- Emergency contraception for women (within 5 days)\(^8\)
- Safe abortion (in accordance with national laws)\(^8\)
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)\(^7\)

#### Cervical cancer
- Existence of national HPV vaccination programme\(^8\)
- Existence of national cervical cancer screening programme\(^5\)
- Type of programme\(^4\)
- Coverage of national screening programme\(^5\)

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

36. 2019. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

38. No Data. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - http://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

40. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://www.statcompiler.com/

41. No Data. Indicator: SDG 5.6.1: Proportion of women who make their own decisions about sexual and reproductive health and rights and access sexual and reproductive health services. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/topicresult?id=212

43. No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org
45. No Data. Indicator: SDG 3.8.2. Population with large health expenditures as a share of total expenditure or income greater than 10%. Source: SDG database - https://aidsinfo.unaids.org/dg/index/database
48b. 2018. Indicator: SDG 3.7.1. Nurses and midwifery personnel (doctor, nurse or midwife) at least once during pregnancy
59. 2016. Indicator: Percentage of total demand for family planning among married or in-union women aged 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unstats.un.org/sdgs/indicators/database
64. 2016. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
65. 2016. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
70. No Data. Indicator: Percentage of infants born to women living with HIV receiving a virological test for HIV within two months of birth. Source: UNAIDS estimates - https://aidsinfo.unaids.org
73. 2013. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://aidsinfo.unaids.org/dg/index/database
80. No Data. Indicator: People living with HIV who know their status who are on ART (15+). Source: UNAIDS estimates - https://aidsinfo.unaids.org
86. No Data. Indicator: SDG 5.2.1. Proportion of ever-married or partnered women aged 15-49 who experienced physical or sexual violence from a current or former intimate partner in the past 12 months. Source: SDG database - https://unstats.un.org/sdgs/indicators/database
87. 2011. Indicator: Percentage of women ages 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS
88. No Data. Indicator: Service delivery points provide care/support for women men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
91. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - https://lawsandpolicies.unaids.org/

98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. 2016. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: Multiple Indicator Cluster Survey 2015-16. Compiled by UNICEF - https://data.unicef.org/topic/hivaids/adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

106. 2016. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

112. No Data. Indicator: Percentage of people who inject drugs who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. 2016. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
