This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

**CONTEXT**

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

Universal Health Coverage

Coverage of essential health services (SDG 3.8.1) 81

Catastrophic health spending (SDG 3.8.2)
Households where expenditure on health is greater than:
- 10% of income 45
- 25% of income 46

Governance
Legislation on universal health coverage 47

Health workforce
Skilled health professionals (per 10,000 population)
- Doctors 48a 16.1
- Nurses and Midwives 48b 59.0
- Pharmacists 48c 1.71

Supply Chain
Availability of essential medicines and commodities in Public Health facilities 49

Health information
Antenatal care data captured in health information system 52

Health financing
Total health expenditure as a percentage of GDP 53 2.4%

Government health expenditure as percentage of GDP 54 2.3%

Total health expenditure per capita (USD) 55 $763.2

Government expenditure on reproductive health per capita (USD) 56 ND

Integrated service delivery
Health facilities delivering HIV counselling and testing with SRH services 57

Health facilities delivering HIV treatment and care with SRH services 58

Global Targets: Achieved Challenges remain Major challenges remain

ND = No Data

Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.
SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain

### Contraception / Family Planning

**Demand for family planning satisfied with a modern method of contraception (15-49)\(^5\)**
- ND

**Knowledge of modern contraceptive methods\(^10\)**
- ND

**Modern contraceptive method (women 15-49)\(^1\)**
- Injection: ND
- Self injectable: ND
- Pill: ND
- Male condom: ND
- IUD: ND
- Implant: ND
- Female sterilization: ND
- Other modern methods: ND

**Unmet need for family planning (15-49)\(^2\)**
- ND

**Use of modern contraceptive methods (women 15-49)\(^3\)**
- ND

### Antenatal, delivery and postnatal care

**Attending antenatal clinic**
- At least once\(^4\): ND
- At least 4 times\(^5\): 93.2%

**Proportion of births attended by skilled health personnel\(^6\)**
- 99.8%

**Births by caesarean section\(^7\)**
- ND

**Postnatal checkup in first two days after birth\(^8\)**
- ND

### Vertical transmission of HIV

**Pregnant women tested for HIV\(^9\)**
- ND

**Early infant diagnosis (HIV-testing of infants at risk)\(^10\)**
- ND

**Vertical transmission (at 12 months)\(^11\)**
- ND

**Primary infertility among women\(^12\)**
- ND

### Vertical transmission of syphilis

**Tested for syphilis at 1st antenatal care visit\(^13\)**
- ND

**Percentage testing positive for syphilis who are treated\(^14\)**
- ND

**Congenital syphilis rate\(^15\) (per 100,000 live births)**
- ND

### Abortion

**Abortions per 1,000 women (15-49)\(^16\)**
- ND
SERVICE DELIVERY: SEXUAL HEALTH

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

ND = No Data

Global Targets: Achieved Challenges remain Major challenges remain

HIV prevention

Condom use at last high risk sex (15-49)77

Male circumcision78

PrEP and HIV self-testing

Current oral pre-exposure prophylaxis for HIV (PrEP) users83

Syphilis

Active syphilis among men who have sex with men84

Gender based violence

Women experiencing physical or sexual violence in past 12 months (15-49)86

Wife agrees husband justified beating her - at least one reason specified87

Cervical cancer

Existence of national HPV vaccination programme92

Existence of national cervical cancer screening programme93

Type of programme94

Coverage of national screening programme95

95-95-95 testing and treatment cascade

People living with HIV who know their status (15+)79

People living with HIV who know their status who are on ART (15+)80

People living with HIV on ART who achieve viral load suppression (15+)81

PrEP and HIV self-testing

HIV self tests conducted83

Active syphilis among sex workers85

Emergency contraception for women (within 5 days)86

Safe abortion (in accordance with national laws)87

Post-exposure prophylaxis for STIs and HIV (within 72 hours)88

First-line support (psychological first aid)89

Coverage of national screening programme50-70%
Harmful practices

Girls married before 18
ND
Female genital mutilation / cutting
ND

Comprehensive Sexuality Education

Primary schools fully implementing national CSE policy
ND
Secondary schools fully implementing national CSE policy
76-100%

Adolescent sexual health

Had multiple partners and used a condom at last sex (15-19)
ND

The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/datasets/index/database
36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/datasets/index/database
40. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://lawsandpolicies.unaids.org/topicresult?id=328
41. No Data. Indicator: SDG 5.6.1: Proportion of women who make their own health care decisions regarding sexual relations, contraceptive use and access sexual and reproductive health services. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
43. No Data. Indicator: SDG 5.6.1: Proportion of women who make their own health care decisions regarding sexual relations, contraceptive use and access sexual and reproductive health services. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
44. No Data. Indicator: Laws requiring parental consent for adolescents to access sexual and reproductive health services. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
46. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/datasets/index/database
50. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://lawsandpolicies.unaids.org/topicresult?id=328
89. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

90. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

91. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. No Data. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNICEF global databases - https://data.unicef.org/topic/health/adolescents-teenage-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

104. No Data. Indicator: Percentage of men who have sex with men who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

106. No Data. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

108. No Data. Indicator: Percentage of sex workers who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

110. No Data. Indicator: Percentage of female and male sex workers reporting the use of a condom with their most recent client. Source: UNAIDS estimates - https://aidsinfo.unaids.org

112. No Data. Indicator: Percentage of people who inject drugs who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. 2019. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
