This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publicly available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022*
**Demographic data**

- **Population size**: 3.3m
  - Female: 1.7m
  - Male: 1.6m

- **Life expectancy at birth**:
  - Female: 79.1 years
  - Male: 74.4 years

**Population age distribution**

**CONTEXT**

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

**Global Targets:**

- **Achieved**
- **Challenges remain**
- **Major challenges remain**
**ENABLING ENVIRONMENT**

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

Health information

Paper-based or electronic health information system\(^{51}\)

ND

Antenatal care data captured in health information system\(^{52}\)

ND

Health financing

Total health expenditure as a percentage of GDP\(^{53}\)

8.9%

Government health expenditure as percentage of GDP\(^{54}\)

6.2%

Total health expenditure per capita (USD)\(^{55}\)

$539.5

Government expenditure on reproductive health per capita (USD)\(^{56}\)

ND

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services\(^{57}\)

Data Not Available

Health facilities delivering HIV treatment and care with SRH services\(^{58}\)

Data Not Available
**SERVICE DELIVERY: REPRODUCTIVE HEALTH**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**ND = No Data**

### Contraception / Family Planning

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

**HIV prevention**
- Condom use at last high risk sex (15-49)\(^7\)
- Male circumcision\(^7\)

**95-95-95 testing and treatment cascade**
- People living with HIV who know their status (15+)\(^7\)
- People living with HIV who are on ART (15+)\(^10\)
- People living with HIV on ART who achieve viral load suppression (15+)\(^11\)

**PrEP and HIV self-testing**
- Current oral pre-exposure prophylaxis for HIV (PrEP) users\(^53\)
- HIV self tests conducted\(^83\)

**Syphilis**
- Active syphilis among men who have sex with men\(^44\)
- Active syphilis among sex workers\(^45\)

**Gender based violence**
- Women experiencing physical or sexual violence in past 12 months (15-49)\(^6\)
- Wife agrees husband justified beating her - at least one reason specified\(^47\)

**Care/support provided by service delivery points in cases of rape or incest**
- First-line support (psychological first aid)\(^48\)
- Emergency contraception for women (within 5 days)\(^85\)
- Safe abortion (in accordance with national laws)\(^90\)
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)\(^97\)

**Cervical cancer**
- Existence of national HPV vaccination programme\(^92\)
- Existence of national cervical cancer screening programme\(^93\)

**Type of programme**\(^94\)
- Organized population based screening

**Coverage of national screening programme**\(^95\)

**ND = No Data**

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain
Harmful practices

Girls married before 18
- 3.5%

Female genital mutilation / cutting
- ND

Comprehensive Sexuality Education

Primary schools fully implementing national CSE policy
- ND

Secondary schools fully implementing national CSE policy
- ND

Adolescent sexual health

Had multiple partners and used a condom at last sex (15-19)

- Female: ND
- Male: 67.4%

Correct knowledge of HIV prevention (15-24)

- Female: 47.6%
- Male: 47.4%

Key populations

Men who have sex with men
- Population size estimate: 6,900
- HIV prevalence: 1.1%
- Knowledge of HIV status: ND
- Condom use at last sex: 62.4%

Sex workers
- Population size estimate: 4,000
- HIV prevalence: 0%
- Knowledge of HIV status: ND
- Condom use at last sex: 80.4%

People who inject drugs
- Population size estimate: 12,500
- HIV prevalence: 0%
- Knowledge of HIV status: ND
- Condom use at last sex: 35.2%

Transgender people
- Population size estimate: ND
- HIV prevalence: ND
- Knowledge of HIV status: ND
- Condom use at last sex: ND

Prisoners
- Population size estimate: ND
- HIV prevalence: ND
- Knowledge of HIV status: ND
- Condom use at last sex: ND

Global Targets:
- Achieved

SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.
1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/database/6

36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

38. 2013. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division. - http://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

43. No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org
47. 2015. Indicator: Countries that have passed legislation on universal health coverage. Source: WHO Global Health Observatory - http://apps.who.int/gho/portal/uhc-hsscabinet-wraper-v2.jsp?id=1030103
49. No Data. Indicator: Education and training - nurses and midwifery personnel per 10,000 population. Source: WHO Global Health Observatory - https://apps.who.int/gho/data/view.main.UHCRRHv
59. 2012. Indicator: Percentage of total demand for family planning among married or in-union women aged 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unstats.un.org/sdgs/indicators/database
64. 2012. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy. Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
65. 2012. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
70. No Data. Indicator: Percentage of infants born to women living with HIV receiving a virological test for HIV within two months of birth. Source: UNAIDS estimates - https://aidsinfo.unaids.org
73. No Data. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYPFSTv
75. No Data. Indicator: Congenital syphilis rate per 100,000 live births. Source: UNAIDS Global Health Observatory data repository - http://aidsinfo.unaids.org
80. No Data. Indicator: People living with HIV who know their status who are on ART (15+). Source: UNAIDS estimates - https://aidsinfo.unaids.org
86. No Data. Indicator: SDG 5.2.1. Proportion of ever-married or partnered women aged 15-49 who experienced physical or sexual violence from a current or former intimate partner in the past 12 months. Source: SDG database - https://unstats.un.org/sdgs/indicators/database
87. 2012. Indicator: Percentage of women ages 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any reason. Source: UNAIDS estimates - https://aidsinfo.unaids.org
88. No Data. Indicator: Service delivery points provide care/support for women men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
89. No Data.Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

90. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

91. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

96. 2016. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. 2012. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: Multiple Indicator Cluster Survey 2011-12. Compiled by UNICEF - https://data.unicef.org/topics/hiv/aids/adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

104. 2016. Indicator: Percentage of men who have sex with men who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

106. 2015. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

110. 2015. Indicator: Percentage of female and male sex workers reporting the use of a condom with their most recent client. Source: UNAIDS estimates - https://aidsinfo.unaids.org

113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

114. 2015. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. No Data. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
