This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation – including successes, areas for improvement, and data gaps – this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
Demographic data

Population size: 2.4m
- Female: 1.2m
- Male: 1.1m

Life expectancy at birth:
- Female: 65.5
- Male: 59.0

Population age distribution:
- 0-14: 33.4%
- 15-24: 18.3%
- 25-49: 35.1%
- 50+: 13.3%

Sexual and Reproductive Health

Total fertility rate: 2.9 births per woman

Adolescent birth rate: 46.1 per 1,000 women aged 15-19

Median age at first sex among young people (20-24): ND

Young women (20-24) married before age 18: ND

Maternal mortality ratio: 144 per 100,000 live births

Maternal mortality due to HIV: ND

Neonatal mortality rate: 17.9 per 1000 live births

HIV

Number of new HIV infections: 9,500
- Child (0-14): ND
- Female (15-24): 2,200
- Male (15-24): <1,000
- Female (25-49): 2,600
- Male (25-49): 2,900
- Female (50+): <500
- Male (50+): <500

Number of people living with HIV: 380,000
- Female (15-24): 20,000
- Male (15-24): 11,000
- Female (25-49): 150,000
- Male (25-49): 100,000
- Female (50+): 45,000
- Male (50+): 45,000

Number of AIDS related deaths: 5,000
- Child (0-14): ND
- Female (15-24): <500
- Male (15-24): <500
- Female (25-49): 1,400
- Male (25-49): 1,500
- Female (50+): <1,000
- Male (50+): <1,000

HIV incidence per 1,000 population (15+): 7.28

HIV prevalence among adults (15-49): 20.7%

Context

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain
**Impact on integrated SRHR:**
- Supportive
- Partial
- Punitive

**People living with HIV**

Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV\(^{19}\) 
  - Yes
- Restrict entry, stay and residence of people living with HIV\(^{20}\) 
  - No
- Protect against discrimination on basis of HIV status\(^{21}\) 
  - No
- Allow HIV self-testing\(^{22}\) 
  - Yes
- Make oral pre-exposure prophylaxis for HIV (PrEP) available\(^{23}\) 
  - No

**Key populations**

Are there laws or policies that:
- Criminalize same-sex sexual behaviour\(^{24}\) 
  - No
- Criminalize sex work\(^{25}\) 
  - Partial
- Allow the death penalty for people convicted of drug-related offences\(^{26}\) 
  - No
- Support a harm reduction approach for people who use drugs\(^{27}\) 
  - No
- Legally recognize a third gender\(^{28}\) 
  - ND

**SRHR and gender-based violence**

Are there laws or policies that:
- Allow safe abortion\(^{29}\)
  - Yes
- - To save a woman’s life
- - To preserve a woman’s physical health
- - To preserve a woman’s mental health
- - In case of rape
- - In case of incest
- - Owing to foetal impairment
- - For economic or social reasons
- - On request
- Require spousal consent for married women to access SRH services\(^{30}\) 
  - No
- Explicitly criminalize marital rape\(^{31}\) 
  - No
- Criminalize domestic violence\(^{32}\) 
  - Yes
- Criminalize sexual harassment\(^{33}\) 
  - Yes
- Require provision of CSE in primary school\(^{34}\) 
  - Yes
- National strategy or policy on self-care interventions\(^{35}\) 
  - ND

**Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)\(^{36}\)**

<table>

### Health information

**Paper-based or electronic health information system**

- **Both**

**Antenatal care data captured in health information system**

- **Yes**

### Health financing

**Total health expenditure as a percentage of GDP**

- 5.8%

**Government health expenditure as percentage of GDP**

- 4.5%

**Total health expenditure per capita (USD)**

- **$483**

**Government expenditure on reproductive health per capita (USD)**

- **$37.8**

### Integrated service delivery

**Health facilities delivering HIV counselling and testing with SRH services**

- All
- Some
- None

**Health facilities delivering HIV treatment and care with SRH services**

- All
- Some
- None

---

**HEALTH SYSTEMS**

Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain
SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets: Achieved Challenges remain Major challenges remain

Contraception / Family Planning

| Demand for family planning satisfied with a modern method of contraception (15-49) | ND |
| Knowledge of modern contraceptive methods | ND |
| Modern contraceptive method (women 15-49) | ND |
| Injection | ND |
| Self injectable | ND |
| Pill | ND |
| Male condom | ND |
| IUD | ND |
| Implant | ND |
| Female sterilization | ND |
| Other modern methods | ND |

Antenatal, delivery and postnatal care

| Attending antenatal clinic | At least once | ND |
| Proportion of births attended by skilled health personnel | 99.8% |
| Births by caesarean section | ND |
| Postnatal checkup in first two days after birth | ND |

Vertical transmission of HIV

| Pregnant women tested for HIV | 93.1% |
| Early infant diagnosis (HIV-testing of infants at risk) | 84.6% |
| Vertical transmission (at 12 months) | 1.9% |
| Primary infertility among women | ND |

Vertical transmission of syphilis

| Tested for syphilis at 1st antenatal care visit | 73.1% |
| Percentage testing positive for syphilis who are treated | 42.2% |
| Congenital syphilis rate (per 100,000 live births) | ND |
| Abortions per 1,000 women (15-49) | ND |
SERVICE DELIVERY: SEXUAL HEALTH

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain

**ND = No Data**

### HIV prevention
- Condom use at last high risk sex (15-49)
  - Male: ND
  - Female: ND

### 95-95-95 testing and treatment cascade
- People living with HIV who know their status (15+)
  - Female: 95%
  - Male: 91%
- People living with HIV who are on ART (15+)
  - Female: 93%
  - Male: 71%
- People living with HIV on ART who achieve viral load suppression (15+)
  - Female: 90%
  - Male: 68%

### Male circumcision
- Male: ND

### PrEP and HIV self-testing
- Current oral pre-exposure prophylaxis for HIV (PrEP) users
  - 1,954
- HIV self tests conducted
  - 7,000

### Syphilis
- Active syphilis among men who have sex with men
  - 3.2%
- Active syphilis among sex workers
  - 9.4%

### Gender based violence
- Women experiencing physical or sexual violence in past 12 months (15-49)
  - ND
- Wife agrees husband justified beating her - at least one reason specified
  - ND

### Care/support provided by service delivery points in cases of rape or incest
- First-line support (psychological first aid)
  - Yes
- Emergency contraception for women (within 5 days)
  - Yes
- Safe abortion (in accordance with national laws)
  - Yes
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)
  - Yes

### Cervical cancer
- Existence of national HPV vaccination programme
  - Yes
- Existence of national cervical cancer screening programme
  - No
- Type of programme
  - None
- Coverage of national screening programme
  - 0%
SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.
