This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
**Demographic data**

- **Population size**: 1439.3m
  - Female: 701.1m
  - Male: 738.3m
- **Life expectancy at birth**
  - Female: 80.5
  - Male: 74.7
- **Population age distribution**

**Sexual and Reproductive Health**

- **Total fertility rate**: 1.7 births per woman
- **Adolescent birth rate**: 7.6 per 1,000 women aged 15-19
- **Median age at first sex among young people (20-24)**: ND
- **Young women (20-24) married before age 18**: ND
- **Maternal mortality ratio**: 29 per 100,000 live births
- **Maternal mortality due to HIV**: ND
- **Neonatal mortality rate**: 3.9 per 1000 live births

**HIV**

- **Number of new HIV infections**: ND
- **Number of people living with HIV**: ND
- **Number of AIDS related deaths**: ND

**HIV incidence per 1,000 population (15+)**: ND

**HIV prevalence among adults (15-49)**: ND
## Impact on integrated SRHR: Supportive  Partial  Punitive

### Laws and policies

<table>
<thead>
<tr>
<th>People living with HIV</th>
<th>Are there laws or policies that:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Criminalize transmission, exposure or non-disclosure of HIV</td>
<td>Yes</td>
</tr>
<tr>
<td>Restrict entry, stay and residence of people living with HIV</td>
<td>No</td>
</tr>
<tr>
<td>Protect against discrimination on basis of HIV status</td>
<td>Yes</td>
</tr>
<tr>
<td>Allow HIV self-testing</td>
<td>Yes</td>
</tr>
<tr>
<td>Make oral pre-exposure prophylaxis for HIV (PrEP) available</td>
<td>Yes</td>
</tr>
</tbody>
</table>

### Key populations

<table>
<thead>
<tr>
<th>Are there laws or policies that:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Criminalize same-sex sexual behaviour</td>
</tr>
<tr>
<td>Criminalize sex work</td>

### Stigma

<table>
<thead>
<tr>
<th>Percentage of general population reporting discriminatory attitudes towards people living with HIV</th>
</tr>
</thead>
<tbody>
<tr>
<td>ND</td>
</tr>
</tbody>
</table>

---

**ENABLING ENVIRONMENT**

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain

---

**Women's empowerment**

- Percentage of women (15-49) making SRHR decisions
- Percentage of women that say in decisions regarding their own healthcare

**Global Gender Gap Index**

- Score (1.0 = parity)

**Stigma**

- Percentage of general population reporting discriminatory attitudes towards people living with HIV
Universal Health Coverage

Coverage of essential health services (SDG 3.8.1)\(^a\)

Catastrophic health spending (SDG 3.8.2)  
Households where expenditure on health is greater than:

- 10% of income\(^b\): 19.7%  
- 25% of income\(^c\): 5.4%

Governance

Legislation on universal health coverage\(^d\)  
- No

Health workforce

Skilled health professionals (per 10,000 population)

- Doctors\(^e\): 19.8
- Nurses and Midwives\(^f\): 26.6
- Pharmacists\(^g\): 3.17

Supply Chain

Availability of essential medicines and commodities in Public Health facilities\(^h\)  
- 15.5%

Health information

Male condom stock-out in the past 12 months\(^i\)  
- No

Antenatal care data captured in health information system\(^j\)  
- Yes

Health financing

Total health expenditure as a percentage of GDP\(^k\)  
- 5.4%

Government health expenditure as percentage of GDP\(^l\)  
- 3.0%

Total health expenditure per capita (USD)\(^m\)  
- $501.1

Government expenditure on reproductive health per capita (USD)\(^n\)  
- ND

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services\(^o\)  
- All

Health facilities delivering HIV treatment and care with SRH services\(^p\)  
- All

Global Targets:

- Achieved
- Challenges remain
- Major challenges remain

ND = No Data

Assertive Systems:

Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and well-being for all.
SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets: Achieved ● Challenges remain ○ Major challenges remain -

**Contraception / Family Planning**

**Demand for family planning satisfied with a modern method of contraception (15-49)**

- **Injection**: ND
- **Self injectable**: ND
- **Pill**: ND
- **Male condom**: 2.3%
- **IUD**: 80.5%
- **Implant**: 30.6%
- **Female sterilization**: 42.4%
- **Other modern methods**: 0.2%

**Knowledge of modern contraceptive methods**

- **Injection**: ND
- **Self injectable**: ND
- **Pill**: ND
- **Male condom**: 80.5%
- **IUD**: 30.6%
- **Implant**: 42.4%
- **Female sterilization**: 0.2%
- **Other modern methods**: 2.6%

**Modern contraceptive method (women 15-49)**

- **Injection**: 0%
- **Self injectable**: ND
- **Pill**: 1.5%
- **Male condom**: 30.6%
- **IUD**: 42.4%
- **Implant**: 0.2%
- **Female sterilization**: 22.7%
- **Other modern methods**: 2.6%

**Unmet need for family planning (15-49)**

- **2.3%**

**Use of modern contraceptive methods (women 15-49)**

- **80.5%**

**Antenatal, delivery and postnatal care**

**Attending antenatal clinic**

- At least once: 99.6%
- At least 4 times: 81.4%

**Proportion of births attended by skilled health personnel**

- 99.9%
- 41.0%
- 64.0%

**Births by caesarean section**

- 99.9%
- 41.0%

**Postnatal checkup in first two days after birth**

- 99.9%
- 64.0%

**Vertical transmission of HIV**

**Pregnant women tested for HIV**

- 85.7%
- ND

**Early infant diagnosis (HIV-testing of infants at risk)**

- ND
- ND

**Vertical transmission (at 12 months)**

- ND
- ND

**Primary infertility among women**

- ND
- ND

**Vertical transmission of syphilis**

**Tested for syphilis at 1st antenatal care visit**

- 99.8%

**Percentage testing positive for syphilis who are treated**

- 88.7%

**Congenital syphilis rate per 100,000 live births**

- 40.7

**Abortion**

**Abortions per 1,000 women (15-49)**

- ND
HIV prevention

Condom use at last high risk sex (15-49)\(^7\)

Male circumcision\(^8\)

PrEP and HIV self-testing

Current oral pre-exposure prophylaxis for HIV (PrEP) users\(^5\)

Syphilis

Active syphilis among men who have sex with men\(^4\)

Gender based violence

Women experiencing physical or sexual violence in past 12 months (15-49)\(^6\)

Wife agrees husband justified beating her - at least one reason specified\(^7\)

Care/support provided by service delivery points in cases of rape or incest

First-line support (psychological first aid)\(^8\)

Emergency contraception for women (within 5 days)\(^6\)

Safe abortion (in accordance with national laws)\(^5\)

Post-exposure prophylaxis for STIs and HIV (within 72 hours)\(^7\)

Cervical cancer

Existence of national HPV vaccination programme\(^9\)

Existence of national cervical cancer screening programme\(^5\)

Type of programme\(^4\)

Coverage of national screening programme\(^5\)

The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available validated data sources. 

3. WHO (2018) Call to action to attain universal health coverage through linked sexual and reproductive health and rights and HIV interventions. Available from: https://www.who.int/reproductivehealth/publications/callto-action-linked-sh-

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database/

89. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

90. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

91. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. No Data. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNICEF global databases - https://data.unicef.org/topic/hiv-aids/adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

106. 2019. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. No Data. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
