This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022*
The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

Demographic data

- Population size: 7.1m
  - Female: 3.5m
  - Male: 3.6m

Life expectancy at birth

- Female: 78.9
- Male: 73.1

Sexual and Reproductive Health

- Total fertility rate: 2.4 births per woman
- Adolescent birth rate: 70.5 per 1,000 women aged 15-19
- Median age at first sex among young people (20-24): ND

HIV

- Number of new HIV infections
  - Child (0-14): <100
  - Female (15-24): <200
  - Male (15-24): <500
  - Female (25-49): <200
  - Male (25-49): <500
  - Female (50+): <100
  - Male (50+): <100
  - Total: 1,100

- Number of people living with HIV
  - Child (0-14): <500
  - Female (15-24): <1,000
  - Male (15-24): 1,600
  - Female (25-49): 4,800
  - Male (25-49): 11,000
  - Female (50+): <1,000
  - Male (50+): 2,400
  - Total: 22,000

- Number of AIDS related deaths
  - Child (0-14): <100
  - Female (15-24): <100
  - Male (15-24): <100
  - Female (25-49): <200
  - Male (25-49): <500
  - Female (50+): <100
  - Male (50+): <100
  - Total: <1,000

HIV incidence per 1,000 population (15+): 0.22

HIV prevalence among adults (15-49): 0.5%
ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion, and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

Global Targets: Achieved 🟢 Challenges remain 🟠 Major challenges remain 🟥

Laws and policies

People living with HIV
Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV
  - Impact on integrated SRHR: Partial 🟠
- Restrict entry, stay and residence of people living with HIV
  - Yes 🟢
- Protect against discrimination on basis of HIV status
  - Yes 🟢
- Allow HIV self-testing
  - No 🟥
- Make oral pre-exposure prophylaxis for HIV (PrEP) available
  - No 🟥

Key populations
Are there laws or policies that:
- Criminalize same-sex sexual behaviour
  - No 🟥
- Criminalize sex work
  - No 🟥
- Allow the death penalty for people convicted of drug-related offences
  - No 🟥
- Support a harm reduction approach for people who use drugs
  - No 🟥
- Legally recognize a third gender
  - ND 🟥

SRHR and gender-based violence
Are there laws or policies that:
- Allow safe abortion
  - Yes 🟢
    - To save a woman’s life
    - To preserve a woman’s physical health
    - To preserve a woman’s mental health
    - In case of rape
    - In case of incest
    - Owing to foetal impairment
    - For economic or social reasons
    - On request
- Require spousal consent for married women to access SRH services
  - No 🟥
- Explicitly criminalize marital rape
  - No 🟥
- Criminalize domestic violence
  - Yes 🟢
- Criminalize sexual harassment
  - Yes 🟢
- Require provision of CSE in primary school
  - No 🟥
- National strategy or policy on self-care interventions
  - ND 🟥

**Global Targets:** Achieved  Challenges remain  Major challenges remain  No Data
SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets: Achieved Challenges remain Major challenges remain

Contraception / Family Planning

Demand for family planning satisfied with a modern method of contraception (15-49)\(^5\)
- 78.9%

Knowledge of modern contraceptive methods\(^10\)
- 32.0%
- ND
- 28.6%
- 15.6%
- 9.2%
- 0%
- 13.2%
- 1.4%

Unmet need for family planning (15-49)\(^3\)
- 12.1%

Use of modern contraceptive methods (women 15-49)\(^2\)
- 66.5%

Modern contraceptive method (women 15-49)\(^1\)

Antenatal, delivery and postnatal care

Attending antenatal clinic
- At least once\(^4\)
  - 98.7%
- At least 4 times\(^5\)
  - 85.9%

Proportion of births attended by skilled health personnel\(^6\)
- 97.7%

Births by caesarean section\(^6\)
- 45.9%

Postnatal checkup in first two days after birth\(^\ast\)
- 94.4%

Vertical transmission of HIV

Pregnant women tested for HIV\(^9\)
- 72.5%

Early infant diagnosis (HIV-testing of infants at risk)\(^9\)
- 62.6%

Vertical transmission (at 12 months)\(^1\)
- 9.6%

Primary infertility among women\(^7\)
- ND

Vertical transmission of syphilis

Tested for syphilis at 1st antenatal care visit\(^7\)
- 69.5%

Percentage testing positive for syphilis who are treated\(^7\)
- 58.0%

Congenital syphilis rate\(^7\)
- 281.5

Abortion

 Abortions per 1,000 women (15-49)\(^7\)
- ND
SERVICE DELIVERY: SEXUAL HEALTH

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

ND = No Data

Global Targets: Achieved | Challenges remain | Major challenges remain

### HIV prevention
- Male circumcision

### 95-95-95 testing and treatment cascade
- People living with HIV who know their status (15+)
- People living with HIV who are on ART (15+)
- People living with HIV on ART who achieve viral load suppression (15+)

### PrEP and HIV self-testing
- Current oral pre-exposure prophylaxis for HIV (PrEP) users

### Syphilis
- HIV self tests conducted
- Active syphilis among men who have sex with men
- Active syphilis among sex workers

### Gender based violence
- Women experiencing physical or sexual violence in past 12 months
- Wife agrees husband justified beating her - at least one reason specified

### Care/support provided by service delivery points in cases of rape or incest
- First-line support (psychological first aid)
- Emergency contraception for women (within 5 days)
- Safe abortion (in accordance with national laws)
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)

### Cervical cancer
- Existence of national HPV vaccination programme
- Existence of national cervical cancer screening programme
- Type of programme
- Coverage of national screening programme

ND = No Data

Global Targets: Achieved | Challenges remain | Major challenges remain
### Harmful practices

- Girls married before 18 years: 21.6%
- Female genital mutilation / cutting: ND

### Comprehensive Sexuality Education

- Primary schools fully implementing national CSE policy: ND
- Secondary schools fully implementing national CSE policy: ND

### Adolescent sexual health

- Had multiple partners and used a condom at last sex (15-19):
  - Female: 65.7%
  - Male: ND
- Correct knowledge of HIV prevention (15-24):
  - Female: 27.5%
  - Male: ND

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

30. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

32. No Data. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - http://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

35. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://www.statcompiler.com/

43. No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org
47. 2017. Indicator: Countries that have passed legislation on universal health coverage. Source: WHO Global Health Observatory - http://apps.who.int/gho/portal/uhc-hs-cabinet-wrapper-v2.jsp?id=1030103
49. 2016. Indicator: SDG 3.7.3.1. Percentage of nurses and midwifery personnel per 10,000 population. Source: WHO Global Health Observatory - https://apps.who.int/gho/data/view.main.UHCRHv
64. 2016. Indicator: Percentage of women aged 15 to 49 who received antenatal care by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
65. 2018. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
73. 2019. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z6810
78. 2016. Indicator: Percentage of women and men 15–49 years old who received a virological test for HIV within two months of birth. Source: UNAIDS estimates - https://aidsinfo.unaids.org
79. 2019. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z6810
93. No Data. Indicator: Percentage of women ages 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS
94. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
89. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

90. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

91. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. 2016. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: Multiple Indicator Cluster Survey 2016. Compiled by UNICEF - https://data.unicef.org/topic/hivaid adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

106. 2017. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

112. No Data. Indicator: Percentage of people who inject drugs who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. 2017. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. No Data. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
