This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
Demographic data

Population size
- Female: 13.9m
- Male: 13.8m

Life expectancy at birth
- Female: 66.6
- Male: 64.1

Population age distribution
- 0-14: 40.1%
- 15-24: 20.5%
- 25-49: 28.8%
- 50+: 10.6%

Sexual and Reproductive Health

Total fertility rate
- 4.1 births per woman

Adolescent birth rate
- 109.6 per 1,000 women aged 15-19

Median age at first sex among young people (20-24)
- Male: ND
- Female: ND

Maternal mortality ratio
- 335 per 100,000 live births

Maternal mortality due to HIV
- ND

Neonatal mortality rate
- 20.1 per 1000 live births

HIV

Number of new HIV infections
- Child (0-14): <500
- Female (15-24): <1,000
- Male (15-24): <500
- Female (25-49): 1,700
- Male (25-49): 2,400
- Female (50+): <200
- Male (50+): <200
- Total: 5,900

Number of people living with HIV
- Child (0-14): 1,700
- Female (15-24): 2,200
- Male (15-24): 1,100
- Female (25-49): 14,000
- Male (25-49): 17,000
- Female (50+): 1,400
- Male (50+): 2,000
- Total: 39,000

Number of AIDS related deaths
- Child (0-14): <500
- Female (15-24): <100
- Male (15-24): <100
- Female (25-49): <500
- Male (25-49): <500
- Female (50+): <100
- Male (50+): <200
- Total: 1,400

HIV incidence per 1,000 population (15+)
- 0.35

HIV prevalence among adults (15-49)
- 0.3%

CONTEXT

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

</table>
**Universal Health Coverage**

- **Coverage of essential health services (SDG 3.8.1)**
  - 28

- **Catastrophic health spending (SDG 3.8.2)**
  - Households where expenditure on health is greater than:
    - 10% of income: ND
    - 25% of income: ND

**Governance**

- Legislation on universal health coverage⁶⁷: No

**Health workforce**

- Skilled health professionals (per 10,000 population):
  - Doctors: 1.8
  - Nurses and Midwives: 3.0
  - Pharmacists: 0.00

**Supply Chain**

- Availability of essential medicines and commodities in Public Health facilities⁶⁸: ND

- Male condom stock-out in the past 12 months⁶⁹: Yes

**Health information**

- Paper-based or electronic health information system⁷⁰: Both
- Antenatal care data captured in health information system⁷¹: Yes

**Health financing**

- Total health expenditure as a percentage of GDP⁷²: 4.8%
- Government health expenditure as percentage of GDP⁷³: 1.7%
- Total health expenditure per capita (USD)⁷⁴: $22.0
- Government expenditure on reproductive health per capita (USD)⁷⁵: ND

**Integrated service delivery**

- Health facilities delivering HIV counselling and testing with SRH services⁷⁶: All
- Health facilities delivering HIV treatment and care with SRH services⁷⁷: All
SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets: Achieved Challenges remain Major challenges remain

Contraception / Family Planning

Demand for family planning satisfied with a modern method of contraception (15-49) 65.9%

Knowledge of modern contraceptive methods 60

Use of modern contraceptive methods (women 15-49) 40.5%

Modern contraceptive method (women 15-49)

<table>

<tr>
<td>Implant</td>
<td>16.8%</td>
</tr>
<tr>
<td>Female sterilization</td>
<td>1.2%</td>
</tr>
<tr>
<td>Other modern methods</td>
<td>2.5%</td>
</tr>
</tbody>
</table>

Antenatal, delivery and postnatal care

Attending antenatal clinic

- At least once 85.1%
- At least 4 times 50.6%

Proportion of births attended by skilled health personnel 46.1%

Births by caesarean section 2.0%

Postnatal checkup in first two days after birth 72.1%

Vertical transmission of HIV

Pregnant women tested for HIV 35.4%

Early infant diagnosis (HIV-testing of infants at risk) 0.7%

Vertical transmission (at 12 months) 35.2%

Primary infertility among women ND

Vertical transmission of syphilis

Tested for syphilis at 1st antenatal care visit 9.8%

Percentage testing positive for syphilis who are treated 47.8%

Congenital syphilis rate (per 100,000 live births) ND

Abortion

Abortions per 1,000 women (15-49) ND
HIV prevention

- Condom use at last high risk sex (15-49): 77%
- Male circumcision: ND

95-95-95 testing and treatment cascade

- People living with HIV who know their status (15+):
  - Female: 18%
  - Male: 13%
- People living with HIV who are on ART (15+):
  - Female: 15%
  - Male: 12%
- People living with HIV on ART who achieve viral load suppression (15+):
  - Female: ND
  - Male: ND

PrEP and HIV self-testing

- Current oral pre-exposure prophylaxis for HIV (PrEP) users: ND
- HIV self tests conducted: 0

Syphilis

- Active syphilis among men who have sex with men: 6.1%
- Active syphilis among sex workers: 12.1%

Gender based violence

- Women experiencing physical or sexual violence in past 12 months (15-49): ND
- Wife agrees husband justified beating her - at least one reason specified: 45.2%

Care/support provided by service delivery points in cases of rape or incest

- First-line support (psychological first aid): Yes
- Emergency contraception for women (within 5 days): Yes
- Safe abortion (in accordance with national laws): No
- Post-exposure prophylaxis for STIs and HIV (within 72 hours): Yes

Cervical cancer

- Existence of national HPV vaccination programme: No
- Existence of national cervical cancer screening programme: Yes
- Type of programme: Opportunistic screening
- Coverage of national screening programme: <10%

Global Targets: Achieved ∙ Challenges remain ○ Major challenges remain ○
SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain

Harmful practices

Girls married before 18
- 40.3%

Female genital mutilation / cutting
- ND

Comprehensive Sexuality Education

Primary schools fully implementing national CSE policy
- 51-75%

Secondary schools fully implementing national CSE policy
- 51-75%

Adolescent sexual health

Had multiple partners and used a condom at last sex (15-19)
- Female: 8.5%
- Male: 7.3%

Correct knowledge of HIV prevention (15-24)
- Female: 22.9%
- Male: 25.5%
