This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
Demographic data

Population size: 6.6m
- Female: 3.4m
- Male: 3.3m

Life expectancy at birth:
- Female: 77.9
- Male: 72.1

Population age distribution:
- 0-14: 29.5%
- 15-24: 17.9%
- 25-49: 36.2%
- 50+: 16.3%

Sexual and Reproductive Health

Total fertility rate: 2.4 births per woman

Adolescent birth rate: 85.0 per 1,000 women aged 15-19

Median age at first sex among young people (20-24): ND

Young women (20-24) married before age 18: 35.2%

Maternal mortality ratio: 98 per 100,000 live births

Maternal mortality due to HIV: ND

Neonatal mortality rate: 10.2 per 1000 live births

HIV

Number of new HIV infections
- Child (0-14): <100
- Female (15-24): <100
- Male (15-24): <100
- Female (25-49): <100
- Male (25-49): <200
- Female (50+): <100
- Male (50+): <100
- Total: <500

Number of people living with HIV
- Child (0-14): <500
- Female (15-24): <200
- Male (15-24): <500
- Female (25-49): 2,300
- Male (25-49): 4,800
- Female (50+): <1,000
- Male (50+): 1,200
- Total: 9,600

Number of AIDS related deaths
- Child (0-14): <100
- Female (15-24): <100
- Male (15-24): <100
- Female (25-49): <100
- Male (25-49): <100
- Female (50+): <100
- Male (50+): <100
- Total: <200

HIV incidence per 1,000 population (15+): 0.09

HIV prevalence among adults (15-49): 0.2%

Context

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain
**ENABLING ENVIRONMENT**

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

---

**Laws and policies**

**People living with HIV**

Are there laws or policies that:

- Criminalize transmission, exposure or non-disclosure of HIV\(^{13}\) **Yes**
- Restrict entry, stay and residence of people living with HIV** ND**
- Protect against discrimination on basis of HIV status\(^{21}\) **Yes**
- Allow HIV self-testing\(^{22}\) **No**
- Make oral pre-exposure prophylaxis for HIV (PrEP) available\(^{23}\) **No**

**SRHR and gender-based violence**

Are there laws or policies that:

- Allow safe abortion\(^{29}\)
  - To save a woman’s life **No**
  - To preserve a woman’s physical health **No**
  - To preserve a woman’s mental health **No**
  - In case of rape **No**
  - In case of incest **No**
  - Owing to foetal impairment **No**
  - For economic or social reasons **No**
  - On request **No**
- Require spousal consent for married women to access SRH services\(^{30}\) **No**
- Explicitly criminalize marital rape\(^{31}\) **Yes**
- Criminalize domestic violence\(^{32}\) **Yes**
- Criminalize sexual harassment\(^{33}\) **Yes**
- Require provision of CSE in primary school\(^{34}\) **No**
- National strategy or policy on self-care interventions\(^{35}\) **ND**

**Key populations**

Are there laws or policies that:

- Criminalize same-sex sexual behaviour\(^{34}\) **No**
- Criminalize sex work\(^{35}\) **No**
- Allow the death penalty for people convicted of drug-related offences\(^{36}\) **No**
- Support a harm reduction approach for people who use drugs\(^{37}\) **No**
- Legally recognize a third gender\(^{38}\) **ND**

**Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)**\(^{39}\)

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services

- All
- Some
- None

Health facilities delivering HIV treatment and care with SRH services

- All
- Some
- None
**SERVICE DELIVERY: REPRODUCTIVE HEALTH**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

- **Demand for family planning satisfied with a modern method of contraception (15-49)³⁸**: 89.8%
- **Unmet need for family planning (15-49)³²**: 5.8%

**Knowledge of modern contraceptive methods⁴⁰**

- Injection: 33.6%
- Self injectable: ND
- Pill: 14.6%
- Male condom: 7.0%
- IUD: 4.5%
- Implant: 0%
- Female sterilization: 38.5%
- Other modern methods: 1.8%

**Antenatal, delivery and postnatal care**

- **Attending antenatal clinic**
  - At least once: 94.7%
  - At least 4 times: 87.8%
- **Proportion of births attended by skilled health personnel⁴⁶**: 96.0%
- **Births by caesarean section⁴⁷**: 29.7%
- **Postnatal checkup in first two days after birth⁴⁸**: ND

**Vertical transmission of HIV**

- **Pregnant women tested for HIV⁴⁹**: 99.0%
- **Early infant diagnosis (HIV-testing of infants at risk)⁵⁰**: 63.1%
- **Vertical transmission (at 12 months)⁵¹**: 6.5%
- **Primary infertility among women⁵²**: ND

**Vertical transmission of syphilis**

- **Tested for syphilis at 1st antenatal care visit⁵³**: 88.2%
- **Percentage testing positive for syphilis who are treated⁵⁴**: 93.2%
- **Congenital syphilis rate (per 100,000 live births)⁵⁵**: 2.2
- **Abortion**
  - Abortions per 1,000 women (15-49)⁵⁶: ND

**Global Targets:** Achieved ▪ Challenges remain ▪ Major challenges remain
HIV prevention

Condom use at last high risk sex (15-49)

Male circumcision

PrEP and HIV self-testing

Current oral pre-exposure prophylaxis for HIV (PrEP) users

Syphilis

Active syphilis among men who have sex with men

Gender based violence

Women experiencing physical or sexual violence in past 12 months (15-49)

Wife agrees husband justified beating her - at least one reason specified

Cervical cancer

Existence of national HPV vaccination programme

Existence of national cervical cancer screening programme

Type of programme

Coverage of national screening programme

GLOBAL TARGETS:

Achieved

Challenges remain

Major challenges remain

ND = No Data

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.
Harmful practices

Girls married before 18\textsuperscript{96} 35.2%
Female genital mutilation / cutting\textsuperscript{97} ND

Comprehensive Sexuality Education

Primary schools fully implementing national CSE policy\textsuperscript{98} ND
Secondary schools fully implementing national CSE policy\textsuperscript{99} 76-100%

Adolescent sexual health

Had multiple partners and used a condom at last sex (15-19)\textsuperscript{100} Female ND Male ND
Correct knowledge of HIV prevention (15-24)\textsuperscript{101} Female ND Male ND

Key populations\textsuperscript{102}

The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source 'No data' is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG 5.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/databases/database

33. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

35. No Data. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - https://unstats.un.org/sdgs/indicators/database

36. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://www.statcompiler.com/

37. No Data. Indicator: Percentage of married women who say that they have the final say in their own health care. Source: DHS - http://www.statcompiler.com/

38. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://www.statcompiler.com/

41. 2018. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://www.statcompiler.com/
88. 2017. Indicator: Percentage of antenatal care attendees positive for syphilis who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.23610
89. 2019. Indicator: Percentage of infants born to women living with HIV who were tested for syphilis at first antenatal care visit. Source: UNAIDS estimates - https://aidsinfo.unaids.org
91. 2015. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.UHCHRHV
97. 2019. Indicator: People living with HIV who know their status who are on ART. Source: UNAIDS estimates - https://aidsinfo.unaids.org
