This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
Demographic data

- Population size: 4.3m
  - Female: 1.7m
  - Male: 2.6m

Life expectancy at birth

- Female: 84.0
- Male: 79.3

Population age distribution

- 0-14: 21.5%
- 15-24: 10.1%
- 25-49: 48.7%
- 50+: 19.7%

Sexual and Reproductive Health

- Total fertility rate: 2.1 births per woman
- Adolescent birth rate: 8.2 per 1,000 women aged 15-19
- Median age at first sex among young people (20-24): ND

HIV

- Number of new HIV infections
  - Child (0-14): ND
  - Female (15-24): ND
  - Male (15-24): ND
  - Female (25-49): ND
  - Male (25-49): ND
  - Female (50+): ND
  - Male (50+): ND
- Number of people living with HIV
  - Child (0-14): ND
  - Female (15-24): ND
  - Male (15-24): ND
  - Female (25-49): ND
  - Male (25-49): ND
  - Female (50+): ND
  - Male (50+): ND
- Number of AIDS related deaths
  - Child (0-14): ND
  - Female (15-24): ND
  - Male (15-24): ND
  - Female (25-49): ND
  - Male (25-49): ND
  - Female (50+): ND
  - Male (50+): ND

HIV incidence per 1,000 population (15+)
- ND

HIV prevalence among adults (15-49)
- ND
Impact on integrated SRHR: Supportive  Partial  Punitive

Laws and policies

People living with HIV
Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV
- Restrict entry, stay and residence of people living with HIV
- Protect against discrimination on basis of HIV status
- Allow HIV self-testing
- Make oral pre-exposure prophylaxis for HIV (PrEP) available

Key populations
Are there laws or policies that:
- Criminalize same-sex sexual behaviour
- Criminalize sex work
- Allow the death penalty for people convicted of drug-related offences
- Support a harm reduction approach for people who use drugs
- Legally recognize a third gender

SRHR and gender-based violence
Are there laws or policies that:
- Allow safe abortion
  - To save a woman’s life
  - To preserve a woman’s physical health
  - To preserve a woman’s mental health
  - In case of rape
  - In case of incest
  - Owing to foetal impairment
  - For economic or social reasons
  - On request
- Require spousal consent for married women to access SRH services
- Explicitly criminalize marital rape
- Criminalize domestic violence
- Criminalize sexual harassment
- Require provision of CSE in primary school
- National strategy or policy on self-care interventions

Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)
Maternity care  Family planning  CSE  Sexual health  Total
ND  ND  ND  ND  ND

Age of Consent
Legal age for consent to sexual intercourse
Legal age for marriage without parental consent
Female  Male
15  17

Laws requiring parental consent for adolescents to access SRH services
Female  Male
Yes <18yrs

Women’s empowerment
Percentage of women that believe they should have final say in decisions regarding their own healthcare

Global Gender Gap Index
Ranking (out of 156 countries)
Score (1.0 = parity)
Score 0.6  Ranking 143

Stigma
Percentage of general population reporting discriminatory attitudes towards people living with HIV
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

**Global Targets:**

- Achieved
- Challenges remain
- Major challenges remain

### Universal Health Coverage

**Coverage of essential health services (SDG 3.8.1)**

- 76%

**Catastrophic health spending (SDG 3.8.2)**

- Households where expenditure on health is greater than:
  - 10% of income: ND
  - 25% of income: ND

### Governance

- Legislation on universal health coverage: Yes

### Health workforce

- Skilled health professionals (per 10,000 population):
  - Doctors: 26.5
  - Nurses and Midwives: 74.1
  - Pharmacists: 4.92

### Supply Chain

- Availability of essential medicines and commodities in Public Health facilities: ND

### Health information

- Male condom stock-out in the past 12 months: No
- Paper-based or electronic health information system: Both
- Antenatal care data captured in health information system: Yes

### Health financing

- Total health expenditure as a percentage of GDP: 5.0%
- Government health expenditure as percentage of GDP: 4.4%
- Total health expenditure per capita (USD): $1711.2
- Government expenditure on reproductive health per capita (USD): ND

### Integrated service delivery

- Health facilities delivering HIV counselling and testing with SRH services: All
- Health facilities delivering HIV treatment and care with SRH services: Some
### Contraception / Family Planning

| Demand for family planning satisfied with a modern method of contraception (15-49) |
|----------------------------------|-----------|

---

**SERVICE DELIVERY: REPRODUCTIVE HEALTH**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**ND = No Data**

**Global Targets:**
- **Achieved**: 
- **Challenges remain**: 
- **Major challenges remain**:

SERVICE DELIVERY: SEXUAL HEALTH

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

ND = No Data

Global Targets: Achieved • Challenges remain ○ Major challenges remain

HIV prevention

- Condom use at last high risk sex (15-49)\(^7\) ND
- Male circumcision\(^78\) ND

95-95-95 testing and treatment cascade

- People living with HIV who know their status (15+)? ND
- People living with HIV who are on ART (15+)? ND
- People living with HIV on ART who achieve viral load suppression (15+)? ND

PrEP and HIV self-testing

- Current oral pre-exposure prophylaxis for HIV (PrEP) users\(^83\) 41
- HIV self tests conducted\(^3\) ND

Syphilis

- Active syphilis among men who have sex with men\(^44\) ND
- Active syphilis among sex workers\(^45\) ND

Gender based violence

- Women experiencing physical or sexual violence in past 12 months (15-49)\(^66\) ND
- Wife agrees husband justified beating her - at least one reason specified\(^87\) ND

Care/support provided by service delivery points in cases of rape or incest

- First-line support (psychological first aid)\(^88\) Yes
- Emergency contraception for women (within 5 days)\(^89\) Yes
- Safe abortion (in accordance with national laws)\(^90\) Yes
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)\(^91\) Yes

Cervical cancer

- Existence of national HPV vaccination programme\(^92\) No
- Existence of national cervical cancer screening programme\(^93\) No
- Type of programme\(^94\) None
- Coverage of national screening programme\(^95\) 0%

The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database
36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unsrstats.un.org/sdgs/indicators/database
38. 2011. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - http://unsrstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html
89. 2017. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - https://lawsandpolicies.unaids.org/

90. 2017. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - https://lawsandpolicies.unaids.org/

91. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - https://lawsandpolicies.unaids.org/

98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - https://lawsandpolicies.unaids.org/

100. No Data. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNICEF global databases - https://data.unicef.org/topic/hivaidess/adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

104. No Data. Indicator: Percentage of men who have sex with men who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

106. No Data. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

108. No Data. Indicator: Percentage of sex workers who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

110. No Data. Indicator: Percentage of female and male sex workers reporting the use of a condom with their most recent client. Source: UNAIDS estimates - https://aidsinfo.unaids.org

114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. 2018. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
