This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
Demographic data

Population size: 1.2m
Female: 0.59m
Male: 0.57m

Life expectancy at birth:
Female: 63.2
Male: 53.4

Population age distribution:
- 0-14: 37.4%
- 15-24: 20.9%
- 25-49: 31.5%
- 50+: 10.2%

Sexual and Reproductive Health

Total fertility rate: 3.0
births per woman

Adolescent birth rate: 76.7
per 1,000 women aged 15-19

Median age at first sex among young people (20-24):
Male: ND
Female: ND

Young women (20-24) married before age 18: 5.3%

Maternal mortality ratio: 437
per 100,000 live births

HIV

Number of new HIV infections:
- Child (0-14): <500
- Female (15-24): 1,500
- Male (15-24): <500
- Female (25-49): 1,100
- Male (25-49): <1,000
- Female (50+): <100
- Male (50+): <100
- Total: 4,500

Number of people living with HIV:
- 0-14: 10,000
- 15-24: 14,000
- 25-49: 5,000
- 50+: 14,000
- Total: 200,000

Number of AIDS related deaths:
- 0-14: <200
- 15-24: <500
- 25-49: <200
- 50+: <200
- Total: 2,300

HIV incidence per 1,000 population (15+): 8.45

HIV prevalence among adults (15-49): 27.0%

CONTEXT

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets: Achieved 🟢 Challenges remain 🟠 Major challenges remain 🟥
ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

Laws and policies

People living with HIV
Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV
  - Yes
  - No
- Restrict entry, stay and residence of people living with HIV
  - Yes
  - No
- Protect against discrimination on basis of HIV status
  - Yes
  - No
- Allow HIV self-testing
  - Yes
  - No
- Make oral pre-exposure prophylaxis for HIV (PrEP) available
  - Yes
  - No

Key populations
Are there laws or policies that:
- Criminalize same-sex sexual behaviour
  - Yes
  - No
- Criminalize sex work
  - Yes
  - No
- Allow the death penalty for people convicted of drug-related offences
  - Yes
  - No
- Support a harm reduction approach for people who use drugs
  - Yes
  - No
- Legally recognize a third gender
  - Yes
  - No

SRHR and gender-based violence
Are there laws or policies that:
- Allow safe abortion
  - Yes
  - No
  - To save a woman’s life
  - Yes
  - No
  - To preserve a woman’s physical health
  - Yes
  - No
  - To preserve a woman’s mental health
  - Yes
  - No
  - In case of rape
  - Yes
  - No
  - In case of incest
  - Yes
  - No
  - Owing to foetal impairment
  - Yes
  - No
  - For economic or social reasons
  - Yes
  - No
  - On request
  - Yes
  - No
- Require spousal consent for married women to access SRH services
  - Yes
  - No
- Explicitly criminalize marital rape
  - Yes
  - No
- Criminalize domestic violence
  - Yes
  - No
- Criminalize sexual harassment
  - Yes
  - No
- Require provision of CSE in primary school
  - Yes
  - No
- National strategy or policy on self-care interventions
  - Yes
  - No

Stigma
Percentage of general population reporting discriminatory attitudes towards people living with HIV
ND
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

**Universal Health Coverage**
- **Coverage of essential health services (SDG 3.8.1)**: 63
- **Catastrophic health spending (SDG 3.8.2)**: Households where expenditure on health is greater than:
  - 10% of income
  - 25% of income

**Governance**
- **Legislation on universal health coverage**: No

**Health workforce**
- **Doctors**: 1.0
- **Nurses and Midwives**: 41.4
- **Pharmacists**: 0.28

**Supply Chain**
- **Availability of essential medicines and commodities in Public Health facilities**: ND
- **Male condom stock-out in the past 12 months**: No

**Health information**
- **Paper-based or electronic health information system**: Electronic
- **Antenatal care data captured in health information system**: ND

**Health financing**
- **Total health expenditure as a percentage of GDP**: 6.5%
- **Government health expenditure as percentage of GDP**: 2.1%
- **Total health expenditure per capita (USD)**: $271.1
- **Government expenditure on reproductive health per capita (USD)**: $2.6

**Integrated service delivery**
- **Health facilities delivering HIV counselling and testing with SRH services**: All
- **Health facilities delivering HIV treatment and care with SRH services**: All

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain
**SERVICE DELIVERY: REPRODUCTIVE HEALTH**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

- **Demand for family planning satisfied with a modern method of contraception (15-49)**
  - 82.9%

- **Unmet need for family planning (15-49)**
  - 15.2%

- **Knowledge of modern contraceptive methods (women 15-49)**
  - Self injectable
  - Pill
  - Male condom
  - IUD
  - Implant
  - Female sterilization
  - Other modern methods
  - 33.4%
  - 16.0%
  - 36.5%
  - 1.1%
  - 5.8%
  - 5.6%
  - 1.5%

**Antenatal, delivery and postnatal care**

- **Attending antenatal clinic**
  - At least once
  - 98.5%
  - At least 4 times
  - 76.1%
  - Postnatal checkup in first two days after birth
  - 87.5%

**Vertical transmission of HIV**

- **Pregnant women tested for HIV**
  - 99.0%

- **Early infant diagnosis (HIV-testing of infants at risk)**
  - 80.3%

- **Vertical transmission (at 12 months)**
  - 2.5%

- **Primary infertility among women**
  - ND

**Vertical transmission of syphilis**

- **Tested for syphilis at 1st antenatal care visit**
  - 89.4%

- **Percentage testing positive for syphilis who are treated**
  - 90.2%

- **Congenital syphilis rate (per 100,000 live births)**
  - ND

**Abortion**

- **Abortions per 1,000 women (15-49)**
  - ND

**ND = No Data**
### Service Delivery: Sexual Health

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

**SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL**

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.

**Key populations**

- **Men who have sex with men**: 2,400
- **Sex workers**: 4,000
- **People who inject drugs**: ND
- **Transgender people**: ND
- **Prisoners**: 2,700
1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017 Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://data.unicef.org/topic/child-protection/child-marriage/

15. 2019 Indicator: Number of people living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

43. No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org

45. No Data. Indicator: SDG 3.8.2. Population with large health expenditures as a share of total expenditure or income greater than 10%. Source: SDG database - https://apps.who.int/nha/database/Select/Indicators/en

59. 2014. Indicator: Percentage of total demand for family planning among married or in-union women aged 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unstats.un.org/sdgs/indicators/database

64. 2014. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy. Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

65. 2014. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

73. 2018. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z3610

75. No Data. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYPFSTI

86. No Data. Indicator: Percentage of women aged 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS

87. 2018. Indicator: Percentage of women aged 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS

88. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
